this report is a follow up to the committee s report on accountability for public money hc 740 session 2010 11 isbn 9780215559029 an issue at the core of the relationship between parliament and government accounting officers remain accountable to parliament for funds voted to their departments but the policy intention is that local bodies will have significant discretion over the services they deliver in the government s response accountability adapting to decentralisation sir bob kerslake drew a distinction between those services that government delivers directly and those that it may fund but are delivered in more decentralised arrangements he proposed that accounting officers set out in accountability system statements the arrangements they have in place to provide assurance about the probity and value for money of funds spent through devolved systems all departments are expected to produce statements by summer 2012 departments have made a genuine effort to develop arrangements which reconcile accountability and localism but the statements so far are unwieldy and considerably more needs to be done to improve their clarity consistency and completeness there is concern that accountability frameworks must drive value for money and critically are sufficiently robust to address the operational or financial failure of service providers departments are placing increasing reliance on market mechanisms such as user choice to drive up performance and value for money but there are limits to what these mechanisms can achieve the treasury needs to take ownership of the system and ensure that the comptroller and auditor general has the necessary powers and rights of access to examine the value for money of funds spent through devolved systems
