Chinese Herbal Formulas and Applications

2009-01-01

most of the formulas that are currently used in chinese clinical therapy have been known and employed since ancient

times and perfected over the course of hundreds or even thousands of years well known formulas and modified applications is unique in that it deals only with those formulas recorded in the classic texts of traditional chinese medicine these formulas are the crystallization of thousands of years of medical knowledge they have been put to repeated tests have been proven effective and should be considered as the important part of prescriptions in traditional chinese medicine each of the formulas is discussed in three sections the first section gives a general commentary on the primary formula itself outlining its ingredients compatibility administration and function the second section examines the clinical applications of each formula for the treatment of particular diseases this section includes etiology and pathogenesis manifestations treatment principles and modification of the basic prescription the third section outlines the derivative formulas and their applications this book can be used as a textbook for foreign students in chinese traditional medicine and as a reference book for practitioners of traditional chinese medicine both in china and abroad it is also helpful for teachers and those who want to improve their clinical skills in prescription

Herbal Formulas

1997

1 1 relationships between formulas and treatment methods in clinical practice a physician makes a diagnosis of a disease or symptom and then figures out treatment methods and then selects a formula for treatment selection of formulas should be determined by the treatment methods treatment methods should be determined by diagnosis results and treatment methods are inherent in formulas as an example a patient suffering from the common cold with aversion to chills and fever headache and bodyache no perspiration panting a superficial and tight pulse the physician makes a diagnosis and determines it is a superficial wind cold excess disease and decides to treat the patient with a formula because the formula in question is designed to treat a superficial wind cold excess disease 1 2 commonly used treatment methods the yellow emperor s classics says when a patient is in poor physical shape it is necessary to warm the body by the energy of herbs when the patient is short of pure essence of energy it is necessary to tone the body by the flavours of herbs when the disease attacks the upper region it is necessary to induce vomiting when the disease attacks the lower region it is necessary to induce bowel movements when the disease attacks the middle region it is necessary to promote digestion when the pathogen attacks the superficial region the patient should take a hot bath or an herbal steam bath to induce perspiration when the disease attacks only the superficial region of the skin it is necessary to induce perspiration again the yellow emperor s classics says in treatment hot herbs should be used to treat a cold disease the counteracting method should be applied to treat a lighter disease the head on method should be applied to treat a severe disease a solid disease should be treated by weakening it a disease caused by the pathogens that reside in the body as guests should be treated by removing such pathogens a disease caused by deficient fatigue should be treated by the warming method a disease caused by energy congestion should be treated by the dispersing method a disease caused by pathogens that insist on residing should be treated by the attacking method a dry disease should be treated by the lubricating method an acute disease should be treated by slowing down its progression a dispersing disease should be treated by the constricting method a disease caused by a loss of energy and blood should be treated by the warming method a disease caused by a slow flow of energy and blood should be

treated by the quickening method a disease of shock should be treated by the calming method a disease with cave in of energy should be treated by the lifting method a disease with uprising energy should be treated by the inhibited method in addition the grinding method the bathing method the wasting method the depriving method and the opening up method

Systems Biology and Its Application in TCM Formulas Research

2018-02-16

the book starts with a rundown on rigvedic meter including a discussion of irregularities and the importance of word boundary patterns with a brief digression on clitics this is followed by a discussion of formulas formulaic diction and various definitions of the concept of formula in oral poetic traditions resulting in the relativistic but more realistic definition a formula is a slice of a formulaic continuum i e a razor sharp definition is in conflict with the material it is supposed to define the metrical facts show that irregular dimeters in the rigveda are more closely related to regular trimeters than to regular dimeters still bloomfield s extraction hypothesis does not provide a sufficient methodological basis for explaining the irregular dimeters nor does the laryngealist approach a selection of irregular dimeter lines are examined with reference to the formulaic continua and associative networks surrounding them and an attempt is made to show how these continua helped trigger the use of certain words in certain metrical positions

Formula Criticism and the Poetry of the Old Testament

2011-12-01

people have been seeking traditional herbal medicines for various viral respiratory disorders including the common cold influenza bronchitis and pneumonia for hundreds of years however the bioactive ingredients in traditional herbs have only recently come to light in the past few decades in functional herbal medicine and phyronutrition we will investigate the synergistic use of potent plant compounds in common foods traditional herbs and formulas for viral respiratory infections we will also review virtual screening and molecular docking analyses of individual herbs network pharmacology analyses of herbal formulas and clinical studies that shine a new light on potent compounds in traditional herbs and their actions some of the most effective compounds including glycyrrhizin baicalin scutellarin kaempferol luteolin quercetin emodin amygdalin forsythoside a saikosaponin b2 platycodin d ginsenosides lonicerin and chlorogenic acid will be explored combining these compounds in herbal formulas provides a three hit antiviral immune modulating and anti inflammatory effect to help decrease the severity of infections modulate immune activity and reduce inflammation one purpose of this book is to encourage practitioners to learn to identify the potent plant constituents found in traditional formulas for viral respiratory infections that make them so useful for example flavonoids such as the flavone luteolin and the flavonols kaempferol and quercetin are ubiquitous in chinese herbs used for viral respiratory infections another purpose of this book is to encourage practitioners to identify the

common foods that contain these same compounds as you will discover kaempferol luteolin quercetin and other potent polyphenols in everyday fruits and vegetables can be included in the diet to add to the synergistic effects of traditional herbs this herbal and dietary approach has been used for centuries yet has only recently been described in phytochemical and epigenetic terms that may even surprise many acupuncturists

Chinese Herbal Medicines: Comparisons and Characteristics E-Book

2009-12-09

at tcm colleges in china undergraduates learn a basic repertoire of between 50 and 100 herbal formulas this includes one or two formulas from each of 21 major categories by learning to modify this core group of formulas with additions and subtractions one will have a basic repertoire of formulas for most clinical occasions this book is not meant to replace or compete with bensky barolet s chinese herbal medicine formulas strategies it is meant as an outline for prioritized study and use by under graduates and new practitioners
