Safer Roads 1996 an international review of road safety engineering this study illustrates the practices procedures used in the identification of hazardous sites and the development of road traffic countermeasures it identifies the sources of accident problems and factors of human behaviour

Road Safety 2003 every day it is estimated that about 350 people are killed on the roads of oecd countries and thousands of others are injured new technologies including intelligent speed adaptation and collision avoidance systems are being developed which could significantly improve road safety levels and reduce these casualties however significant investment is also going into technological research which may have a negative impact on road safety unless action is taken to ensure their compatibility with current road systems this oecd report evaluates the global impact of new technologies on road safety and provides recommendations to governments and industry to ensure that fatalities and injuries in road traffic are reduced

Advances in Road Safety Planning 2021-05-19 this volume contains the papers and discussions from a symposium on human behavior and traffic safety held at the general motors research laboratories on september 23 25 1984 this symposium was the twenty ninth in an annual series sponsored by the research laboratories initiated in 1957 these symposia have as their objective the promotion of the interchange of knowledge among specialists from many allied disciplines in rapidly developing or changing areas of science or technology attendees characteristically represent the academic government and industrial institutions that are noted for their ongoing activities in the particular area of interest of this symposium was to focus on the role of human behavior the objective in traffic safety in this regard a clear distinction is drawn between on the one hand human behavior and on the other human performance human performance at the driving task or what the driver can do has been the subject of much research reported in the technical literature although clearly of some relevance questions of performance do not appear to be central to most traffic crashes of much more central importance is human behavior or what the driver in fact does this is much more difficult to determine and is the subject of the symposium

Human Behavior and Traffic Safety 2012-12-06 this is the story of sheku gibril kamara from his childhood days in sierra leone it deals first with his parents in the capital freetown and then with his aunt's family in the rural countryside educated in freetown he gained employment as an accounting assistant in the colonial daily mail newspaper in his home town and later at the iron ore mining company in nearby lunsar a job he relinquished to pursue his dreams of higher studies in britain with great finesse sheku provides intimate details about life as a private student in london and the political wrangling among fellow sierra leonean students this culminated in the temporary seizure of the country's high commission

at portland place in london in 1972 after a mass demonstration sheku and his colleagues were sent to the old bailey on a charge of treason but were instead found guilty of trespass on appeal the house of lords reached the landmark judgment in british law a case for trespass cannot hold where the national of a country occupies his country s diplomatic mission since that territory is after all deemed to be his home ground defended by sir dinglefoot the students were bound to peace for six months upon the establishment of sierra leone s state owned insurance company sheku was encouraged to return home to help develop the nation s market when he became the company s first indigenous chief executive sheku was to traverse the gruelling events that accompanied his role in top management in what follows the reader will join him in enjoying the exciting experiences with his supervising authorities

Education, Publicity and Training in Road Safety 1991 stellenbosch faces the same challenges that most south african urban areas face rapid urbanisation sluggish economic growth growing inequalities unsustainable use of natural resources deteriorating biodiversity social problems unhealthy living insecure supplies of healthy food degrading soils infrastructure backlogs and inadequate urban planning at the same time stellenbosch has tremendous potential it brings together in one beautiful place extra ordinary intellectual capacity social diversity financial resources creative potential high value eco systems spiritual energy and some of south africa s most vibrant grassroots social movements in its poorest areas the brief given to the writers was to examine the current challenges and discuss what needs to change in the way we think about these challenges to ensure more positive and sustainable long term outcomes this is therefore a contribution that aims to further open up and widen recent dialogues about the future that stellenbosch deserves back cover

Advanced Technology and Road Safety 1989 the academic and scholarly interest in the subject of branding in both the consumer and industrial markets has grown substantially in the dynamic post pandemic environment the growth in research outputs by a handful of business scholars explains the impact of brand in an industrial business to business setting at the cognitive level only and has not considered its impact specifically on logistics and transportation despite the value it can offer considering these gaps in the periphery of our existing knowledge this book explores corporate brand management within the logistics and transportation sector from the perspective of image reputation and identity this edited collection offers a blend of comprehensive and extensive high quality research from global highly reputed contributors it covers issues related to the establishment of brands relevant niches such as service performance and social support aviation and maritime industries media relations crisis branding and innovation exploring a wide range of sectors within logistics and transport the book illustrates the

many dimensions of corporate branding and theories future trends and developments as well as proposing a model for future research containing a balance of theory and practice with effective case studies corporate branding in logistics and transportation will appeal to marketing academics and upper level graduates in particular it will also be a valuable resource for those studying or researching logistics supply chain management and transport studies

