Dawn and Sunset 2015-01-26 includes pictures includes a bibliography for further reading people associate the story of ancient jericho with walls and for those who are biblically inclined they think of the walls that god brought tumbling down to the sound of trumpets for historians who are more archaeologically oriented it may suggest the prehistoric walls uncovered by ernst sellin and carl watzinger between 1907 and 1911 to modern societies walls suggest the division between people and defenses erected out of hatred and mistrust however while the story of jericho does indeed involve walls they represented something far different than that more than anything else ancient jericho was a point of convergence between cultures kingdoms religions and societies the reality of that ancient city possibly the oldest city in human history was nothing like the story presented in the bible jericho the history and legacy of one of the world s oldest cities examines the knowns and unknowns about the ancient city along with its long history over nearly 12 000 years along with pictures depicting important people places and events you will learn about jericho like never before

after the kingship descended from heaven the kingship was in eridu excerpt from the opening paragraph of the sumerian king list emerging from the desert flats of southern iraq can be seen the remains of a large mound approximately 1750 feet x 1750 feet in size surrounded by several smaller mounds known today as tell abu shahrain or in the ancient world as eridu this site contains some of best examples of the ubaid culture and it was one of the first urban centers of civilization in southern mesopotamia if not the first itself many famous stories came from the mythical landscapes of iraq s deep south in the literature of ancient sumer eridu was regarded as the primordial city the first urban center believed to have existed long before the great mythical flood that wiped out human culture in the book of genesis and other earlier traditions it was to places like this that western explorers first came in the 19th century searching for the origins of the lands which the bible described as the cradle of the human race in doing so they discovered that eridu was also a real place the astonishing site is located about 8 miles southwest of the sumerian city of ur and when it was first excavated in the mid 19th century western archaeologists were confused as to how a city as large as this could have existed in such a vast and waterless desert but eridu is positioned on the edge of the great alluvial plain of sumer a wild and beautiful marshland where the tigris and the euphrates meet this was the biblical garden of eden an ancient landscape that was renowned for its fertility in the past to many westerners iraq s history and culture were a blank before 1991 but ironically as war engulfed the region it helped underscore the importance and influence of the area on western civilization it was here in the ferocious landscape of south iraq old sumer that the first laws science and cities came into being eridu is a place of extraordinary significance for the study of the earliest stages of civilization in history and it is one of the best examples of cultural continuity in mesopotamia from the earliest prehistoric stages in which settlements emerged to the later historic periods eridu had a special status not as the residence of a ruling dynasty of kings but for its religious significance a series of temples were built there devoted to the patron god of the city enki each one was built upon the ruins of its predecessor and each one represents the architectural religious and social changes that occurred at the site throughout its history eridu the history and legacy of the oldest city in ancient mesopotamia examines the tumultuous history of one of the most important cities of antiquity along with pictures depicting important people places and events you will learn about eridu like never before

**The Oldest City in the World** 1918 includes pictures includes accounts of the city includes online resources and a bibliography for further reading the city of kandahar dates back to the middle of the first millennium bce originally as a persian town on the edge of the great registan desert in southeastern afghanistan that was reestablished and repopulated by alexander the great in the 4th century bce the ancient site of kandahar developed on a rocky ridge some 3 kilometers to the west of the present day city of the same name which was founded in the 18th century kandahar was strategically located on the trade routes connecting india and the middle east and for this reason it was the target of many conquerors throughout the ages the city has been in the hands of persians greeks arabs from the 7th century turks 10th century mongols 12th century and indians 16th century later it was conquered by the safavid persians and the ghilji a tribe instrumental in the emergence of the modern state of afghanistan nonetheless as one writer put it the arab muslim armies that arrived in the 7th century were following the routes used previously by persian and greek invaders but none of these empires or the nearly 20 empires and dynasties that came late found afghanistan easy to conquer and control the afghan peoples though internally divided tend to unite in fierce opposition to outsiders the old city of kandahar was abandoned following its near total destruction in 1738 but a few years later a new city was founded a few kilometers to the east at the location of present day kandahar between 1748 and 1773 this was the capital of the new kingdom of afghanistan subsequently the city was temporarily conquered by british troops during the anglo afghan wars and has been the site of considerable fighting and destruction during the ongoing conflicts in the region almost half of kandahar s history is interlinked with the rise and dominance of islam in southeastern afghanistan indeed there is a bias towards the islamic period in the city s narrative because of two factors the near total destruction of the city s pre islamic archaeological remains in 1738 and the lack of excavation and interpretation of excavated materials in the modern period due in part to the ongoing conflicts that the country faces however on a broader scale the story of kandahar is one of great cultural political and religious fusion throughout antiquity and the modern period this region has been closely linked to the processes of cultural and mercantile exchanges between the neighboring regions of the east north and west kandahar encountered diverse collection of religions because of its position on the frontiers between india the middle east and the silk road one of the earliest religious systems of the region was zoroastrianism and the worship of ahura mazda which continued to persist in the region up to the 10th and 11th centuries ce with the conquests of alexander the great the region encountered the greek pantheon of deities around the time of the mauryan dynasty buddhism extended from india into afghanistan islam arrived to the region in the 7th century ce and for a period of time gautama and muhammad were venerated equally by the population of kandahar kandahar the history and legacy of one of afghanistan s oldest cities looks at the remarkable city and its impact on the region along with pictures depicting important people places and events you will learn about kandahar like never before

**Quebec: As it was, and as it is** 2021-11-04 two irrefutable truths are the starting point of a journey in which tomás morales embarks us through an incontrovertible investigative logic through an extensive and necessary stretch of historical analysis that leads us to discover the roots characteristics and universal socioeconomic conditions that end up leading to populism and the methods it uses for its implantation and perpetuation regardless of the historical period morales has gone further he always goes further and does not settle for characters that perhaps reach the category of a footnote in a history book but points directly to the famous jesus of nazareth proving that he is a myth commissioned whose construction was a carbon copy of the quirky buddha mahāyāna and considering him the hero of the most successful populist plot in history deconstructing the myth of jesus of nazareth is the title chosen to pull the thread that will confront with the truth 2 350 million christians 1 350 million muslims 520 million buddhists that is a total of 4 220 million believers or that is people who believe it and the institutions that manipulate them deconstructing the myth of jesus of nazareth is a mandatory reading that

warns of the risks of faith for those who consider themselves believers and therefore unsuspecting collaborators of populist organizations whose legitimacy is based on history defined as a literary genre of fiction a collection of stories written on request and that taking it seriously refers to the infantile postures necessary to achieve being indoctrinated and enlisted and those are big words happy journey
