this workbook is designed for use with the text agricultural mechanics and technology systems the chapters in the workbook correspond to those in the text and should be completed after reading the appropriate text chapter each chapter of the workbook contains reviews of the textbook chapters to enhance your understanding of textbook content the various types of questions include matching true or false multiple choice fill in the blank and short answer reading agricultural mechanics and technology systems and using this workbook will help you acquire a working knowledge of the basic principles of agricultural technology systems as well as develop your leadership and work skills answering the

questions for each chapter will help you master the technical knowledge presented in the text the workbook chapters also contain activities related to textbook chapter content the activities range from chapter content reinforcement to real world application including design projects related to different agricultural disciplines it is important in these activities to understand any safety procedures set forth by your teacher
