Proceedings of the 9th Workshop on Aspects, Components, and Patterns for Infrastructure Software (ACP4IS '10)

2010

aspect oriented programming component models and design patterns are modern and actively evolving techniques for improving the modularization of complex software in particular these techniques hold great promise for the development of systems infrastructure software e g application servers middleware virtual machines compilers operating systems and other software that provides general services for higher level applications the developers of infrastructure software are faced with increasing demands from application programmers needing higher level support for application development meeting these demands requires careful use of software modularization techniques since infrastructural concerns are notoriously hard to modularize aspects components and patterns provide very different means to deal with infrastructure software but despite their differences they have much in common for instance component models try to free the developer from the need to deal directly with services like security or transactions these are primary examples of crosscutting concerns and modularizing such concerns are the main target of aspect oriented languages similarly design patterns like visitor and interceptor facilitate the clean modularization of otherwise tangled concerns building on the acp4is meetings at aosd 2002 2009 this workshop aims to provide a highly interactive forum for researchers and developers to discuss the application of and relationships between aspects components and patterns within modern infrastructure software the goal is to put aspects components and patterns into a common reference frame and to build connections between the software engineering and systems communities

Current and Future Aspects of Nanomedicine

2020-05-06

nanomedicine refers to the use of nanotechnological applications in biomedical fields such as therapeutics diagnostics monitoring visualization tissue engineering and even surgery this book presents recent updates in the nanomedicine market and discusses several aspects of drug delivery and tissue regeneration using different platforms and devices

Aspect, Communicative Appeal, and Temporal Meaning in Biblical Hebrew Verbal Forms

2022-01-20

this book provides a new explanation for what has long been a challenge for scholars of biblical hebrew how to understand the expression of verbal tense and aspect working from a representative text corpus combined with database queries of specific usages and surveys of examples discussed in the scholarly literature ulf bergström gives a comprehensive overview

of the semantic meanings of the verbal forms along with a significant sample of the variation of pragmatically inferred tense aspect or modality tam meanings bergström applies diachronic typology and a redefined concept of aspect to demonstrate that biblical hebrew verbal forms have basic aspectual and derived temporal meanings and that communicative appeal the action triggering function of language affects verbal semantics and promotes the diversification of tense meanings bergström s overarching explanation of the semantic development of the biblical hebrew verbal system is an important contribution to the study of the evolution of the verbal system and meanings of individual verbs in the hebrew bible accessibly written and structured for seminar use bergström s study brings new perspectives to a debate that in many ways had reached a stalemate and it challenges scholars working with tam and the biblical hebrew verb to revisit their theoretical premises advanced students and scholars of biblical hebrew and other semitic languages will find the study thought provoking and linguists will appreciate its contributions to linguistic theory and typology

Interfaces with English Aspect

2006-01-01

the field of verbal aspect has been a focus for the derivation of a multiplicity of theoretical approaches ranging over decades of linguistic research from the point of view of recent studies though there has been relatively little emphasis on the nature of the interaction of aspect with other categories and the ways in which our knowledge of aspect acts as a primary semantic contributor to the creation of other basic verbal parameters such as tense and modality this book aims to cross some of the categorial borders using a collection of studies on the interfaces of english aspect with other grammatical domains the studies in the book have been assembled in order to answer two central issues surrounding the nature of english aspect the possibility of the historical co existence of a perfective and imperfective grammatical distinction in english and the derivation of modality as an inference arising out of specific conflicts and combinations of lexical and grammatical aspect in answering these questions a data driven rather than a theory driven approach is favoured and the general principles of gricean pragmatics and grammaticalisation are applied to a wide range of empirical sources to propose alternative explanations to some long established problems of english historical linguistics and semantics

Tense and Aspects in Discourse

2011-06-01

trends in linguistics is a series of books that open new perspectives in our understanding of language the series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science trends in linguistics considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages it regards linguistic variation in its synchronic and

diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language trends in linguistics publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints high quality standards are ensured through anonymous reviewing

