Boosting Your Child's Natural Creativity

2022-08-15

creativity is the emergence of something novel and appropriate from a person a group a society a creative idea or product must be novel yet novelty is not enough a novel idea may be ridiculous or nonsensical in addition to novelty to be creative an idea or product must also attain some level of social recognition the individualist approaches to creativity overestimate the role of the individual and of his her abilities the myth of the genius on the contrary the socio cultural approach emphasizes the role played by contexts in the creation process societies cultures and historical periods accordingly the individual is seen as a member of many overlapping social groups each of them has its own network with a specific structure and organization which influences the creation of networks of potentially creative ideas each individual is also a member of a culture which gives him her the categories used to understand the world finally each individual is representative of a specific historical period from a managerial perspective it is important to deepen the knowledge of the contexts both spatial and cognitive which favor situated creativity in the realm of the cultural industries this special book offers both theoretical and empirical contributions in an attempt to build such knowledge

Managing situated creativity in cultural industries

2013-10-31

in this paper we describe the key lessons from an earlier hci educators conference held in limerick in 2006 on inventivity a term coined to

highlight the confluence of inventiveness and creativity there is a distinction between being creative and being artistic hci education in terms of creative inventiveness is not just about artistically pleasing user interfaces but also about solutions that are innovative we can know much about creativity and inventiveness however to be able to teach and train students so that they can be creatively inventive we believe that it would be helpful if educators themselves have personally experienced this with this in mind we organised the follow up conference hci ed 2007 creativity experiencing to educate and design inventivity was coined to refer to the notion of inventing creative and innovative solutions this term was also intended to mean that such solutions be more than creative artistic or appealing interfaces as designed by artistic or creative types of people it was also intended to reflect the creativeness of the solutions that had to be invented one reason for emphasising this aspect at the conference was that in hci design it is easy to misinterpret the focus of hci design solutions which should not address just visualisation and interaction design but also address how that visualisation and interaction creatively represents and simplifies the complexities in work that people engage in

Creativity and HCI: From Experience to Design in Education

2008-11-21

Test Your Creative Thinking

2003

maria kronfeldner examines how darwinism has been used to explain novelty and change in culture through the darwinian approach to creativity and the theory of memes the first claims that creativity is based on a darwinian process of blind variation and selection while the latter claims that culture is based on and explained by units memes that are similar to genes both theories try to describe and explain mind and culture by applying darwinism by way of analogies kronfeldner shows that the analogies involved in these theories lead to claims that give either wrong or at least no new descriptions or explanations of the phenomena at issue whereas the two approaches are usually defended or criticized on the basis that they are dangerous for our vision of ourselves this book takes a different perspective it questions the acuteness of these approaches darwinian theory is not like a dangerous wolf hunting for our self image far from it in the case of the two analogical applications addressed in this book darwinian theory is shown to behave more like a disoriented sheep in wolf s clothing

Explaining Creativity

Creativity for Engineers

2014-09-11

northernness northern culture and northern narratives are a common aspect of popular culture and the north of england like other northernnesses in europe is a collection of narratives myths stereotypes and symbols in politics and everyday culture northern culture is paradoxically a site of resistance against an inauthentic south a source of working class identity and a source of elite marginalisation this book provides a key to theorising about northernness and a platform to scholars working away at exposing the north in different aspects of culture the aims of this book are twofold to re theorise the north and northern culture and to highlight the ways in which constructions of northernness and northern culture are constituted alongside other gender racial and regional identities the contributions presented here theorise northernness in relation to space leisure gender race class social realism and everyday embodied practices a main thematic thread that weaves the whole book together is the notion that northernness and the north is both an imagined discursive construct and an embodied subjectivity thus creating a paradox between the reality of north and its representation this book was originally published as a special issue of the journal for cultural research