Many Rivers to Cross 2024-03-01 despite increasing reports across the globe on renewable development and maintenance little is known regarding what strategies are required for improved economic growth and prosperity in africa improving an understanding of the methods for promoting growth through reusable resource development and administration is a vital topic of research to consider in assisting the continent s development the handbook of research on sustainable development and governance strategies for economic growth in africa provides emerging research on the strategies required to promote growth in africa as well as the implications and issues of the expansion of prosperity while highlighting sustainable education pastoral development pathways and the public sector role readers will learn about the history of sustainable development and governmental approaches to improving africa s economy this publication is a vital resource for policy makers research institutions academics researchers and advanced level students seeking current research on the theories and applications of development in societal and legal institutions

Road & Transport Research 2004 the work of dr basil hetzel and his team of researchers has prevented and will continue to prevent millions of people worldwide from being born intellectually disabled in this memoir hetzel recalls his discovery that a single dose of iodized oil added to the diet of pregnant women could eradicate the serious birth defects that had plagued many developing countries

Traffic Law Reform 1984 this handbook provides a unique overview of rehabilitation as practiced internationally in criminal justice through the contributions of a diverse group that includes among others academics some of whom are former practitioners research students a judge and a probation chief it reflects common features of criminal justice in different countries and documents their diversity and celebrates their vitality in recent times the idea of law and order has been expropriated by populist authoritarian and doctrinaire regimes almost always and nearly everywhere in the service of arbitrary and unjust rule by and large this handbook does not include such regimes but law itself also has the capacity to constrain rulers and order in the form of social peace is a universally approved civic asset in part the book provides a counter narrative demonstrating that although criminal justice dispositions such as probation prisons and parole can be represented as a via dolorosa rehabilitation as illustrated

in these pages can become a journey that leads by degrees towards the possibility of a better life the handbook will be of interest to students academics practitioners managers policy makers and all those who wish to gain insight into the why and the how of rehabilitation in criminal justice systems across the world

Sustainable Stellenbosch 2012-11-01 the second international conference on innovations in computing research icr 23 brings together a diverse group of researchers from all over the world with the intent of fostering collaboration and dissemination of the innovations in computing technologies the conference is aptly segmented into six tracks data science computer and network security health informatics and medical imaging computer science and computer engineering education internet of things and smart cities smart energy these tracks aim to promote a birds of the same feather congregation and maximize participation the data science track covers a wide range of topics including complexity score for missing data deep learning and fake news cyberbullying and hate speech surface area estimation analysis of gambling data car accidents predication model augmenting character designers creativity deep learning for road safety effect of sleep disturbances on the quality of sleep deep learning based path planning vehicle data collection and analysis predicting future stocks prices and trading robot for foreign exchange computer and network security track is dedicated to various areas of cybersecurity among these are decentralized solution for secure management of iot access rights multi factor authentication as a service mfaaaS for federated cloud environments user attitude toward personal data privacy and data privacy economy host ip obfuscation and performance analysis and vehicle obd ii port countermeasures the computer science and engineering education track enfolds various educational areas such as data management in industry academia joint research a perspective of conflicts and coordination in japan security culture and security education training and awareness seta influencing information security management engaging undergraduate students in developing graphical user interfaces for nsf funded research project and emotional intelligence of computer science teachers in higher education on the internet of things iot track the focus is on industrial air quality sensor visual analytics social spider optimization meta heuristic for node localization optimization in wireless sensor networks and privacy aware iot based fall detection with infrared sensors and deep learning the smart cities and smart energy track spans various areas which include among others research topics on heterogeneous transfer learning in structural health monitoring for high rise structures and energy routing in energy internet using the firefly algorithm

