Corridor Traffic Management for Major Highway Reconstruction

1979

emerging economies arguably have different socio fiscal dynamics compared to developed
economies on one side they have the need for corporate interventions in national development on
the other hand they do not have enough research to support the agenda in recent times there has
been a conscious effort to legislate corporate social responsibility csr in some of these countries in
order to bring about sustainable development yet it is this legislation which is debated among
many others this book provides its readers with a comprehensive interpretation of the various csr
perspectives in emerging economies through academic research and case studies from practice it
not only points out the challenges the debates but also the dynamics of implementation and the
impact of such csr spent this book therefore is targeted both towards academics as well as
practitioners in an attempt to bring about an active academic industry interface as csr as a
management function is part of dynamic social science

pollution control for agriculture second edition describes approaches adaptable to the treatment disposal and management of agricultural wastes incorporating full scale technologies concepts data and operating systems the book also discusses energy conservation natural resource utilization and nonpoint source control examples of problems attributable to agriculture include unbalanced natural ecological systems and increased eutrophication from waste disposal practices other problems include the depletion of dissolved oxygen in surface water and impurities in

groundwater from improper waste disposals on land the text notes that understanding the characteristics of these wastes leads to more effective disposal methods and treatment for example biological treatment is preferred for liquid waste that contain dissolved organic solids while incineration or composting is appropriate for solid waste with a high organic content the book also lists the options that can be chosen to control agricultural nonpoint sources the best of which is by planning and management practices that regulate the source and delivery of nonpoint pollutants these practices will limit nonpoint pollutants from reaching their destinations surface water or groundwater the text also emphasizes the need for a balance between the extremes of agricultural production profit motives and environmental concerns the book is suitable for agriculturists economists environmentalists ecologists and policy makers involved in food production environmental safety and health issues