The Grammaticalization of Tense, Aspect, Modality and Evidentiality

2017-09-11

this book brings together a series of contributions to the study of grammaticalization of tense aspect and modality from a functional perspective all contributions share the aim to uncover the functional motivations behind the processes of grammaticalization under discussion but they do so from different points of view

Tense-aspect

1982-01-01

the verbal categories of tense and aspect have been studied traditionally from the point of view of their reference to the timing and time perspective of the speaker's reported experience they are universal categories both in terms of the semantic functional domain they cover as well as in terms of their syntactic and morphological realization nevertheless their treatment in contemporary linguistics is often restricted and narrow based often involving mere recapitulation of traditional semantic and morphotactic studies the present volume arises out of a symposium held at ucla in may 1979 in which a group of linguists gathered to re-open the subject of tense and aspect from a variety of perspectives including in addition to the traditional semantics also discourse pragmatics psycholinguistics child language creolization and diachronic change the languages discussed in this volume include russian turkish english indonesian ameslan eskimo various creoles mandari hebrew bantu and others the emphasis throughout is not only on the description of language specific tense aspect phenomenon but more on the search for universal categories and principles which underlie the cross language variety of tense and aspect in particular many of the participants address themselves to the relationship between propositional semantics and discourse pragmatics in so far as these two functional domains interact within tense aspect systems

The Psychosocial Aspects of a Deadly Epidemic

2016-03-21

edited by a clinical psychologist who has been on the ground helping to develop psychosocial support for ebola survivors in one of the hardest hit regions of west africa this book explains

the devastating emotional aspects of the epidemic and its impact on survivors and the population in west africa families in the diaspora and people in the united states and other countries it also describes lessons learned from past epidemics like hiv aids and sars and valuable approaches to healing from future epidemics while the devastating ebola epidemic has been contained the effects of this outbreak referred to by the world health organization as the most severe acute public health emergency seen in modern times have wreaked a tremendous emotional toll on the populations of west africa as well as on families and survivors worldwide this groundbreaking book covers the psychosocial needs programs and policies related to the ebola epidemic and examines broader lessons of the outbreak such as changes in the ways in which healing from future epidemics can be handled edited by judy kuriansky phd a noted clinical psychologist and united nations ngo representative with extensive experience helping after disasters worldwide and direct experience gained from being on the ground in west africa in the midst of the epidemic this book identifies and explains universal psychological factors at play in all such crises it debunks myths regarding ebola and describes the resulting psychological and social harm caused by the epidemic the chapters cover overarching emotional issues and problems as well as the long term impact on at risk groups such as children women and health workers the impact of emotional issues on social and economic life responses of government officials media and various aid organizations and solutions being offered by groups worldwide including service and humanitarian organizations politicians policymakers and public health education groups

The Transformation of Modernity

2017-10-05

this title was first published in 2001 for over 30 years it has been argued that contemporary society is undergoing a fundamental transformation the portrait of the modern society or modernity offered by philosophers and social scientists from hobbes to parsons is no longer understood as a description of the final and highest stage in the social evolution of mankind modern society is not the end of history but simply another more or less contingent social and cultural formation on planet earth this new perspective on modernity and its transformation which has emerged from the modernist postmodernist debate is the subject matter of this book it is addressed in a multidisciplinary and international way both theoretically and empirically and is explored not only in general and historical terms but also through specific topics such as sexuality identity democracy globalization knowledge and leadership offering an important collaborative contribution to contemporary discourse in sociology social psychology politics and philosophy this book represents a unique effort to come to grips with our obscure and elusive social position at the start of the 21st century