Corporate Branding in Logistics and Transportation 2024-03-05 this book focuses on the challenge that

australia faces in transitioning to renewable energy and regenerating its cities via a transformation of its built environment both are necessary conditions for low carbon living in the 21st century this is a global challenge represented by the united nation s sustainable development goals and the ipcc s climate change program and its focus on mitigation and adaptation all nations must make significant contributions to this transformation this book highlights the new knowledge and innovation that has emerged from research projects undertaken in the co operative research centre for low carbon living between 2012 and 2019 an initiative of the australian government s department of industry science and technology that is tasked with responding to the un challenges four principal transition pathways were central to the crc and provide the thematic structure to this volume they focus on technology buildings precinct and city design and human behaviour and their interactions

Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa

2018-02-09 the ten volume set lncs 12949 12958 constitutes the proceedings of the 21st international conference on computational science and its applications iccsa 2021 which was held in cagliari italy during september 13 16 2021 the event was organized in a hybrid mode due to the covid 19 pandemic the 466 full and 18 short papers presented in these books were carefully reviewed and selected from 1588 submissions part x of the set includes the proceedings of the following workshops international workshop on smart and sustainable island communities ssic 2021 international workshop on science technologies and policies to innovate spatial planning stp4p 2021 international workshop on sustainable urban energy systems suren sys 2021 international workshop on ports of the future smartness and sustainability smartports 2021 international workshop on smart tourism smarttourism 2021 international workshop on space syntax for cities in theory and practice syntax city 2021 international workshop on theoretical and computational chemistryand its applications tccma 2021 international workshop on urban form studies uform 2021 international workshop on urban space accessibility and safety usas2021 international workshop on virtual and augmented reality and ap plcations vra 2021 international workshop on advanced and computational methods for earth science applications wacm4es 2021

Annual Transportation Convention 1995 slow motion is a collection of non fiction stories essays and interviews about walking the collection has been written over a period of six years and so the book has become something of a documentary project witnessing transformation in south africa through the eyes of pedestrians across the economic racial and age spectrum the book could be described as documenting recent history though it inevitably looks at the issue of crime and how we have moved from a race based to a class based society and pedestrians of all colours continue to be marginalised and thought of as

second class citizens in an increasingly autocentric society it is essentially an optimistic book it tells the stories of south africans and visitors who have chosen to reclaim the streets from predators and traffic while the focus is primarily on johannesburg several of the stories are about cape town contrasting the experience of walking in these two cities other international cities such as los angeles paris london and mumbai are also visited along the way the style of the book is such that while it can be opened anywhere and each story can be read and enjoyed on its own a bedside table book the stories are interlinked as people s paths inevitably cross there is a bigger story at play as well the band of pedestrians includes writers artists political activists disabled people dogs and their owners walk for life members jews on the sabbath domestic workers refugees babies learning to walk and even a golfer and a caddie the purpose of the book is both to entertain and inform readers publisher s website

Chance and Commitment 2005 this book constitutes the proceedings of the 10th international symposium on cyberspace safety and security css 2018 held in amalfi italy in october 2018 the 25 full papers presented in this volume were carefully reviewed and selected from 79 submissions the papers focus on cybersecurity cryptography data security and biometric techniques and social security ontologies and smart applications

South African Digest 1979 this book contains the best papers of the 8th international conference on enterprise information systems iceis 2006 held in the city of paphos cyprus organized by the institute for systems and technologies of information control and communication insticc in collaboration with the university of cyprus aristotle university of thessaloniki and athens university of economics and business iceis has become a major point of contact between research scientists engineers and practitioners in the area of business applications of information systems this year five simultaneous tracks were held covering different aspects related to enterprise computing including databases and information systems integration artificial intelligence and decision support systems information systems analysis and specification software agents and internet computing and human computer interaction all tracks focus on real world applications and highlight the benefits of information systems and technology for industry and services thus making a bridge between academia and enterprise following the success of 2005 iceis 2006 received 404 paper submissions from more than 40 countries spanning all continents in all 63 papers were published and presented as full papers i e completed work 8 pages in proceedings 30 min oral presentations 102 papers reflecting work in progress or position papers were accepted for short presentation and another 75 for poster presentation

The Palgrave Handbook of Global Rehabilitation in Criminal Justice 2022-11-22 this book constitutes the

refereed proceedings of the 6th international symposium on mobile human computer interaction mobile hci 2004 held in glasgow uk in september 2004 the 25 revised full papers 20 revised short papers and 22 revised posters presented together with summaries of 7 workshops and 2 panels were carefully reviewed and selected from a total of 166 submissions the full papers are organized in topical sections on screen and power limitations user differences and navigation evaluation and evaluation techniques till touch and text entry auditory interactions device differences and web pages and novel interaction techniques

