0201379287b04062001 the new york times bestselling author of witnessed intruders and missing time three groundbreaking books on the ufo phenomenon returns with astonishing evidence that other worldly beings are a very real and growing part of our lives in sight unseen budd hopkins and coauthor carol rainey show how fascinating discoveries in modern science support the plausibility of the ufo phenomenon featuring sixteen never before published cases sight unseen

probes two newly uncovered patterns in alien abduction cases of ufo invisibility and reports of genetically altered alien beings who interact with humans during their routine lives the invisibility accounts detailed by hopkins include numerous daylight abductions in densely populated urban areas all apparently unseen and accomplished through a technology of invisibility two air force non coms are snatched from the tarmac of a busy military airfield an australian family is levitated up into a hovering craft while the father remains paralyzed on the ground with a camera to his eye the resulting evidence on film is discussed in terms of our own scientific advances in the second series of cases abductees report encounters with beings who appear human but apparently possess paranormal powers and stunted emotional ranges three young women unknown to each other are mysteriously summoned to job interviews in ordinary office settings they encounter human looking beings who lead them into baffling ufo abduction experiences a wisconsin farmer meets damoe a man with odd behavior who closely resembles his son damoe eventually reveals himself as an accomplice of ufo occupants in a startling abduction of the farmer and his wife five year old jen is abducted at night to a nearby playground there she must teach the techniques and skills of play to twelve seemingly identical quasi human children along with these bizarre first person stories told by credible people hopkins and rainey explore cutting edge advances in our own technologies and scientific theories that show how these new ufo patterns could have a concrete basis in contemporary science included are an examination of cloaking devices for aircraft mind control technologies and teleportation achieved in the lab perhaps the most compelling argument to support these cases lies in the startling and controversial new science of transgenics that actually allows for the creation of alien human beings this guide to the study and use of military history is designed to foster an appreciation of the value of military history and explain its uses and the resources available for its study it is not a work to be read and lightly tossed aside but one the career soldier should read again or use as a reference at those times during his career when necessity or leisure turns him to the contemplation of the military past homes and businesses around the world have solar panels to harness the sun s energy for electricity but even more remarkably nasa powered an airplane using solar power in 2001 achievements in renewable energy are encouraging as the world s reserves of oil natural gas and coal continue to be depleted readers will learn the state of nonrenewable resources on earth in addition to information about the renewable energy technology that will power cars and homes in the future discussion of greenhouse gases and climate change provide readers with basic knowledge about the changing needs of earth detailed sidebars and fact boxes augment science and social studies information offering readers both pros and cons of solar wind and water energy among others colorful photographs will further engage readers with these important topics as they begin to form opinions using their new knowledge we are in the midst of a blood pressure crisis nearly 70 million americans have been diagnosed with hypertension and just 56 percent of them have it under control another 51 million 30 percent of the population have prehypertension hypertension is responsible for 69 percent of first heart attacks and 77 percent of first strokes but there is good news high blood pressure is very responsive to lifestyle changes and the more changes you make the greater your results lower

your blood pressure naturally by sari harrar provides readers with a comprehensive lifestyle plan readers will follow the power mineral diet which centers on 13 delicious powerful blood pressure lowering foods along with an easy doable exercise program that combines the proven effectiveness of cardio strength training and yoga on blood pressure not only do these methods help lower blood pressure on their own they promote fast sustainable weight loss which has an independent blood pressure lowering effect with daily meal plans flavorful versatile spice blends 50 recipes plus power mineral smoothies and desserts the plan proves that a heart healthy diet need not be bland or boring lower your blood pressure naturally offers one of the easiest and most effective ways to conquer hypertension yet asvab exam cram second edition kalinda reeves succeed with topical reviews practice exams and preparation tools asvab exam cram second edition is the perfect study guide to help you pass the asvab exam it provides coverage and practice questions for every exam topic the book contains an extensive set of practice questions including 200 printed questions in two full practice exams the book covers the critical information you ll need to know to score higher on your asvab exam master all four domains of knowledge covered on the asvab verbal math science technical and spatial accurately interpret the meaning of paragraphs and of words presented in context review essential math physical science and biology principles master the basics of electricity and electronics understand the technologies that make automobiles and other vehicles work check your knowledge of shop tools terminology and techniques review and understand basic mechanical and physical principles practice for the newest assembling objects exam module by recognizing how objects will look when they are put together marketing experts predict that by 2009 nearly 90 of all cell phones will contain a camera as manufacturers race to create cheaper easier to use models with more sophisticated cameras more pixels flash units and even multiple lenses already revolutionizing audiovisual communication it s a trend that will only grow more explosively and who better than national geographic to create a how to book aimed directly at the millions who carry a camera phone everywhere and want to make the most of it created by two top professionals this generously illustrated nuts and bolts guide is the first of its kind to treat these units as genuine cameras instead of novelties and the only one to include a full color photo essay demonstrating the full capabilities of the latest camera phones in five easy to read chapters the book explains how to choose good equipment take better pictures and store print and send the best images readers will find practical tips on preventing or repairing water damage protecting easily scratched lenses inside pockets and purses and retrieving accidentally erased images they ll also learn to access the events advice and opportunities of the burgeoning camera phone community from film festivals to news organizations moblogs and more featuring the technical savvy of cnet com s aimee baldrige and the creative skill of national geographic photographer robert clark a camera phone pioneer this compact yet comprehensive reference combines up to the minute expertise with superb examples at an inexpensive price that makes it a perfect gift book or an ideal impulse buy

Moving Object Detection Using Background Subtraction

2014-06-20

this springer brief presents a comprehensive survey of the existing methodologies of background subtraction methods it presents a framework for quantitative performance evaluation of different approaches and summarizes the public databases available for research purposes this well known methodology has applications in moving object detection from video captured with a stationery camera separating foreground and background objects and object classification and recognition the authors identify common challenges faced by researchers including gradual or sudden illumination change dynamic backgrounds and shadow and ghost regions this brief concludes with predictions on the future scope of the methods clear and concise this brief equips readers to determine the most effective background subtraction method for a particular project it is a useful resource for professionals and researchers working in this field

Moving on from crime and substance use

2016-09-21

desistance is one of the big news stories of the criminological world research suggests that as offenders turn their backs on crime they often change their identities as well as their behaviour yet we know much less about how reforming or transforming identity might be affected by gender age or ethnicity this book focuses on diversity and showcases research from a wide range of authors in the field it considers the similarities and differences between desisting from crime and recovering from addiction taking the desistance and recovery debates in unfamiliar directions it examines the experiences of change for individuals seeking healthier and more successful futures