Dr. Jameson's Raid

1896

the field of epilepsy and behavior has grown considerably in the past number of years reflecting advances in the laboratory and clinic behavioral aspects of epilepsy principles and

practice is the definitive text on epilepsy behavioral issues from basic science to clinical applications for all neurologists psychosocial specialists and researchers in the fields of epilepsy neuroscience and psychology psychiatry behavioral aspects of epilepsy include a patient's experiences during seizures his or her reaction during and between seizures the frequency of episodes and what can be determined from the number of seizures with contributions by dozens of leading international experts this is the only book to cover all aspects of this critical emerging science adult and pediatric patients animal models and epilepsy surgery and its effects are all covered in detail behavioral aspects of epilepsy is the only source for up to date information on a topic that has significant and growing interest in the medical community this comprehensive authoritative text has a bench to bedside approach that covers the mechanisms underlying epilepsy and behavior neurophysiologic function neuropsychiatric and behavioral disorders in patients with epilepsy the effects of treatments and surgery on behavior pediatric and adolescent epilepsy disorders associated with epilepsy that impact behavior and much more

Behavioral Aspects of Epilepsy

2007-10-15

this reference book which is the second volume of targeting oxidative stress in cancer explores oxidative stress as the potential therapeutic target for cancer therapy the initial chapters discuss the molecular mechanisms of oxidative stress and its effects on different signaling pathways subsequently the sections examine the impact of redox signaling on tumor cell proliferation and consider the therapeutic potential of dietary phytochemicals and nutraceuticals in reactive oxygen species ros induced cancer in turn it examines the evidence supporting the use of vitamin c in cancer management before presenting various synthetic and natural compounds that have therapeutic implications for oxidative stress induced cancer it also explores the correlation between non coding rna and oxidative stress furthermore the book summarizes the role of stem cells in ros induced cancer therapy and reviews the therapeutic applications of nanoparticles to alter redox haemostasis in cancer cells lastly it explores heat shock proteins ubiquitin ligases and probiotics as potential therapeutic agents in ros mediated cancer this book is a useful resource for basic and translational scientists as well as clinicians interested in the field of oxidative stress and cancer therapy

Handbook of Oxidative Stress in Cancer: Therapeutic Aspects

2022-09-28

this book constitutes the refereed post proceedings of the 15th international symposium on practical aspects of declarative languages padl 2013 held in rome italy in january 2013 co located with popl 2013 the 40th symposium on principles of programming languages the 17 revised papers presented were carefully reviewed and selected from 33 submissions the volume features original work emphasizing new ideas and implementation techniques for all forms of declarative concepts including functional logic and constraints

Practical Aspects of Declarative Languages

2013-11-25

the book puts forth an exciting hypothesis for the typologist its major claim is that languages can generally be regarded as belonging to a tense prominent aspect prominent or mood prominent language type this grouping can be based upon the relative prominence that languages attach to one or the other of the three verbal categories namely tense aspect and mood by grammaticalizing the chosen category to a greater degree than others and by making it more obligatory more systematic and more pervasive than others the grouping however involves a gradation as is indeed the case with other typological groupings with some languages manifesting the relevant characteristic more strikingly than others there are several characteristics that can be correlated with the relative prominence that languages attach to verbal categories for example tense prominent languages tend to have mostly active but not stative verbs they also tend to keep adjectives as a distinct category or group them with nouns but not with verbs verbal forms used for foregrounding generally belong to the most prominent verbal category these and other similar correlations make this typological classification worth pursuing the book also contains a descriptive study of the three verbal categories

The Prominence of Tense, Aspect and Mood

1999-03-15

the Incs journal transactions on aspect oriented software development is devoted to all facets of aspect oriented software development aosd techniques in the context of all phases of the software life cycle from requirements and design to implementation maintenance and evolution the focus of the journal is on approaches for systematic identification modularization representation and composition of crosscutting concerns i e the aspects and evaluation of such approaches and their impact on improving quality attributes of software systems this volume the 10th in the transactions on aspect oriented software development series contains revised extended versions of the top five papers presented at aosd 2012 the topics covered include debugging analysis of software product lines distributed software architectures and empirical study of language support for software evolution

