the international conference on automation and robotics icar2011 is held during december 12 13 2011 in dubai uae the proceedings of icar2011 have been published by springer lecture notes in electrical engineering which include 163 excellent papers selected from more than 400 submitted papers the conference is intended to bring together the researchers and engineers technologists working in different aspects of intelligent control systems and optimization robotics and automation signal processing sensors systems modeling and control industrial engineering production and management this part of proceedings includes 81 papers contributed by many researchers in relevant topic areas covered at icar2011 from various countries such as france japan usa korea and china etc many papers introduced their advanced research work recently some of them gave a new solution to problems in the field with powerful evidence and detail demonstration others stated the application of their designed and realized systems the session topic of this proceeding is intelligent control and robotics and automation which includes papers about distributed control systems intelligent fault detection and identification machine learning in control neural networks based control systems fuzzy control genetic algorithms robot design human robots interfaces network robotics and autonomous systems industrial networks and automation modeling simulation and architectures vision recognition and reconstruction virtual reality image processing and so on all of papers here involved the authors numerous time and energy will be proved valuable in their research field sincere thanks to the committee and all the authors moreover anonymous reviewers from many fields and organizations that is a power for all of us to go on research work for the world

Advances in Automation and Robotics, Vol.1 *2012-04-03*

did you know you can take your flash skills beyond the

browser allowing you to make apps for android ios and the blackberry tablet os build dynamic apps today starting with the easy to use android smartphones and tablets then take your app to other platforms without writing native code pro android flash is the definitive guide to building flash and other rich internet applications rias on the android platform it covers the most popular ria frameworks for android developers flash and flex and shows how to build rich immersive user experiences on both android smartphones and tablets you ll learn how to incorporate multimedia animation and special effects into your apps for maximum visual appeal you ll also cover advanced topics including input methods hardware inputs deployment and performance optimization

Pro Android Flash *2012-08-01*

since the first ecodesign international symposium held in 1999 this symposium has led the research and practices of environmentally conscious design of products services manufacturing systems supply chain consumption as well as economics and society ecodesign 2011 the 7th international symposium on environmentally conscious design and inverse manufacturing was successfully held in the japanese old capital city of kyoto on november 30th december 2nd 2011 the subtitle of ecodesign 2011 is to design for value innovation towards sustainable society during this event presenters discussed the way to achieve both drastic environmental consciousness and value innovation in order to realise a sustainable society

Design for Innovative Value Towards a Sustainable Society *2019-11*

the revised and extended papers collected in this volume represent the cutting edge of research at the nexus of electrical engineering and intelligent systems they were selected from well over 1000 papers submitted to the high profile international world congress on engineering held in london in july 2011 the chapters

cover material across the full spectrum of work in the field including computational intelligence control engineering network management and wireless networks readers will also find substantive papers on signal processing internet computing high performance computing and industrial applications the electrical engineering and intelligent systems conference as part of the 2011 world congress on engineering was organized under the auspices of the non profit international association of engineers iaeng with more than 30 nations represented on the conference committees alone the congress features the best and brightest scientific minds from a multitude of disciplines related to engineering these peer reviewed papers demonstrate the huge strides currently being taken in this rapidly developing field and reflect the excitement of those at the frontiers of this research
