The Patient and the Analyst 1973 the hidden selves that masud khan reveals to us in this third volume of his psychoanalytic writings are to be understood in two ways primarily they are those aspects of the self which are inherent in but unsuspected by the individual concerned and which need to be identified if that individual is to achieve a full and healthy self awareness more broadly they are the ingredients of human nature which may not be evident on the surface but which can be brought out through literature or art for example or through the insights gained in psychoanalysis in analysis and over a period of time both analyst and patient discover parts of their personality that were unknown to each other at the start the person is not just a single self but a collage of hidden selves and one of the goals of psychoanalysis is to find out how this collage functions for the individual concerned whether through symptomatology or through introspection
