Teeth Tell Tales 2008-12 similar to the osteological study of prehistoric human remains the study of human dental wear has been proven to afford a wealth of information on human cultural practices this study is aimed at recording and understanding the dental wear patterns in human dentitions from the caribbean archaeological sites of anse la gourde located on the most eastern point of guadeloupe and tutu located on the small island of st thomas u s virgin islands the premise of this research is the assumption that dental wear patterns are informative of a great many aspects of human health and lifestyle the use of the mouth and teeth in both masticatory and non masticatory activities is assumed to leave traces which can be studied post mortem to infer the lifestyle linked to such activities in order to build a complete picture of these activities and the lifestyle linked to the dental wear patterns other lines of evidence are also followed here such as ethnohistoric and ethnographical accounts and evidence from modern dentistry using this combination of different lines of evidence it has been possible to characterize the diet and a range of cultural practices of the inhabitants at each site the individuals selected in this sample very actively engaged their teeth in many non masticatory culturally defined activities which put their dentitions under a great deal of stress it seems these people s use of their mouths and teeth in this way was a very conscious decision characterized by their cultural background

A Companion to Dental Anthropology 2020-12-22 companion to dental anthropology presents a collection of original readings addressing all aspects and sub disciplines of the field of dental anthropology from its origins and evolution through to the latest scientific research represents the most comprehensive coverage of all sub disciplines of dental anthropology available today features individual chapters written by experts in their specific area of dental research includes authors who also present results from their research through case studies or voiced opinions about their work

offers extensive coverage of topics relating to dental evolution morphometric variation and pathology

The Dead Tell Tales 2013-12-31 honoring jane buikstra s pioneering work in the development of bioarchaeological research the essays in this volume stem from a symposium held at the annual meeting of the society for american archaeology multiple generations of buikstra s former doctoral students and other colleagues gathered to discuss the impact of her mentorship the essays are remarkable for their breadth in terms of both the topics discussed and the geographical range they cover the contributions highlight the dynamism of bioarchaeology which owes so much to the strong foundations laid down over the last few decades the volume documents the degree to which bioarchaeological approaches have become normalized and integrated into anthropological research bioarchaeology has moved out of the appendix and into the interpretation of archaeological data new perspectives have emerged partly in response to theoretical changes within anthropology but also as a result of the engagement of the broader discipline with bioarchaeology

The Tales Teeth Tell 2018-10-23 what teeth can tell us about human evolution development and behavior our teeth have intriguing stories to tell these sophisticated time machines record growth diet and evolutionary history as clearly as tree rings map a redwood s lifespan each day of childhood is etched into tooth crowns and roots capturing birth nursing history environmental clues and illnesses the study of ancient fossilized teeth sheds light on how our ancestors grew up how we evolved and how prehistoric cultural transitions continue to affect humans today in the tales teeth tell biological anthropologist tanya smith offers an engaging and surprising look at what teeth tell us about the evolution of primates including our own uniqueness humans impressive set of varied teeth provides a multipurpose toolkit honed by the diet choices of our mammalian ancestors fossil teeth highly resilient because of their substantial mineral content are all that is left of some long extinct species

smith explains how researchers employ painstaking techniques to coax microscopic secrets from these enigmatic remains counting tiny daily lines provides a way to estimate age that is more powerful than any other forensic technique dental plaque so carefully removed by dental hygienists today records our ancestors behavior and health in the form of fossilized food particles and bacteria including their dna smith also traces the grisly origins of dentistry reveals that the urge to pick one s teeth is not unique to humans and illuminates the age old pursuit of dental art the book is generously illustrated with original photographs many in color

