if you re at this point you must be getting ready for your english language exams so we have a few words of advice for you exams aren t bad they re your opportunity to show off just how much you know about english and you have been studying it since you were five so you definitely know a thing or two don t worry about your exams worry never changes anything instead try and see them as an opportunity to show off what you know practising exam papers is a good way to revise and because this exam is still relatively new there aren t that many past papers out there the papers in this book have been created to try and replicate the exam experience for you some people might suggest using your literature texts for practice but the whole point of this exam is that it is unseen it s best to work on extracts you ve never read before there is more than one way to tackle an exam paper you could sit it in one go and complete it in exam conditions from start to finish you could go at the papers gently with modelled examples in front of you to help check out the videos at youtube com mrbruff another method is to try three question threes all in a row slide tackling your way through the paper you might want to complete all of the section b questions before beginning section a however you do it take your time and use the indicative content at the end to check your work the indicative content isn t everything you might make a point that we haven t included marking your own work is quite difficult so although these are good to practise on you should share

outlearning the wolves surviving and thriving in a learning organization second edition [PDF]
