Migration Law and the Externalization of Border Controls

2019-03-27

over the last few decades both the european union and european states have been implementing various strategies to externalize border controls with the declared intent of saving human lives and countering smuggling but with the actual end result of shifting borders circumventing international obligations and ultimately preventing access to europe what has been principally deplored is the fact that externalizing border controls risks creating legal black holes furthermore what is particularly worrying in the current european debate is the intensification of this practice by multiple arrangements with unsafe third

countries exposing migrants and asylum seekers to serious human rights violations this book explores whether european states can succeed in shifting their responsibility onto third states in cases of human rights violations focusing in particular on the 2017 italy libya memorandum of understanding the book investigates the possible basis for triggering the responsibility of outsourcing states the second part of the book examines how the italy libya mou is only a small part of a broader scenario exploring eu policies of externalization a brief overview of the recent decisions of the eu court vis à vis two aspects of externalization the eu turkey statement and the issue of humanitarian visas will pave the way for the conclusions since in the author's view the current attitude of the luxembourg court confirms the importance of focusing on the responsibility of european states and the urgent need to investigate the possibility of bringing a claim against the outsourcing states before the court of strasbourg offering a new perspective on an extremely topical subject this book will appeal to students scholars and practitioners with an interest in european law international law migration and human rights

Law, Migration, and Human Mobility

2023-10-17

this book analyses the multifaceted ways law operates in the context of human mobility as well as the ways in which human mobility affects law migration law is conventionally understood as a tool to regulate human movement across borders and to define the rights and limits related to this movement but drawing upon the emergence and development of the discipline of mobility studies this book pushes the idea of migration law towards a more general concept of mobility that encompass the various processes effects and consequences of movement in a globalized world in this respect the book pursues a shift in perspective on how law is understood drawing on the concepts of kinology and kinopolitics developed by thomas nail as well as mobility justice developed by mimi sheller the book considers movement and motion as a constructive force behind political and social systems and hence stability that needs to be explained and justified tracing the processes through which static forms such as state citizenship or border are constructed and how they partake in production of differential mobility the book challenges the conventional understanding of migration law more specifically and in revealing its contingent and unstable nature the book reveals how human mobility is itself constitutive of law this interdisciplinary book will appeal to those working in the areas of migration and refugee law citizenship studies mobility studies legal theory and sociolegal studies

Hope and Uncertainty in Contemporary African Migration

2016-11-25

this volume examines the relationship between hope mobility and immobility in african migration through case studies set within and beyond the continent it demonstrates that hope offers a unique prism for analyzing the social imaginaries and aspirations which underpin migration in situations of uncertainty deepening inequality and delimited access to global circuits of legal mobility the volume takes departure in a mobility paradox that characterizes contemporary migration whereas people all over the world are exposed to widening sets of meaning of the good life elsewhere an increasing number of people in the global south have little or no access to authorized modes of international migration this book examines how african migrants respond to this situation focusing on hope it explores migrants temporal and spatial horizons of expectation and possibility and how these horizons link to

mobility practices such analysis is pertinent as precarious life conditions and increasingly restrictive regimes of mobility characterize the lives of many africans while migration continues to constitute important livelihood strategies and to be seen as pathways of improvement whereas involuntary immobility is one consequence another is the emergence and consolidation of new destinations emerging in the global south the volume examines this development through empirically grounded and theoretically rich case studies in migrants countries of origin zones of transit and in new and established destinations in europe north america the middle east latin america and china it thereby offers an original perspective on linkages between migration hope and immobility ranging from migration aspirations to return

2022-01-11

this contributed volume examines the trend whereby the eu resorts ever more often to informal arrangements and deals with third countries in an effort to curb and manage migration flows towards the eu and facilitate the return of

irregular migrants to their countries of origin or transit the perceived success of the eu turkey deal provided a strong impetus for the continuation of this trend the contributions collected and presented in this book aim to shed light on the implications of this trend for the eu constitutional order the human rights of those affected by these deals the third countries with which the eu cooperates and the global refugee protection regime they demonstrate how these deals raise more issues than they solve by for instance sidestepping established treaty rules and procedures violating the human rights of those affected and overburdening the nascent migration and asylum systems of third country partners this book the first volume to appear in the global europe series will be of great interest to researchers and policy makers working in the field of migration and asylum eva kassoti and narin idriz work in the research department of the t m c asser institute in the hague

