leading to the era of détente the conference on security and cooperation in europe csce with its final act in helsinki in august 1975 led to a rapprochement between east and west in the fields of security economy and culture this volume offers a pilot study in what the authors perceive as the key issues within this process an understanding over the german problem balancing the recognition of the post war territorial status quo against a formula for the eventuality of a peaceful change of frontiers and the western strategy of transformation through a multiplication of contacts between the two blocs both of these arguments emerged from the findings of an international research project on détente and csce in europe 1966 1975 funded by the volkswagen stiftung and headed by the two editors key overarching issues in the 1975 referendum and looking ahead to the prospect of further referendums on the subjects of emu and a european constitution this book examines the european left s attempt to think and give shape to an alternative type of european integration a social europe during the long 1970s based on fresh archival material it shows that the western european left in particular social democratic parties trade unions and to a lesser extent eurocommunist parties formulated a project to turn capitalist europe into a workers europe this project favoured coordinated measures for wealth redistribution market regulation a democratisation of the economy and of european institutions upward harmonisation of social and fiscal systems more inclusive welfare regimes guaranteed employment economic and social planning with greater consideration for the environment increased public spending to meet collective needs greater control of capital flows and multinational corporations a reduction in working time and a fairer international economic order favouring the global south during the pivotal years following 1968 deeply marked by labour militancy new social movements economic crisis and the unmaking of the postwar compromise a window of opportunity opened in which european integration could have taken different roads the defeat of social europe was a result of a decade long social conflict which ended with the affirmation of a neoliberal europe investigating this forgotten struggle and the reasons of its defeat can be useful not just to scholars and students eager to understand the historical evolution of european integration the european left and european capitalism but also to anyone interested in building alternative european and global futures observers of the european union often disagree about the reasons why european governments have chosen to coordinate core economic policies and surrender sovereignty this volume analyses the history of the region s movement toward union this book looks at the history of the eu s trade negotiations with china from 1975 to 2019 from a distinctive perspective the eu as a linkage power the author explains how the eu through linkage strategies speaks with one voice overcomes its weakness in military capabilities and translates its non military capabilities into advantages and influences in some specific policy areas the book systematically traces the european negotiators tactics in managing the eu s trade relations with china it s the first time that the history of eu china trade negotiations is presented to the public by a seasoned trade negotiator the author combining the identities of a negotiator and a scholar gives a panoramic view of eu china trade relations from 1975 argued that leaving the eu will enable britain to revive markets in commonwealth countries with which it has long standing historical ties their opponents maintain that such claims are based on forms of imperial nostalgia which ignore the often uncomfortable historical trade relations between britain and these countries as well as the uk's historical role as a global rather than chiefly imperial economy forging a british world of trade explores how efforts to promote a british world system centred on promoting trade between britain and the dominions grew and declined in influence between the 1880s and 1970s at the beginning of the twentieth century many people from london to sydney auckland and toronto considered themselves to belong to culturally british nations british politicians and business leaders invested significant resources in promoting trade with australia canada new zealand and south africa out of a perception that these were great markets of the future however ideas about promoting trade between british peoples were racially exclusive from the 1920s onwards colonized and decolonizing populations questioned and challenged the basis of british world networks making use of alternative forms of international collaboration promoted firstly by the league of nations and then by the united nations schemes for imperial collaboration amongst ethnically british peoples were hollowed out by the actions of a variety of political and business leaders across asia and africa who reshaped the functions and identity of the commonwealth volume ii considers the history of the european union from an inside out perspective focusing on the internal developments that shaped the european integration process taking an innovative thematic approach this volume will be of a voice for minorities in the european and international arena and the promotion of cross border cooperation among communities dissected by state frontiers the comprehensive chapters stress the importance of the nationality question and the fact that contrary to the hopes and beliefs of many on the left and right it is not going to go away beginning with an introductory essay that summarizes the impact of european integration on the nationalities question this accessible book will be of strong interest to scholars and researchers of politics nationalism ethnic conflict and european shock leave verdict in the eu referendum of 2016 these included the longstanding grievances of voters in former industrial areas feeling left behind by globalism stagnant incomes after the recession austerity the rise of social media the refugee and eurozone crisis in europe the deep split in the conservative and labour parties over the eu and rising wealth inequalities the author also charts the chaotic political landscape that ended in the final brexit deal this book is ideal for the general reader as well as for students of politics history and economics needing a concise and well explained