The Oxford Handbook of Caribbean Archaeology 2013-02-07 the oxford handbook of caribbean archaeology provides an overview of archaeological investigations in the insular caribbean understood here as the islands whose shores surround the caribbean sea and the islands of the bahama archipelago though these islands were never isolated from the surrounding mainland their histories are sufficiently diverse to warrant their identification as distinct areas of culture over the past 20 years caribbean archaeology has been transformed from a focus on reconstructing culture histories to one on the mobility and exchange expressed in cultural and social dynamics this handbook brings together for the first time examples of the best research conducted by scholars from across the globe to address the complexity of the caribbean past the handbook is divided into five sections part i islands of history and the precolonial history of the caribbean islands provides an introduction to caribbean archaeology and its history the papers in the following ethnohistory section address the diversity of cultural practices expressed in the insular caribbean and develop historical descriptions in concert with archaeological evidence in order to place language social organization and the native ta nos and island caribs in perspective the following section culture history provides the latest research on specific geographical locations and cross cultural engagements from jamaica

and the bahama archipelago to the saladoid and the isthmo antillean engagements creating history the fourth section includes papers on specific issues related to the field such as zooarchaeology rock art and dna analysis among others the final section world history centers on the consequences of european colonization

Tales of Three Worlds - Archaeology and Beyond: Asia, Italy, Africa 2020-01-31 this book presents a series of papers in honour of sandro salvatori divided into three main sections reflecting his long years of work in middle asia his time in italy as an officer of the archaeological superintendency ministry of cultural heritage and finally his studies on the prehistory of north eastern africa

Berkeley Castle Tales 2023-08-24 presents results of 15 year long excavations and landscape research at berkeley castle combining archaeological results with information from the castle s 20 000 historical documents the project adds greatly to our understanding of the changes that accompanied the arrival of the normans with the erection of a castle on the former minster site

The Story of Food in the Human Past 2021-01-26 a sweeping overview of how and what humans have eaten in their long history as a species the story of food in the human past how what we ate made us who we are uses case studies from recent archaeological research to tell the story of food in human prehistory beginning with the earliest members of our genus robyn e cutright investigates the role of food in shaping who we are as humans during the emergence of modern homo sapiens and through major transitions in human prehistory such as the development of agriculture and the emergence of complex societies this fascinating study begins with a discussion of how food shaped humans in evolutionary terms by examining what makes human eating unique the use of fire to cook and the origins of cuisine as culture and adaptation through the example of neandertals the second part of the book describes how cuisine was reshaped when humans domesticated plants and animals and

examines how food expressed ancient social structures and identities such as gender class and ethnicity cutright shows how food took on special meaning in feasts and religious rituals and also pays attention to the daily preparation and consumption of food as central to human society cutright synthesizes recent paleoanthropological and archaeological research on ancient diet and cuisine and complements her research on daily diet culinary practice and special purpose mortuary and celebratory meals in the andes with comparative case studies from around the world to offer readers a holistic view of what humans ate in the past and what that reveals about who we are

The Story of the Gadsbys and Under the Deodars 1891 one of kirkus review s best nonfiction books of 2022 a deep time history of animals and humans in north america by the best selling and award winning author of coyote america in 1908 near folsom new mexico a cowboy discovered the remains of a herd of extinct giant bison by examining flint points embedded in the bones archeologists later determined that a band of humans had killed and butchered the animals 12 450 years ago this discovery vastly expanded america s known human history but also revealed the long standing danger homo sapiens presented to the continent s evolutionary richness distinguished author dan flores s ambitious history chronicles the epoch in which humans and animals have coexisted in the wild new world of north america a place shaped both by its own grand evolutionary forces and by momentous arrivals from asia africa and europe with portraits of iconic creatures such as mammoths horses wolves and bison flores describes the evolution and historical ecology of north america like never before the arrival of humans precipitated an extraordinary disruption of this teeming environment flores treats humans not as a species apart but as a new animal entering two continents that had never seen our likes before he shows how our long past as carnivorous hunters helped us settle america initially establishing a coast to coast culture that lasted longer than the

present united states but humanity s success had devastating consequences for other creatures in telling this epic story flores traces the origins of today s sixth extinction to the spread of humans around the world tracks the story of a hundred centuries of native america explains how old world ideologies precipitated 400 years of market driven slaughter that devastated so many ancient american species and explores the decline and miraculous recovery of species in recent decades in thrilling narrative style informed by genomic science evolutionary biology and environmental history flores celebrates the astonishing bestiary that arose on our continent and introduces the complex human cultures and individuals who hastened its eradication studied america s animals and moved heaven and earth to rescue them eons in scope and continental in scale wild new world is a sweeping yet intimate big history of the animal human story in america

