this book documents the growing mobility of international students in the asia pacific international
students comprise over 2 7m students and it is estimated by the oecd that this will top 8 million in 2020
the great majority of them are students from the asian countries who study in the europe north america
and asia in addition countries such as singapore malaysia and hong kong are becoming education hubs and
are proposing to attract international students over 42 of international students come from asia and this
is predicted to continue with the strong presence of students from china india korea and japan continuing
a younger population a growing middle class and shortages of quality education providers in the asia
pacific region means that this mobility will be a feature of the future this book explores questions
around the mobility of international students in the context of the global economy and an increasingly
competitive trans national education market it also explores questions about the experience of
international students principally from the asia pacific region at a time of increased global insecurity
and growing hostile reactions to foreigners in the post september 11th era this book emerges from
empirical work from several research projects funded by the world bank and several community projects to
support international students the focus is also on the way in which student mobility promotes growing
connection within the asia pacific as well as other regions and provides the foundations for new notions
of global citizenships

using previously classified documents and original interviews the other alliance examines the channels of cooperation between american and west german student movements throughout the 1960s and early 1970s and the reactions these relationships provoked from the u s government revising the standard narratives of american and west german social mobilization martin klimke demonstrates the strong transnational connections between new left groups on both sides of the atlantic klimke shows that the cold war partnership of the american and german governments was mirrored by a coalition of rebelling counterelites whose common political origins and opposition to the vietnam war played a vital role in generating

dissent in the united states and europe american protest techniques such as the sit in or teach in became crucial components of the main organization driving student activism in west germany the german socialist student league and motivated american and german student activists to construct networks against global imperialism klimke traces the impact that black power and germany s unresolved national socialist past had on the german student movement he investigates how u s government agencies such as the state department s interagency youth committee advised american policymakers on confrontations with student unrest abroad and he highlights the challenges student protesters posed to cold war alliances exploring the catalysts of cross pollination between student protest movements on two continents the other alliance is a pioneering work of transnational history
