this 240 page workbook is a highly effective no nonsense self marketing instrument to facilitate and manage the entire job

search campaign contained in its pages are all the tools and information necessary to help your terminated employee win and keep their next job whether or not you provide outplacement support to your separated employees our workbook would be an excellent tool to augment their job search it provides a complete resource to help the discharged worker achieve and keep their next position finding a job is hard work it has been estimated that as many as one out of every three workers attempts to change jobs annually in the united states out of a labor force of 153 million that represents almost 50 000 000 job seekers who are seeking new employment each year as a result the job search process is highly competitive at all levels it can be lengthy frustrating prejudicial and unfair older more traditional job finding techniques have become less productive the traditional resume no longer has the same impact in generating the all important and often elusive interview both the wall street journal and usa today have highlighted the fact that only about 15 of all professionals find a new position through responding to published advertisements or online postings another 10 through placement agencies or search firms and only 5 through unsolicited direct mail why then would anyone focus 90 of their time and effort in areas that represent only about 30 of all potential opportunities it is not uncommon for 200 300 people to respond to help wanted advertisements yet seldom do more than 6 to 10 people achieve interviews and after an often lengthy process only one person gets the job everyone else starts the whole process again older americans women and minorities can often face an even more difficult road due to unspoken but ever present biases there is a better way

tomorrow is today dispels the myth that the most qualified candidate always gets the job it points out that the person who is hired is usually the one who is liked the best this book can be a major factor in how you differentiate yourself from other candidates when the hiring decision is almost always based upon subjective factors such as the individual s personality style body language and manner of being interviewed it is an invaluable resource in helping you to achieve your next position with added features that assist in effectively managing both career growth and family issues

moving away from criminal behaviour can be fraught with difficulties often it can involve leaving behind old habits customs and even friends while at the same time adopting a new way of life how do individuals go about making a decision to give up crime how do they plan to sustain this decision and in what ways does probation help this book explores these questions based on in depth interviews with a group of men under probation supervision sam king investigates the factors associated with making a decision to desist from crime the book examines strategies for desistance and explores the factors that individuals consider when they are thinking about how they will desist in doing so the book sheds new light on existing understandings of desistance from crime and helps to develop our understandings of the role that individuals play in

constructing their own desistance journeys this book also highlights the role of probation in this process offering a timely and critical review of the nature of probation under the new labour government in the uk between 1997 2010 the findings indicate that we should allow probation officers greater autonomy and discretion within their roles and that we should free them from the bureaucracy of risk assessment and targets moreover the book warns against the potential fragmentation of community supervision as such the book will be of interest to criminology students researchers academics policymakers and practitioners particularly those who work with ex offenders in the community

teacher learning doesn't end with initial preparation many insights and skills remain to be added this book is concerned with ongoing teacher learning its goals part i and pathways part ii it is based on a longitudinal study of 42 teachers 20 over their first 8 years of teaching and 22 over their first 5 years the areas of continued teacher learning identified in our study were vision of teaching program planning assessment relevance subject content and pedagogy classroom organization and community inclusion and professional identity the pathways of learning included informal and formal pd teacher inquiry and school based learning a key finding of our research was that over the years teachers learn a great deal informally however they do so largely on their own and under considerable stress teachers need more support than they currently receive both for survival and to enhance their informal learning teachers can benefit significantly from external input but their

everyday learning makes them key experts in teaching accordingly pd providers should work with teachers utilizing their existing knowledge this book is written for consideration by teachers student teachers teacher educators pd providers policy developers and others interested in facilitating teacher learning some of us have been writing somewhat desperately on these ideas for years beck and kosnik have given us strong evidence that the ideas are effective in practice i hope this persuasive and beautifully written book will be widely read nel noddings lee jacks professor of education emerita stanford university this book makes a powerful case for taking teachers professional development seriously it brings us the voices of beginning teachers as they deepen their professional knowledge over time and makes clear the depth of commitment they bring to the job professor gemma moss institute of education university of london