The Story of the Gadys, and Under the Deodars 1891 the toothwrights tale tells the history of dentistry in the royal navy through the eyes of those who worked for the service drawing on first hand accounts it begins at a time when technological advances were leading the world into a dangerous and uncertain era nuclear proliferation terrorism and interstate quarrels challenged policy makers and strategists born of such tensions was the falklands conflict in which no less than 14 rn dental officers were deployed in the ships of the task force and with the royal marines and the book includes a number of gripping eyewitness accounts the end of the cold war gave momentary hope in 1989 for a more peaceful world but within a couple of years operation granby the first gulf war introduced new military alliances and new military challenges

Wild New World: The Epic Story of Animals and People in America 2022-10-25 today any kid can rattle off the names of dozens of dinosaurs but it took centuries of scientific effort and a lot of luck to discover and establish the diversity of dinosaur species we now know how did we learn that

triceratops had three horns why don't many paleontologists consider brontosaurus a valid species what convinced scientists that modern birds are relatives of ancient velociraptor in the story of the dinosaurs in 25 discoveries donald r prothero tells the fascinating stories behind the most important fossil finds and the intrepid researchers who unearthed them in twenty five vivid vignettes he weaves together dramatic tales of dinosaur discoveries with what modern science now knows about the species to which they belong prothero takes us from eighteenth century sightings of colossal bones taken for biblical giants through recent discoveries of enormous predators even larger than tyrannosaurus he recounts the escapades of the larger than life personalities who made modern paleontology including scientific rivalries like the nineteenth century bone wars prothero also details how to draw the boundaries between species and explores debates such as whether dinosaurs had feathers explaining the findings that settled them or keep them going throughout he offers a clear and rigorous look at what paleontologists consider sound interpretation of evidence an essential read for any dinosaur lover this book teaches us to see an ancient world ruled by giant majestic creatures anew

The Toothwrights' Tale 2013-08-08 the content of this book gives scientifically validated practical hints or state of the art knowledge to veterinarians breeders riders and members of the feed industry on the nutrition of endurance horses the nutrition of growing horses to reduce prevalence of developmental orthopedic disease strategies to cope with exertional rhabdomyolysis and on the importance of nutrition for the maintenance and rehabilitation of health of teeth hooves and the gastrointestinal tract without which a horse is no horse

The Story of the Dinosaurs in 25 Discoveries 2019-07-16 the best suspense and mystery from around the world including stories by such greats as carol anne davis robert s levinson rhys bowen joyce carol

oates and more editors ed gorman and martin h greenberg have scoured the world to present the biggest and most consistently entertaining collection of crime and suspense stories from across the globe their first rate picks are a diverse and exciting mix of stories by big names award winners and fresh voices the 2003 anthology features the year s edgar award winning stories silver dagger award winning stories from the u k and spine tingling tales from writers who might soon win those awards themselves this volume is a feast of more than thirty gripping tales from bestselling authors this is the anthology of choice for every fan of suspense fiction whether they love cozies hardboiled or any shade in between at the publisher s request this title is being sold without digital rights management software drm applied

Applied equine nutrition 2023-08-28 anthropology professor charles lockwood tells the amazing story of human evolution in a concise and compelling introduction to all our ancestors and extinct relatives he draws on the explosion of discoveries made over the past 20 years to demystify the fascinating cast of characters who hold the secret to our origins and describes the main sites individual fossils key scientific breakthroughs and latest research that have fed our knowledge with the help of a rich assortment of photographs reconstructions and maps lockwood takes us from the earliest hominins who date back six or seven million years ago to contemporary homo sapiens providing the basic facts about each species what it looked like what it ate how and when it lives and how we know this information created in association with london s natural history museum this is a truly readable up to date well illustrated and user friendly summary of the evidence as it stands today

