dangerous art takes up the problem of judging works of art using moral standards when we think that a work is racist or morally dangerous what do we mean james harold approaches the topic from two angles first he takes up the moral question on its own what could it mean to say that a work of art rather than say a human being is immoral he then steps back and examines how moral evaluation fits into the larger task of evaluating artworks if an artwork is immoral what does that tell us about how to value the artwork by tackling the issue from both sides harold demonstrates how many of the reasons previously given for thinking that works of art are immoral do not stand up to careful scrutiny while many philosophers of art have simply assumed that artworks can be evaluated morally and proceeded as though such assessments were unproblematic harold highlights the complexities and difficulties inherent in such evaluations he argues that even when works of art are rightly condemned from a moral point of view the relationship between that moral flaw and their value as artworks is complex he instead defends a moderate skeptic version of autonomism between morality and aesthetics employing figures and ideas from ancient greece classical china and the harlem renaissance as well as william styron s novel the confessions of nat turner he argues that we cannot judge artworks in the same way that we judge people on moral grounds in this sense we can judge an artwork to be both wicked and beautiful nothing requires us to judge an artwork more or less valuable aesthetically just because we judge it to be morally bad or good taking up complex issues at the intersection of art and ethics dangerous art will appeal to philosophers and students interested in art aesthetics moral philosophy and philosophy of mind
