HC 712 - The Work of the Immigration Directorates (January - June 2014) 2014

in 1998 the previous government abolished exit checks paper based embarkation records of passengers departing from the uk because they were too resource intensive those universal exit checks were replaced by an intelligence led approach using cctv and greater liaison between border agencies port operators and transport carriers this approach was subsequently superseded by the e borders programme announced in february 2005 the e borders programme has stalled and was terminated in march 2014 and that the home office would be replacing individual systems such as the warnings index and semaphore separately at the moment data for air passengers travelling in and out of the uk is sourced from carrier

lists known as advanced passenger information api air passengers buy tickets in advance and check in a reasonable time before departure so api coverage is good about 80 and increasing coverage is not so good for rail and ferry passengers partly because of the ticketing systems and partly because customers can decide to travel buy a ticket and have checked in at a time near to departure both the minister and the director general of border force have assured the committee that 100 exit checks will be in place by 31st march 2015 to deliver exit checks the home office needs to find a mechanism that can count all of the rail and maritime passengers as they depart the uk by the end of march exit checks will be carried out by the transport operators staff not border force the committee hope this can be delivered

Global Economic Prospects, Volume 9, June 2014 2014-06-10

the global economy got off to a bumpy start this year but growth in 2015 and 2016 looks to be broadly on track projections for developing countries in 2014 have been downgraded by 0.5 percentage points to 4.8 percent mainly reflecting weak first quarter growth in the us due to weather and the conflict in ukraine going forward growth is projected to firm to 5.3 and 5.5 percent in 2015 and 2016 supported by easy global financial conditions and rebounding exports as high income countries continue to recover under the influence of a reduced drag from fiscal consolidation and improving labor markets financial conditions will eventually tighten and when they do there is risk of further volatility most developing countries are in good fiscal and financial shape but where vulnerabilities remain countries need to tighten policy to reduce the potential impact of external shocks overall growth for developing countries will be solid but not strong enough to generate the income and employment gains needed to eliminate poverty by 2030 as a result countries need to focus on structural reform in order to lift growth in an enduring and sustainable manner

known around the world as a bastion of catholicism and machismo latin america has emerged in recent years as the undisputed gay rights leader of the global south even more surprising is that several latin american nations have surpassed many developed nations including the united states in legislating equality for the lgbt community so how did this dramatic and unexpected expansion of gay rights come about and why are latin american nations diverging in their embrace of gay rights a point highlighted by the paradoxical experiences of argentina and brazil argentina a country with a dark history of repression of homosexuality legalized same sex marriage in 2010 a first for a latin american nation and since then it has enacted laws to ensure transgender equality to abolish ex gay reparative therapy and to provide reproductive assistance to same sex couples by contrast brazil a country famous for celebrating sexual diversity proved incapable of legalizing same sex marriage via the legislature leaving the job to the courts and brazilian anti gay discrimination laws are among the weakest in latin america in out in the periphery omar g encarnaci n breaks away from the conventional narrative of latin america s embrace of gay rights as a by product of the global spread of gay rights from the developed west instead encarnaci n aims to decenter gay rights politics his intention is not to demonstrate how the local has trumped the global in latin america but rather to suggest how domestic and international politics interacted to make latin america one of the world s most receptive environments for gay rights economic and political modernization constitutional and judicial reforms and the rise of socially liberal governments have all contributed to this receptivity but the most decisive

factor was the skill of local activists in crafting highly effective gay rights campaigns inspired by external events and trends but firmly grounded in local politics and realities these campaigns succeeded in bringing radical change to the law with respect to homosexuality and in some cases as in argentina in transforming society and the culture at large

punk rock has long been equated with the ever shifting concepts of dissent disruption and counter cultural activities as a result since its 1970s and 1980s incarnations when bands in britain from the clash and sex pistols to angelic upstarts u k subs and crass offered alternative political convictions and subversive lifestyle choices the media has often deemed punk a threat bands like circle jerks dead kennedys bad religion and millions of dead cops followed suit in america pushing similar boundaries as the music mutated into a harsher hardcore style that branched deep into suburban enclaves those antagonisms and ideals were in turn translated by another wave of bands from fugazi to anti flag whose commitment