Situations, Tense, and Aspect

1995

this book is an up to date milestone for the studies of temporality and language in particular regarding syntax and semantics tenses aspect and modality are investigated both at the theoretical and at the descriptive levels involving many differe

Transactions on Aspect-Oriented Software Development X

2013-03-02

the series is a platform for contributions of all kinds to this rapidly developing field general problems are studied from the perspective of individual languages language families language groups or language samples conclusions are the result of a deepened study of empirical data special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics

Recent Advances in the Syntax and Semantics of Tense, Aspect and Modality

2007

the book is dedicated to linguistic morphology and it contains a sketch of a complete morphological theory centered around a discussion of fundamental concepts such as morph vs morpheme inflectional category voice grammatical case agreement vs government suppletion relationships between linguistic signs etc the hottest issues in modern linguistics the book introduces rigorous and clear concepts necessary to describe morphological phenomena of natural languages among other things it offers logical calculi of possible grammemes in a given category the presentation is developed in a typological perspective so that linguistic data from a large variety of languages are described and analyzed about 100 typologically very different languages the main method is deductive the concepts proposed in aspects of the theory of morphology are based on a small set of indefinibilia and each concept is defined in terms of these indefinibilia and or other concepts defined previously as a result logical calculi can be constructed similar to mendeleev s periodical table of elements in chemistry then the concept is applied to the actual linguistic data to demonstrate its validity and advantages thus aspects of the theory of morphology combines metalinguistic endeavor a system of concepts for morphology with typological and descriptive orientation it reaches out to all students of language including the border fields and applications

Future Aspects in Contraception

1985-09-30

the first international and interdisciplinary conference on modelling and using context rio de janeiro january 1997 gave rise to the present book which contains a selection of the papers presented there thoroughly refereed and revised the treatment of contexts as bona fide objects of logical formalisation has gained wide acceptance following the seminal impetus given by mccarthy in his turing award address the field of natural language offers a particularly rich variety of examples and challenges to researchers concerned with the formal modelling of

context and several chapters in the volume deal with contextualisation in the setting of natural language others adopt a purely formal logical viewpoint seeking to develop general models of even wider applicability the 12 chapters are organised in three groups formalisation of contextual information in natural language understanding and generation the application of context in mechanised reasoning domains and novel non classical logics for contextual application

Tense and Aspect in the Languages of Europe

2008-08-22

finishing this book was one of the most difficult things i have ever done it took far too long from original idea to page proofs and suffered from being relegated to small corners of my life it was very rarely on the front burner since i started working on this topic in 1991 there has been a lot of interesting work done on the areas of the articulation of vp phrase structure mirroring event structure the use of functional categories to represent aktionsart and many other areas that the research presented here touches on the hardest thing about doing a project of this size is to accept that not everyone s ideas can be addressed and not all new research can be incorporated the only way that i have found it possible to let this book go to press is to reread the preface to events in the semantics of english by terence parsons where he writes the goal of this book is neither completeness nor complete accuracy it is to get some interesting proposals into the public arena for others to criticize develop and build on my aim in this book is to make connections between various accounts of various constructions in various languages at the risk of treating each of these too lightly i am grateful to too many people to thank them individually

Aspects of the Theory of Morphology

2008-08-22

sunscreens are universally recommended by dermatologists not only to prevent the immediate effects of overexposure to sunlight but also to prevent skin cancer while the former goal is immediately evident the latter remains an unproven hypothesis and is a topic of some controversy recent epidemiological studies suggesting a correlation between increased use of sunscreens over the past two decades and the rise in skin cancer have led to the question whether sunscreens applied to skin may be undergoing photoreactions the effects of which are elaborated many years later by addressing the key questions this book advances the field of sunscreen photobiology and provides the reader with an unbiased perspective on this important field

