gripping collection which offers for the first time a chronological overview of the popular contemporary sub genre of body horror from edgar allan poe to christopher fowler with contributions from leading horror writers including stephen king george langelaan and neil gaiman the collection includes the stories behind seminal body horror movies john carpenter s the thing david cronenberg s the fly and stuart gordon s re animator 25 chilling short stories by outstanding female writers women have always written exceptional stories of horror and the supernatural this anthology aims to showcase the very best of these from amelia b edwards s the phantom coach published in 1864 through past luminaries such as edith wharton and mary elizabeth braddon to modern talents including muriel gray sarah pinborough and lilith saintcrow from tales of ghostly children to visitations by departed loved ones and from heart rending stories to the profoundly unsettling depiction of extreme malevolence what each of these stories has in common is the effect of a slight chilling of the skin a feeling of something not quite present but nevertheless there if anything this showcase anthology proves that sometimes the female of the species can also be the most terrifying from vampires and demons to ghosts and zombies interest in monsters in literature film and popular culture has never been stronger this concise encyclopedia provides scholars and students with a comprehensive and authoritative a z of monsters throughout the ages it is the first major reference book on monsters for the scholarly market over 200 entries written by experts in the field are accompanied by an overview introduction by the editor generic entries such as ghost and vampire are cross listed with important specific manifestations of that monster in addition to monsters appearing in english language literature and film the encyclopedia also includes significant monsters in spanish french italian german russian indian chinese japanese african and middle eastern traditions alphabetically organized the entries each feature suggestions for further reading the ashgate encyclopedia of literary and cinematic monsters is an invaluable resource for all students and scholars and an essential addition to library reference shelves this two volume set offers comprehensive coverage of horror literature that spans its deep history dominant themes significant works and major authors such as stephen king edgar allan poe and anne rice as well as lesser known horror writers many of today s horror story fans who appreciate horror through movies television video games graphic novels and other forms probably don t realize that horror literature is not only one of the most popular types of literature but one of the oldest people have always been mesmerized by stories that speak to their deepest fears horror literature through history shows 21st century horror fans the literary sources of their favorite entertainment and the rich intrinsic value of horror literature in its own right through profiles of major authors critical analyses of important works and overview essays focused on horror during particular periods as well as on related issues such as religion apocalypticism social criticism and gender readers will discover the fascinating early roots and evolution of horror writings as well as the reciprocal influence of horror literature and horror cinema this unique two volume reference set provides wide coverage that is current and compelling to modern readers who are of course also eager consumers of entertainment in the first section overview essays on horror during different historical periods situate works of horror literature within the social cultural historical and intellectual currents of their respective eras creating a seamless narrative of the genre s evolution from ancient times to the present the second section demonstrates how otherwise unrelated works of horror have influenced each other how horror subgenres have evolved and how a broad range of topics within horror such as ghosts vampires religion and gender roles have been handled across time the set also provides alphabetically arranged reference entries on authors works and specialized topics that enable readers to zero in on information and concepts presented in the other sections sometimes the truth can be much scarier than fiction and this collection is no exception uncover what fascinated and frightened some of our favorite horror writers of all time who are the people who make our hearts race and our minds spin why are they so good at making us fear what goes bump in the night what are the stories behind the writers who give us goosebumps dark hearts is a collection of fourteen short biographies of the world s best known horror writers including mary shelley shirley jackson neil gaiman r l stine stephen king bram stoker and others their stories are gathered in this beautiful gift able book that is perfect for any horror fan in this sequel to film horror and the body fantastic badley examines horror fiction as a fantastic genre in which images of the body and the self are articulated and modified badley places horror fiction in its cultural context drawing important connections to theories of gender and sexuality as our culture places increasing importance on body image horror fiction has provided a language for imagining the self in new ways often as ungendered transformed or re generated focusing on the works of stephen king clive barker and anne rice badley approaches horror as a discourse that articulates the anxieties of our culture theories of the domestic stemming from the 19th century have focused on the home as a refuge and place of repose for the family a nurturing environment for children and a safe place for visitors under this conception domestic space is positioned as nurturing and private a refuge and place of retreat which gave rise to theories of home as haven while arguably some social conditions might suggest this is the case domesticity under siege exposes a different world one in which the boundaries of nurturing domesticity collide with both outside and inside agents whether these agents are external military forces psychological trauma or familial violence they re position meta narratives of domesticity