2010

in living buddhism julia cassaniti explores buddhist ideas of impermanence nonattachment and intention as they are translated into everyday practice in contemporary thailand although most lay people find these philosophical concepts difficult to grasp cassaniti shows that people do in fact make an effort to comprehend them and integrate them as guides for their everyday lives in doing so she makes a convincing case that complex philosophical concepts are not the sole property of religious specialists and that ordinary lay buddhists find in them a means for dealing with life s difficulties more broadly the book speaks to the ways that culturally informed ideas are part of the psychological processes that we all use to make sense of the world around us in an approachable first person narrative style that combines interview and participant observation material gathered over the course of two years in the community cassaniti shows how buddhist ideas are understood interrelated and reinforced through secular and religious practices in everyday life she compares the emotional experiences of buddhist villagers with religious and cultural practices in a nearby christian village living buddhism highlights the importance of change calmness as captured in the thai phrase jai yen or a cool heart and karma cassaniti s narrative untangles the thai villagers feelings and problems and the solutions they seek

under the dictatorships of the twentieth century music never ceased to sound even when they did not impose aesthetic standards these regimes tended to favour certain kinds of art music such as occasional works for commemorations or celebrations symphonic poems cantatas and choral settings in the same way composers who were more or less ideologically close to the regime wrote pieces of music on their own initiative which amounted to a support of the political order this book presents ten studies focusing on music inspired and promoted by regimes such as nazi germany fascist italy france under vichy the ussr and its satellites franco s spain salazar s portugal maoist china and latin american dictatorships by discussing the musical works themselves whether they were conceived as ways to provide music for the people to personally honour the

dictator or to participate in state commemorations of glorious historical events the book examines the relationship between the composers and the state this important volume therefore addresses theoretical issues long neglected by both musicologists and historians what is the relationship between art music and propaganda how did composers participate in musical life under the control of an authoritarian state what was specifically political in the works produced in these contexts how did audiences react to them can we speak confidently about state music in this way composing for the state music in twentieth century dictatorships is an essential contribution to our understanding of musical cultures of the twentieth century as well as the symbolic policies of dictatorial regimes

does competitive process constitute an autonomous societal value or is it a means for achieving more meritorious goals welfare growth integration and innovation the hypothesis of the normative foundations of european competition law is that the

former is the case this insightful book analyses the phenomenon of competition from philosophical legal and economic perspectives demonstrating exactly why competitive process should not be viewed only as an instrument it consolidates various normative theories of freedom market and competition and explains how exactly they can be operationalized effectively in the matrix of the eu competition policy
