Multiple Choice Questions in Human Physiology

1977

this book contains over 3000 multiple choice questions which relate physiological knowledge to the clinical environment the questions demand an integrative approach across related subjects including pharmacology therapeutics biochemistry and pathophysiology hematology and immunology full answers are given to aid self directed learning which is increasingly important in the changing curricula

Multiple Choice Questions in Basic and Clinical Physiology

1996

this is a comprehensive physiology text covering all major topics and employing multiple choice questions like those on the medical exams this work is unique in that it provides a full background to each subject and clear explanatory text for each set of mcqs material covers principles of physiology and major organ systems and their interactions contains many clinical illustrations