R. AUSTIN FREEMAN Ultimate Collection: 27 Novels & 60+ Short Stories, including Dr. Thorndyke Series, Romney Pringle Adventures and Many More British Mysteries (Illustrated) 2024-01-11 this landmark volume provides the most comprehensive overview to date

of the prehistory and archaeology of the caddo peoples the caddos lived in the southeastern woodlands for more than 900 years beginning around a d 800 900 before being forced to relocate to oklahoma in 1859 they left behind a spectacular archaeological record including the famous spiro

mound site in oklahoma as well as many other mound centers plazas farmsteads villages and cemeteries the archaeology of the caddo examines new advances in studying the history of the caddo peoples including ceramic analysis reconstructions of settlement and regional histories of different caddo communities geographic information systems and geophysical landscape studies at several spatial scales the cosmological significance of mound and structure placements and better ways to understand mortuary practices findings from major sites and drainages such as the crenshaw site mounds in the arkansas river basin spiro mound the oak hill village site the george c davis site the willow chute bayou locality the hughes site big cypress creek basin and the mcllelland and joe clark sites are also summarized and interpreted this volume reintroduces the caddos heritage creativity and political and religious complexity

Archaeologists and the Dead 2016 this volume focuses on the reconstruction of past ecosystems and provides a comprehensive review of current techniques and their application in exemplar studies the 18 chapters address a wide variety of topics that span vertebrate paleobiology and paleoecology body mass postcranial functional morphology evolutionary dental morphology microwear and mesowear ecomorphology mammal community structure analysis contextual paleoenvironmental studies paleosols and sedimentology ichnofossils pollen phytoliths plant macrofossils and special techniques bone microstructure biomineral isotopes inorganic isotopes 3 d morphometrics and ecometric modeling a final chapter discusses how to integrate results of these studies with taphonomic data in order to more accurately characterize an ancient ecosystem current investigators advanced undergraduates and graduate students interested in the field of paleoecology will find this book immensely useful the length and structure of the volume also makes it suitable for teaching a college level course on reconstructing cenozoic ecosystems

The Archaeology of the Caddo 2012-06-01 winner 2010 prose award for excellence in the biological sciences professional and scholarly publishing division of the association of american publishers in this unique book peter s ungar tells the story of mammalian teeth from their origin through their evolution to their current diversity mammal teeth traces the evolutionary history of teeth beginning with the very first mineralized vertebrate structures half a billion years ago ungar describes how the simple conical tooth of early vertebrates became the molars incisors and other forms we see in mammals today evolutionary adaptations changed pointy teeth into flatter ones with specialized shapes designed to complement the corresponding jaw ungar explains tooth structure and function in the context of nutritional needs the myriad tooth shapes produced by evolution offer different solutions to the fundamental problem of how to squeeze as many nutrients as possible out of foods the book also highlights ungar s own path breaking studies that show how microwear analysis can help us understand ancient diets the final part of the book provides an in depth examination of mammalian teeth today surveying all orders in the class family by family ungar describes some of the more bizarre teeth such as tusks and the mammal diversity that accompanies these morphological wonders mammal teeth captures the evolution of mammals including humans through the prism of dental change synthesizing decades of research ungar reveals the interconnections among mammal diet dentition and evolution his book is a must read for paleontologists mammalogists and anthropologists

