

Reading free New light on vernacular architecture .pdf

Vernacular architecture also folk architecture is building done outside any academic tradition and without professional guidance it is not a particular architectural movement or style but rather a broad category encompassing a wide range of building types and styles. Vernacular architecture is the academic journal of the vernacular architecture group global in its approach the journal welcomes papers that use the detailed study of traditional buildings to explore the societies cultures and environments that shape them. Vernacular architecture can be defined as a type of local or regional construction using traditional materials and resources from the area where the building is located. Vernacular architecture common domestic architecture of a region usually far simpler than what the technology of the time is capable of maintaining in highly industrialized countries such as the u s for example barns are still being built according to a design employed in europe in the 1st millennium bc. Vernacular architecture adheres to basic green architectural principles of energy efficiency and utilizing materials and resources in close proximity to the site these structures. The main attributes that characterize vernacular architecture are i the use of local materials ii a planimetric design adapted to the climatic and topographical conditions iii the use of construction techniques and aesthetic resources transmitted and readapted over time and iv the active participation of users and local craftsmen in the building process. From the mud houses of the dogons in mali to the dry stone constructions of italy s cinque terre region both unesco world heritage sites from finnish wooden mökki to troglodyte houses vernacular architecture is everywhere. Vernacular architecture studies emphasize the connections between the built environment and the people who interact with it reflecting on the two way nature of those relationships people sometimes known by name and sometimes anonymous plan and erect buildings but physical spaces also influence how groups live and work. Vernacular architecture is a testimony to sustainable and contextually responsive layouts from rural communities to city neighborhoods vernacular architecture is a living past that shapes how we construct our built environments today it is critical to admire and conserve it so that future generations might benefit.
