out of the history of the genre are here foregrounded in a critical account that emphasizes the importance of engaging readers minds and bodies and which invites us to revisit our understanding of the rise of the modern novel kukkonen s innovative theoretical approach is based on the approach of 4e cognition which views thinking as profoundly embodied and embedded in social and material contexts extending into technologies and material devices such as a pen and enactive in the inherent links between perceiving the world and moving around in it 4e cognition and eighteenth century fiction investigates the eighteenth century novel through each of these trajectories and shows how language explores its embodied dimension by increasing the descriptions of inner perception or the bodily gestures around spoken dialogue the embodied dimension is then related to the media ecologies of letter writing book learning and theatricality as the novel feeds off and into these social and material contexts it comes into its own as a lifeworld technology that might not answer to standards of nineteenth century realism but that feels real because it is integrated into the lifeworld and embodied experiences 4e cognition answers one of the central challenges to cognitive literary studies how to integrate historical and cultural contexts into cognitive approaches