not through identity politics or specialized subgroup experience but relative to the actions of the world around an inhabited domain that is when home is constituted as a private realm a place where individuals or groups can reside in safety and comfort it is argued as a place in which the individual exercises control or power however there are many occasions when forces act upon the home and threaten aspects of safety and comfort often through such things as ruination violence mortality and infestation organised around four thematic sections microbes animals and insects human agents wars and disasters as agents and hauntings eeriness and the uncanny chapters provide a range of approaches to the home which challenge notions of haven and reflect major causes that have played an important role in undermining the modern home examples and case studies explore the domestic screen hoarding hauntings violence and imprisonment in the home wartime interior art the hanover merzbau and wolfgang staudte s 1946 film die mörder sind unter uns the murderers are among us                                                                                                                            answers to these questions people often look to religion

but religion is not the only place seekers turn myths legends and other stories have given us alternative ways to address the fundamental quandaries of existence horror stories in particular with their focus on questions of violence and mortality speak urgently to the primal fears embedded in such existential mysteries with more than fifty novels to his name and hundreds of millions of copies sold few writers have spent more time contemplating those fears than stephen king yet despite being one of the most widely read authors of all time king is woefully understudied america's dark theologian is the first in depth investigation into how king treats religion in his horror fiction considering works such as *Carrie* *The Dead Zone* *Misery* *The Shining* and many more douglas cowan explores the religious imagery themes characters and most importantly questions that haunt stephen king's horror stories religion and its trappings are found throughout king's fiction but what cowan reveals is a writer skeptical of the certainty of religious belief describing himself as a fallen away methodist king is less concerned with providing answers to our questions than constantly challenging both those who claim to have answers and the answers they proclaim whether he is pondering the existence of other worlds exploring the origins of religious belief and how it is passed on probing the nature of the religious experience or contemplating the existence of god king invites us to question everything we think we know the world's greatest detective meets horror's most notorious villains late 1895 and sherlock holmes and his faithful companion dr john watson are called upon to investigate a missing person's case on the face of it this seems like a mystery that holmes might relish as the person in question vanished from a locked room but this is just the start of an investigation that will draw the pair into contact with a shadowy organisation talked about in whispers known only as the order of the gash as more people go missing in a similar fashion the clues point to a sinister asylum in france and to the underworld of london however it is an altogether different underworld that holmes will soon discover as he comes face to face not only with those followers who do the order's bidding on earth but those who serve it in hell the cenobites holmes most outlandish adventure to date one that has remained shrouded in secrecy until now launches him headlong into clive barker's famous hellraising universe and things will never be the same again with an introduction by hellraiser ii actress barbie wilde in sharp contrast to many 1960s science fiction films with idealized views of space exploration ridley scott's *Alien* 1979 terrified audiences depicting a harrowing and doomed deep space mission the alien films launched a new generation of horror set in the great unknown inspiring filmmakers to take earth bound franchises like *Leprechaun* and *Friday the 13th* into space this collection of new essays examines the space horror subgenre with a focus on such films as paul w s anderson's *Event Horizon* duncan jones' *Moon* mario bava's *Planet of the Vampires* and john carpenter's *Ghosts of Mars* contributors discuss how filmmakers explored the concepts of the final girl survivor the uncanny valley the isolationism of space travel religion and supernatural phenomena this volume explores the complex horizon of landscapes in horror film culture to better understand the use that the genre makes of settings locations spaces and places be they physical imagined or altogether imaginary in the philosophy of horror noël carroll discusses the geography of horror as often situating the filmic genre in liminal spaces as a means to displace the narrative away from commonly accepted social structures this use of space is meant to trigger the audience's innate fear of the unknown this notion recalls freud's theorization of the uncanny as it is centered on recognizable locations outside of the lacanian symbolic order in some instances a location may act as one of the describing characteristics of evil itself in a nightmare on elm street teenagers fall asleep only to be dragged from their bedrooms into freddy krueger's labyrinthine lair an inescapable boiler room that enhances freddie's powers and makes him invincible in other scenarios the action may take place in a distant little known country to isolate characters roth's *Hostel* films or as a way to mythicize the very origin of evil bava's *Black Sunday* finally anxieties related to the encroaching presence of technology in our lives may give rise to postmodern narratives of loneliness and disconnect at the crossing between virtual and real places in kurosawa's *Pulse* the internet acts as a gateway between the living and spirit worlds creating an oneiric realm where the living vanish and ghosts move to replace them this suggestive topic begs to be further investigated this volume represents a crucial addition to the scholarship on horror film culture by adopting a transnational comparative