modern database systems enhance the capabilities of traditional database systems by their ability to handle any kind of data including text image audio and video today databasesystemsareparticularlyrelevanttotheastheycanprovideinputtocontent generators for pages and can handle queries issued over the internet the extensible markup language xml is used in applications running the gamut from content management through publishing to services and e commerce it is used as the universal

communication language for exchanging music and graphics as well as purchase orders and technical documentation as database systems increasingly talk to each other over the there is a fa growingdesiretousexmlasthestandardexchangeformat asaresult manyrelational database systems can export data as xml documents and import data from xml d uments and provide query and update capabilities for xml data in addition so called native xml database and integration systems are appearing on the database market whose claim is to be especially tailored to storing maintaining and easily accessing xml documents after the huge success of the rst xml database symposium xsym 2003 last year in berlin already then in conjunction withvldb it was decided to establish this symposiumasanannualeventthatissupposedtotakeplaceasanintegralpartofvldb thegoalofthissymposiumistoprovideahigh qualityplatformforthepresentationand discussion of new research results and system developments it is targeted at scientists practitioners vendors and users of xml and database technologies

Export Licensing of Advanced Technology, a Review : Hearings Before the Subcommittee on International Trade and Commerce of the Committee on International Relations, House of Representatives, Ninety-fourth Congress, Second Session ...

1976

the objective of the workshops associated with er 2001 the 20th international conference on conceptual modeling was to give participants the opportunity to present and discuss emerging hot topics thus adding new perspectives to conceptual modeling this the 20th er conference the rst of the 21st century was also the rst one in japan the conference was held on november 27 30 2001 at yokohama national university with 192 participants from 31 countries er 2001 encompasses the entire spectrum of c ceptual modeling from theoretical aspects to implementations including fundamentals applications and software engineering in particular er 2001 emphasized e business and reengineering to meet this objective we selected the following four topics and planned four international workshops international workshop on conceptual modeling of human organizational social aspects of manufacturing activities humacs 2001 manufacturing enterprises have to confront a host of demands the competitive climate enhanced by communication and knowledge sharing will require incr singly rapid responses to market forces customer demands for higher quality better services and lower cost will force manufacturers to reach new levels of exhibility and adaptability sophisticated customers will demand products customized to meet their needs industries have so far sought to cope with these challenges primarily through advances in traditional capital by installing more powerful hardware and software technology attention to the role of humans combined with organizational and social schemes in manufacturing has only been marginal the workshop humacs 2001 aimed to challenge the relevance of this last point

Second International Conference on Networks and Advances in Computational Technologies

2021-02-02

this volume composes the proceedings of the second international conference on computational collective intelligence technologies and applications iccci 2010 which

was hosted by national kaohsiung university of applied sciences and wroclaw university of technology and was held in kaohsiung city on november 10 12 2010 iccci 2010 was technically co sponsored by shenzhen graduate school of harbin institute of technology the tainan chapter of the ieee signal processing society the taiwan association for intelligence consortium and the taiwanese association for consumer electronics it aimed to bring together researchers engineers and po cymakers to discuss the related techniques to exchange research ideas and to make friends iccci 2010 focused on the following themes agent theory and application cognitive modeling of agent systems computational collective intelligence computer vision computational intelligence hybrid systems intelligent image processing information hiding machine learning social networks intelligence and interaction around 500 papers were submitted to iccci 2010 and each paper was reviewed by at least two referees the referees were from universities and industrial organizations 155 papers were accepted for the final technical program four plenary talks were kindly offered by gary g yen oklahoma state university usa on population control in evolutionary multi objective optimization algorithm chin chen chang feng chia university taiwan on applying de clustering concept to information hiding qinyu zhang harbin institute of technology china on cognitive radio networks and its applications and lakhmi c

Database and XML Technologies