Learning and Collaboration Technologies 2023-06-16 this is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after the entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date typically the individuals included have been born by 1935 and by now have made their main contributions contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included the dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy there are special problems about the term british in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term the intention has been to include not only those who were british subjects at least for a significant part of their lives even if they mostly lived outside what is now the u k but also people who spent a significant part of their lives in britain itself irrespective of their nationality or country of origin in the first category are included for instance a number of people who were born and educated in britain but who subsequently taught in universities abroad in the second category are included those who were born elsewhere but who came to britain and contributed to its philosophical culture

Proceedings of the Second International Conference on Innovations in Computing Research (ICR'23)

2019-06-07 this book gathers contributions presented at the international joint conference on mechanics design engineering and advanced manufacturing jcm 2022 held on june 1 3 2022 in ischia italy it reports on cutting edge topics in product design and manufacturing such as industrial methods for integrated product and process design innovative design and computer aided design further topics covered include virtual simulation and reverse engineering additive manufacturing product manufacturing engineering methods in medicine and education representation techniques and collaborative and soft robotics the book is organized into five main parts reflecting the focus and primary themes of the conference the contributions presented here not only provide researchers engineers and experts in a range of industrial

engineering subfields with extensive information to support their daily work they are also intended to stimulate new research directions advanced applications of the methods discussed and future interdisciplinary collaborations

Decarbonising the Built Environment 2021-09-11 in this introductory textbook the author contextualises approaches and theories on communication studies by making use of local examples from the mass media as well as relevant political and social experiences the book is divided into two parts the first provides students with a strong foundation in communication while the second focuses on the areas of specialisation within communication studies each chapter starts with the learning outcomes and a short overview of the chapter students can monitor their learning by using the summaries and test yourself questions at the end of every chapter scenarios provide examples of how the theory can be applied in practice this makes for a learner friendly and accessible book which will prove invaluable to students and professionals alike beginner students majoring in communication studies as well as those studying towards various degrees or qualifications where communication is a prerequisite will find this book useful

Computational Science and Its Applications – ICCSA 2021 1975 this book represents the first attempt to historicise and theorise appeals for relevance in psychology it argues that the persistence of questions about the relevance of psychology derives from the discipline's terminal inability to define its subject matter its reliance on a socially disinterested science to underwrite its knowledge claims and its consequent failure to address itself to the needs of a rapidly changing world the chapters go on to consider the relevance debate within south african psychology by critically analysing discourse of forty five presidential keynote and opening addresses delivered at annual national psychology congresses between 1950 and 2011 and observes how appeals for relevance were advanced by reactionary progressive and radical psychologists alike the book presents moreover the provocative thesis that the revolutionary quest for social relevance that began in the 1960s has been supplanted by an ethic of market relevance that threatens to isolate the discipline still further from the anxieties of broader society with powerful interest groups continuing to co opt psychologists without relent this is a development that only psychologists of conscience can arrest

Safety Science Abstracts 2010 africa after apartheid affords a penetrating look at the unexpected results of the expansion of african business opportunities following the demise of apartheid

Slow Motion 2018-10-24 the south african language rights monitor salrm project surveys the mainstream newspapers of south africa with a view to compile annual reports on the developments on the language

front in the country while the main focus is on language rights and language rights activism the yearly monitor also covers other language related problems including name changes and aspects of language promotion

Cyberspace Safety and Security 2008-02-08 this latest version of information resources in toxicology irt continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization review and commentary on the information infrastructure of the field this book is a unique wide ranging international annotated bibliography and compendium of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment thoroughly updated the current edition analyzes technological changes and is rife with online tools and links to sites irt iv is highly structured providing easy access to its information among the hot topics covered are disaster preparedness and management nanotechnology omics the precautionary principle risk assessment and biological chemical and radioactive terrorism and warfare are among the designated international in scope with contributions from over 30 countries numerous key references and relevant links concise narratives about toxicologic sub disciplines valuable appendices such as the iupac glossary of terms in toxicology authored by experts in their respective sub disciplines within toxicology