Methods in Paleoecology 2018-10-27 this handbook examines human responses to climatic and environmental changes in the past and their impacts on disease patterns nutritional status migration and interpersonal violence bioarchaeology the study of archaeological human skeletons provides direct evidence of the human experience of past climate and environmental changes and serves as

an important complement to paleoclimate historical and archaeological approaches to changes we may expect with global warming comprising 27 chapters from experts across a broad range of time periods and geographical regions this book addresses hypotheses about how climate and environmental changes impact human health and well being factors that promote resilience and circumstances that make migration or interpersonal violence a more likely outcome the volume highlights the potential relevance of bioarchaeological analysis to contemporary challenges by organizing the chapters into a framework outlined by the united nation s sustainable development goals for 2030 planning for a warmer world requires knowledge about humans as biological organisms with a deep connection to earth s ecosystems balanced by an appreciation of how historical and socio cultural circumstances socioeconomic inequality degrees of urbanization community mobility and social institutions play a role in shaping long term outcomes for human communities containing a wealth of nuanced perspectives about human environmental relations book is key reading for students of environmental archaeology bioarchaeology and the history of disease by providing a longer view of contemporary challenges it may also interest readers in public health public policy and planning

The Story of Mankind 2023-12-24 abnormal burial practices have long been a source of fascination and debate within the fields of mortuary archaeology and bioarchaeology the odd the unusual and the strange investigates an unparalleled geographic and temporal range of burials that differ from the usual customs of their broader societies emphasizing the importance of a holistic context driven approach to these intriguing cases from an andean burial dating to 3500 bc to mummified bodies interred in the capuchin catacombs of palermo sicily during the twentieth century the studies in this volume cross the globe and span millennia the unusual cases explored here include native american cemeteries in illinois vampire burials in medieval poland and a mass grave of decapitated soldiers in

ancient china moving away from the simplistic assumption that these burials represent people who were considered deviant in society contributors demonstrate the importance of an integrated biocultural approach in determining why an individual was buried in an unusual way drawing on historical sociocultural archaeological and biological data this volume critically evaluates the binary of typical versus atypical burials it expands our understanding of the continuum of variation within mortuary practices helping researchers better interpret burial evidence to learn about the people and cultures of the past a volume in the series bioarchaeological interpretations of the human past local regional and global perspectives edited by clark spencer larsen

Women in the Ancient Mediterranean World 2004 at the age of five mary jane masterson s destiny was foretold by a stranger that one said the brother of holy cross pointing at mary jane as he sat comfortably in their living room with her mother will be a nun his prediction repeated in later years by other friends and acquaintances became reality when in 1946 at the age of eighteen mary jane joined the sisters of st joseph and became a bride of christ she adapted quickly to religious life sharing prayer and living quarters with other nuns an elitist group considered by many in the secular world to have far more than secular access to god s love a belief encouraged by vatican i but as the second vatican council came to a close in 1965 a shift in theology shook sister mary jane to her very core had she sacrificed marriage sex and children of her own for nothing follow sister mary jane on her journey from her calling to the noblest of vocations to her acceptance of how as a nun she could affect the world beyond her community and her school

[The Best British Detective Books: 270+ Murder Mysteries, Crime Stories & Suspense Thrillers](#) 2002 wiley blackwell s clinical cases series is designed to recognize the centrality of clinical cases to the profession by providing actual cases with an academic backbone clinical cases in prosthodontics

grounds itself in core principles of this rehabilitative specialty and demonstrates their practical every day application through range of case presentations building from simple to complex and from common to rare this unique approach supports the new trend in case based and problem based learning thoroughly covering topics ranging from conventional complete denture prostheses to full mouth rehabilitation using both implant and tooth supported prostheses each case begins with a short description of the initial patient presentation and the learning objectives and goals the subsequent case discussion will demonstrate this is accompanied by relevant medical and dental histories notes on extra oral and soft tissue examination and a thorough list of clinical findings all presented in bulleted form to facilitate ease of learning clinical decision making factors are then discussed in detail well illustrated with multiple clinical photos showing progressive stages of treatment cases conclude with review questions and relevant literature citations supporting each answer ideal for practitioners and students alike clinical cases in prosthodontics is the ultimate resource linking evidence based research to every day application