Formal Aspects of Context

2000-07-31

there has been an explosion of research activity related to angiogenesis in recent years and hundreds of laboratories worldwide are actively involved in many aspects of angiogenesis the literature on angiogenesis increases exponentially every year and more than 16 000 peer reviewed articles have been published the past 25 years which are scattered in basic science and clinical journals the complexity of the cascade of events leading to new vessel formation from preexisting ones has challenged scientists in cell biology biochemistry physiology pharmacology molecular biology developmental biology and other fields with their multidisciplinary approach and the powerful new techniques that have been developed the progress in understanding angiogenesis has been impressive indeed only 12 years ago the mention of an angiogenic factor caused skepticism today we have the complete amino acid sequence and their genes cloned for at least 9 angiogenic factors many laboratories are studying their role in angiogenesis and several biotechnology firms have a keen interest in commercial developments relative to these molecules the role of extracellular matrix components in angiogenesis and the interaction of endothelial cells with other cell types such as pericytes smooth muscle cells and inflammatory cells have been studied by other groups this rapid expansion is the result of a realization that in many disease states a common underlying pathology is a derangement in angiogenesis

Publications Relating to Various Aspects of Communism

this latest fifth assessment report of the intergovernmental panel on climate change ipcc will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy

Inner Aspect

2010-09-02

this is an introductory account of social theory and the central role of enlightenment within it tom osborne argues that contemporary social theory can only fail when viewed as a science of society and rather than focusing upon the question of society or even modernity should focus on the question of human nature the most immediate and central topic of such a social theory should be the question of enlightenment however the book departs from traditional accounts locating the vocation of social theory in the system of values established in the original

enlightenment by the french philosophers and others rather it makes a strong argument for the ethical status of enlightenment going on to analyze particular regimes of enlightenment in modernity namely those associated with the social ethics of science expertise intellect and art

Sunscreen Photobiology: Molecular, Cellular and Physiological Aspects

2013-11-11

this ebook is a collection of articles from a frontiers research topic frontiers research topics are very popular trademarks of the frontiers journals series they are collections of at least ten articles all centered on a particular subject with their unique mix of varied contributions from original research to review articles frontiers research topics unify the most influential researchers the latest key findings and historical advances in a hot research area find out more on how to host your own frontiers research topic or contribute to one as an author by contacting the frontiers editorial office frontiersin.org about contact

Molecular, Cellular, and Clinical Aspects of Angiogenesis

2012-12-06

this book aims to figure out the general textile improvements in various sub disciplines of textiles it mainly focuses on the topics that will be much more popular as future expectations technical fabrics smart textiles nanofibers sustainable finishing technologies composites functional textiles sustainability in clothing industry and 3d garment designing are the trending topics for future aspects as all textile product manufacturing stages orientate to current research to create the supply that will respond to changing consumer demands all the chapters contribute to the current literature with innovative aspects we hope this book will shed light on other studies in this field

Climate Change 2014 – Impacts, Adaptation and Vulnerability: Global and Sectoral Aspects

2005-10-05

first published in 1995 part of the library of arabic linguistics series which devotes itself to all issues of arabic linguistics in all its manifestations on both the theoretical and applied levels the results of these studies will also be of use in the field of linguistics in general as well as related subjects this book is monography 11 and looks at modality mood and aspect in spoken arabic with special reference to egypt and the levant

Aspects Of Enlightenment

2020-12-14

this book presents new perspectives on the study of aspect and modality in chinese historical linguistics based on the international workshop on aspect and modality in chinese the book includes the latest research findings in the field to make them available not only to specialists in classical and buddhist chinese but also to researchers and students of general linguistics and of the universals of language it also discusses different aspects of the am aspect modality and the tam tense aspect modality system of chinese it provides a comprehensive overview of both of the universally related systems of aspect and modality the first part of the book focuses on aspectual features of chinese these include basic studies on the syntactic representation of the aspectual structure of the verb phrase in archaic chinese the aspectual function of different object constructions and their development temporal features of the verb phrase and the aspectual functions of nominalization processes the second part includes articles highlighting different aspects of the modal system or the interplay between tense aspect and modality in chinese including a survey on the history of studies on modality in chinese and the modal and temporal aspectual markers indicating future meanings a specialized study on modal deontic verbs in the buddhist vinaya texts the modal function of rhetorical questions in buddhist chinese and a study on the diachronic development of the aspectual and modal system in chinese