Human Rights Law and Evidence-Based Policy

2019-12-06

the eu fundamental rights agency fra was established to provide evidence based policy advice to eu institutions and member states by blending social science research with traditional normative work it aims to influence human rights policy processes through new ways of framing empirical realities the contributors to this volume critically examine the experience of the agency in its first decade exploring fra s historical political and legal foundations and its evolving record across major strands of eu fundamental rights central themes arising from these chapters include consideration of how the agency manages the tension between a mandate to advise and the more traditional approach of human rights bodies to monitor and how its research impacts the delicate equilibrium between these two contesting roles fra s experience as the first embedded human rights agency is also highlighted suggesting a role for alternative and less oppositional orientations for human rights research while authors observe the benefits of the technocratic approach to human rights research that is a hallmark of fra s evidence based policy advice they also note its constraints fra s policy work requires a continued awareness of political realities in brussels member states and civil society consequently the complex process of determining the agency s research agenda reflects the strategic priorities of key actors this is an important factor in the agency s role in the eu human rights landscape this pioneering position of the agency should invite reflection on new forms of institutionalized human rights research for the future

The Transnationalized Social Question

2018-12-13

the social question is back yet today s social question is not primarily between labour and capital as it was in the nineteenth century and throughout much of the twentieth the contemporary social question is located at the interstices between the global south and the global north it finds its expression in movements of people seeking a better life or fleeing unsustainable social political economic and ecological conditions it is transnationalized not only because migrants and their significant others entertain ties across the borders of national states staying in touch with family and friends receiving or sending financial remittances in transnational social spaces also of importance are cross border recruitment schemes for workers and the cross border diffusion of norms appealed to in the case of migration for example the social right to decent work as a human right moreover migration can become an issue of inclusion or exclusion in fields important to life chances in the emigration transit or immigration states a transnationalization of national states and as in the nineteenth century political conflicts arise constituting the social question as a public concern in earlier periods class differences dominated conflicts while class has always been criss crossed by manifold heterogeneities not least of all cultural ones around ethnicity religion and language it is these latter heterogeneities that have sharpened in situations of immigration and emigration over the past decades casting a wide net in terms of conceptual and empirical scope this book tackles both the social structure and the politics of social inequalities it sets a comprehensive agenda for research which also includes the public role of social scientists in dealing with the transnationalized social question

The Good Drone

2016-08-25

while the military use of drones has been the subject of much scrutiny the use of drones for humanitarian purposes has so far received little attention as the starting point for this study it is argued that the prospect of using drones for humanitarian and other life saving activities has produced an alternative discourse on drones dedicated to developing and publicizing the endless possibilities that drones have for doing good furthermore it is suggested that the good drone narrative has been appropriated back into the drone warfare discourse as a strategy to make war more human this book explores the role of the good drone as an organizing narrative for political projects technology development and humanitarian action its contribution to the debate is to take stock of the multiple logics and rationales according to which drones are good with a primary objective to initiate a critical conversation about the political currency of good this study recognizes the many possibilities for the use of drones and takes these possibilities seriously by critically examining the difference the drones functionalities can make but also what difference the

presence of drones themselves as unmanned and flying objects make discussed and analysed are the implications for the drone industry user communities and the areas of crisis where drones are deployed

focusing on the relationship between data on migration by boat and governance and geopolitics of the border building upon the two themes already outlined the third theme will identify and analyse how elite discourses represent migration at sea

The Vulnerable in International Society

2013-06-27

who are the vulnerable and what makes them so through an innovative application of english school theory this book suggests that people are vulnerable not only to natural risks but also to the workings of international society this replicates the approach of those studies of natural disasters that now commonly present a social vulnerability analysis showing how people are differentially exposed by their social location could international society have similar effects this question is explored through the cases of political violence climate change human movement and global health these cases provide rich detail on how through its social practices of the vulnerable international society constructs the vulnerable in its own terms and sets up regimes of protection that prioritize some forms at the expense of others what this demonstrates above all is that even if only a practical association international society inevitably has moral consequences in the way it influences the relative distribution of harm as a result these four pressing policy issues now present themselves as fundamentally moral problems revising the arguments of e h carr

the author points out the essentially contested normative nature of international order however instead of as a moral clash between revisionist and status quo powers as carr had suggested the problem is instead one about the contested nature of vulnerability insofar as vulnerability is an expression of power relations but also gives rise to a moral claim by providing a holistic treatment in this way the book makes practical sense of the vulnerable while also seeking to make moral sense of international society