approach to the analysis of formal and narrative concerns specific to the genre by considering some of the most popular titles in horror film culture alongside lesser known works for which this anthology represents the first piece of relevant scholarship why at a time when the majority of us no longer believe in ghosts demons or the occult does gothic continue to have such a strong grasp upon literature cinema and popular culture this book answers this question through exploring some of the ways in which we have applied gothic tropes to our everyday fears the book opens with the turn of the screw a text dealing in the dangers adults pose to children while simultaneously questioning the assumed innocence of all children as our culture becomes increasingly anxious about child safety the uncanny surfaces in the popular imagination in the form of the paedophile or the child murderer at the same time the gothic has always brought danger home and another key focus of the book lies in the various manifestations undertaken by the haunted house during the twentieth century from the bombed out spaces of the blitz the demon lover and the night watch to the designer bathrooms of wealthy american suburbia what lies beneath gothic monsters can also be terror monsters and after a discussion of terrorism and atrocity in relation to *Burial Alive* the book examines the relationship between the human and the inhuman through the role of the beast monster as manifestation of the evil that resides in our midst the hound of the baskervilles and the birds it is with the dangers of the body that the gothic has been most closely associated and during the later twentieth century paranoia attaches itself to skeletal forms and ghosts in the wake of the hiv aids crisis sexuality and as disease is one of the themes of patrick mcgrath's work *Dr Haggard's Disease* and the angel and the issue of skeletons in the closet is also explored through henry james's *The Jolly Corner* however sexuality is also one of the most liberating aspects of gothic narratives after a brief discussion of camp humour in the british television drama series *Jekyll* the book concludes with a discussion of the apparitional lesbian through the work of sarah waters the encyclopedia of the gothic well written and interesting it is a testament to the breadth and depth of knowledge about its central subject among the more this volume explores the complex horizon of landscapes in horror film culture to better understand the use that the genre makes of settings locations spaces and places be they physical imagined or altogether imaginary in the philosophy of horror noël carroll discusses the geography of horror as often situating the filmic genre in liminal spaces as a means to displace the narrative away from commonly accepted social structures this use of space is meant to trigger the audience s innate fear of the unknown this notion recalls freud s theorization of the uncanny as it is centered on recognizable locations outside of the lacanian symbolic order in some instances a location may act as one of the describing characteristics of evil itself in a nightmare on elm street teenagers fall asleep only to be dragged from their bedrooms into freddy krueger s labyrinthine lair an inescapable boiler room that enhances freddie s powers and makes him invincible in other scenarios the action may take place in a distant little known country to isolate characters roth s hostel films or as a way to mythicize the very origin of evil bava s black sunday finally anxieties related to the encroaching presence of technology in our lives may give rise to postmodern narratives of loneliness and disconnect at the crossing between virtual and real places in kurosawa s pulse the internet acts as a gateway between the living and spirit worlds creating an oneiric realm where the living vanish and ghosts move to replace them this suggestive topic begs to be further investigated this volume represents a crucial addition to the scholarship on horror film culture by adopting a transnational comparative approach to the analysis of formal and narrative concerns specific to the genre by considering some of the most popular titles in horror film culture alongside lesser known works for which this anthology represents the first piece of relevant scholarship

why at a time when the majority of us no longer believe in ghosts demons or the occult does gothic continue to have such a strong grasp upon literature cinema and popular culture this book answers this question through exploring some of the ways in which we have applied gothic tropes to our everyday fears the book opens with the turn of the screw a text dealing in the dangers adults pose to children while simultaneously questioning the assumed innocence of all children as our culture becomes increasingly anxious about child safety the uncanny surfaces in the popular imagination in the form of the paedophile or the child murderer at the same time the gothic has always brought danger home and another key focus of the book lies in the various manifestations undertaken by the haunted house during the twentieth century from the bombed out spaces of the blitz the demon lover and the night watch to the designer bathrooms of wealthy american suburbia what lies beneath gothic monsters can also be terror monsters and after a discussion of terrorism and atrocity in relation to burial alive the book examines the relationship between the human and the inhuman through the role of the beast monster as manifestation of the evil that resides in our midst the hound of the baskervilles and the birds it is with the dangers of the body that the gothic has been most closely associated and during the later twentieth century paranoia attaches itself to skeletal forms and ghosts in the wake of the hiv aids crisis sexuality and as disease is one of the themes of patrick mcgrath s work dr haggard s disease and the angel and the issue of skeletons in the closet is also explored through henry james s the jolly corner however sexuality is also one of the most liberating aspects of gothic narratives after a brief discussion of camp humour in the british television drama series jekyll the book concludes with a discussion of the apparitional lesbian through the work of sarah waters
