most of the work in critical essays marks and apparently decisive conversion to structuralism understood in its strictest sense whereby literature and social life are regarded as no more than languages to be studied not in their content but in their structure as pure relational systems the first serious analysis of barthes as a writer with specific aesthetic techniques this fresh and original study focuses on some of the ways he discusses the nature of his own writing the first two chapters examine the key but ambiguous term of derive drift a word which raises questions about how exactly barthes s writing develops across three decades about the scientific legitimacy of his concepts and about his own frequently fraught relation to the scientific discourses around him especially psychoanalysis two typical discursive maneuvers that structure his writing naming and framing are then shown to generate particular aesthetic effects which cause complications for some of his theoretical stances barthes s fascination for the idea that all writing is a kind of scribble closer to the visual arts than to speech is investigated in depth and his latent animosity against speech as such is made manifest the final chapter suggests that for barthes the real can leave its mark on writing only as a disturbing indeed traumatic trace this book provides a lively introduction to the work of roland barthes one of the twentieth century s most important literary and cultural theorists the book covers all aspects of barthes s writings including his work on literary theory mass communications the theatre and politics moriarty argues that barthes s writing must not be seen as an unchanging body of thought and that we should study his ideas in the contexts within which they were formulated debated and developed
