Psychological Aspects of the Care of Hospitalized Patients

1972

developed by top pediatric hospitalists caring for the hospitalized child a handbook of inpatient pediatrics 3rd edition is sure to become your go to resource from initial patient evaluation all the way through discharge management quickly obtain the essential information for managing a wide range of pediatric medical conditions in patients who have been admitted to the hospital with this trusted pocket sized reference each chapter not only discusses clinical presentation essential laboratory tests differential diagnosis treatment indications for consultation and disposition but contains many helpful tables and an easy to follow template chapters also include a short bulleted list of essential pearls and pitfalls although the book focuses primarily on diseases and conditions it contains helpful sections that address the many other issues practicing hospitalists are confronted with including ethics billing utilization management surge planning and transport as well as a brief section on common equipment the alphabetized contents has been updated to include autism spectrum disorder hypertension constipation surge planning utilization management and both acute covid 19 disease and multisystem inflammatory syndrome in children misc a new part on newborn care has been added covering topics such as breastfeeding hypoglycemia of the newborn and early onset sepsis

Psychological Aspects of the Care of Hospitalized Patients

1976

nursing care for the hospitalized older patient is a comprehensive quick reference resource for registered and advanced practice nurses working with older patients in a hospital setting organized in user friendly format the book provides vital information on all aspects of hospital care and the full range of health issues encountered by elderly patients the book is organized into four major sections the first section provides an overview of the aging patient including demographics normal aging changes and the general impact of hospitalization the second section covers proper health assessment providing guidance on history taking and evaluating laboratory values the third section is the largest part of the book and is made up of short similarly structured chapters dedicated to individual clinical issues ranging from burns to depression these chapters are organized by body system to maximize ease of use the book concludes with a section on special considerations that cross common clinical areas such as palliative care pain management fall prevention and discharge planning

Emotional Care of Hospitalized Children

1980

in this edition of frontiers in pediatrics authors will discuss a wide variety of pediatric diseases which often lead to severe illnesses and hospitalizations for children in low resource settings including certain populations in high income countries such as native americans alaskan natives refugees and immigrants we will focus on the current management in those settings including recent updates looking at adaptations of care when appropriate we will attempt to discuss the most common diseases seen in the majority world where at least 80 90 of pediatric deaths occur

Caring for the Hospitalized Child

2022-11

updated in an all new 3rd edition pediatric care plans for the hospitalized child is an essential guide to preparing individualized care plans tailored to meet the special needs of the non critical hospitalized child this book provides a quick reference for correlating pediatric medical diagnoses with nursing diagnoses and will serve as a valuable tool in the clinical setting a unique thirteen part format provides care plans that are organized by medical diagnoses with six corresponding nursing diagnoses for each medical diagnosis in this new edition all of the nursing care plans are situated in tables instead of text making it much easier for the reader to understand and access

Nursing Care of the Hospitalized Older Patient

2012-11-28

health care costs make up nearly a fifth of u s gross domestic product but health care is a peculiar thing to buy and sell both a scarce resource and a basic need it involves physical and emotional vulnerability and at the same time it operates as big business patients have little choice but to trust those who provide them care but even those providers confront a great deal of medical uncertainty about the services they offer selling our souls looks at the contradictions inherent in one particular health care market hospital care based on extensive interviews and observations across the three hospitals of one california city the book explores the tensions embedded in the market for hospital care how different hospitals manage these tensions the historical trajectories driving disparities in contemporary hospital practice and the perils and possibilities of various models of care as adam

reich shows the book's three featured hospitals could not be more different in background or contemporary practice. Public care was founded in the late nineteenth century as an almshouse in order to address the needs of the destitute. Holy care was founded by an order of nuns in the mid twentieth century offering spiritual comfort to the paying patient and group care was founded in the late twentieth century to rationalize and economize care for middle class patients and their employers. Reich explains how these legacies play out today in terms of the hospitals' different responses to similar market pressures and the varieties of care that result. *Selling Our Souls* is an in depth investigation into how hospital organizations and the people who work in them make sense of and respond to the modern health care market.

Evidenced Based Medical Care of Hospitalized Children with Local Adaptations in Low-Resource Settings

2023-08-22

documents the medical record abstraction guidelines for PCP used in a study designed to evaluate quality of care for hospitalized AIDS patients with PCP who were treated in 4 cities.

The Effects of Hospitalization on Children

1973

Parkinson's disease (PD) is a progressive neurodegenerative disorder that can result in motor and non motor symptoms following motor and non motor basal ganglia circuitry degeneration. Motor features include rigidity and bradykinesia as well as gait and balance difficulties. Patients may also develop tremors. Pharmacological treatment is focused around replacing dopamine and carbidopa/levodopa is the most used medication in more advanced PD stages. Motor symptoms become more challenging to manage.

Nursing Care for the Hospitalized Elderly Patient

1996-01-01

hospitalization can cause short term to long term issues to children's biopsychosocial health. Play strategies have played a key role in preventing hospitalization trauma. Properly trained play specialists provide children with structured play activities that

have proven to be effective in diminishing anxiety depression and negative emotions among in patient children and their parents these techniques are beneficial to ameliorating children s and parents coping strategies and treatment compliance however discrepancies among countries healthcare systems in recognizing the value of play highlights the need for major awareness in the field the handbook of research on play specialism strategies to prevent pediatric hospitalization trauma spreads knowledge about the potential of playing to protect and increase children s health during hospitalization the book focuses on play strategies counteracting pediatric patients trauma anxiety depression and other biopsychosocial negative consequences it discusses the rights of hospitalized children and the strengths of the play specialism approach covering topics such as chronically ill children pediatric oncology and culturally sustaining practices this premier reference source is an excellent resource for child psychologists psychotherapists neuroscientists pedagogists psychiatrists nurses physicians health sociologists pediatricians play specialists students and faculty of higher education librarians researchers and academicians

Pediatric Nursing Care Plans for the Hospitalized Child

2009

Maternal Participation in the Care of the Hospitalized Child

1994

up to 35 of adults suffer from chronic pain and a substantial number of these patients are admitted to hospitals every year a major concern of these patients is whether the pain will be adequately controlled during hospitalization these patients are more likely to have poor pain control and may experience an exacerbation of their co existing chronic pain condition during hospital admission adequate pain control is directly related to clinical outcomes length of hospital stay and patient satisfaction a

considerable body of evidence demonstrates the medical social and economic benefits of satisfactory inpatient pain control currently there are limited pain control guidelines to address this challenging inpatient population in fact there are no guidelines outlining best practices for postoperative pain control in patients with chronic pain the complex nature of chronic pain and a dearth of publications addressing the concerns of these patients make the creation of relevant guidelines difficult the goal of this book is to equip clinicians to provide safe and effective management of hospitalized patients with co existing chronic pain each chapter addresses a particular clinical question and is written by an expert in the field chapters describe basic principles and specific clinical situations commonly encountered during the care of patients with co existing chronic pain in hospital settings

Mothers' Attitudes about Participating in the Care of Their Hospitalized Children

1981