Children Listen: Psychological and Linguistic Aspects of Listening Difficulties During Development

2024

no detailed description available for an essay concerning aspect

Textile Insights and Future Aspects

2015

chinese as an aspect language has played an important role in the development of aspect theory this book is a systematic and structured exploration of the linguistic devices that mandarin chinese employs to express aspectual meanings the work presented here is the first corpus based account of aspect in chinese encompassing both situation aspect and viewpoint aspect in using corpus data the book seeks to achieve a marriage between theory driven and corpus based approaches to linguistics the corpus based model presented explores aspect at both the semantic and grammatical levels at the semantic level a two level model of situation aspect is proposed which covers both the lexical and sentential levels thus giving a better account of the compositional nature of situation aspect at the grammatical level four perfective and four imperfective aspects in chinese are explored in detail this exploration corrects many intuition based misconceptions and associated misleading conclusions about aspect in chinese common in the literature

Covenant Renewal and the Consecration of the Gentiles in Romans

2013-07-04

this study seeks to blend the rigorous description of four nigerian languages with theoretical insights four main tasks are involved first constructions involving the interface of morphology and syntax in the four languages are presented with regard to the syntax of substantives and functional categories the morphology of functional heads and the relation between functional heads and the syntactic level of language secondly these constructions are described and analysed within the framework of the principles and parameters theory thirdly those theoretical approaches within the principles and parameters theory that can serve as tools for the analysis of the four languages are refined and modified thereby establishing a version of the theory which may also serve for the morpho syntactic analysis of related languages finally the syntactic model of functional categories is combined with a strictly morpho semantic model of functional categories

Modality, Mood and Aspect in Spoken Arabic

2006

summary this book brings together case study examples in the fields of sustainability sustainable development and education for sustainable development

Aspect, Tense and Modality

2018-12-28

this study discusses functional categories in igbo within noam chomsky s minimalist program mp chapter 1 includes the introduction of the concept of functional categories and why they take central place in the study of syntax as well as an overview of the minimalist program mp chapter 2 discusses some historical antecedents to mp it further discusses the economy principles of the mp as well as the place of functional categories within the overall conceptions of the mp model chapter 3 discusses five functional categories agreement tense aspect negation and determiner in chapter 4 the igbo functional categories within the verbal domain tense aspect and negation are discussed chapter 5 is an application of the theoretical issues raised in chapter 2 to the analysis of the functional categories discussed in chapter 3 one interesting issue discussed in chapter 5 is the role of tone in realising some of the functional categories in igbo chapter 6 discusses the functional categories within the nominal domain with much emphasis on the determiner a revised version of the author s doctoral thesis some of the conclusions are revolutionary relevant to debates in the linguistic theory and in igbo studies in particular as well as serving as an introduction to mp

New Perspectives on Aspect and Modality in Chinese Historical Linguistics

2018-11-05

published in 1999 this book discusses the role that marginality has had in the past has today and will have in the future the commission on dynamics of marginal and critical regions held its annual conference in harare zimbabwe in july 1997 this volume represents a carefully selected revised and reviewed selection of the papers presented at this conference the articles reflect the various aspects of marginality currently existing in the world and it is the intention of the commission to pursue research that would eventually result in a more coherent approach towards the issues of marginality in space the articles in the book are grouped into three main parts the first part discusses the role of theory and also methodological aspects and approaches towards the question of marginality the second part gives a time space perspective by examining the past present and future aspects of marginality the third part is dedicated to empirical evidence about the changes in existing marginality and its possible future implementations the conclusions of the book summarize the various and sometimes conflicting aspects of marginality and its images both in space and in time
