handy for practising clinical haematologists medical graduates and postgraduates and students preparing  
for competitive medical exams this book presents fundamental concepts and technologies to tackle  
interoperability between information systems it details interoperability at the data service and process level  
and combines theoretical foundations with hands on presentation of technologies to enable the  
development of sound and practical integration chapter 1 details general interoperability challenges and  
describes the structure of the book to start with chapter 2 presents technologies for the exchange of data  
between two selected and highly relevant data formats i e relational databases and xml next chapter 3  
explains concepts for schema matching and mapping and data integration as well as the technological  
basis for implementing them based on query and transformation languages like xpath and xslt chapter 4  
then turns to service interoperability and explains two related technologies rest and graphql in detail in  
chapter 5 fundamentals for designing process orchestrations at the conceptual level are presented  
focusing on how to model process orchestrations and how to verify their correctness and soundness and  
showing bpmn as the de facto modeling standard chapter 6 then details the concepts and languages for  
the implementation of process orchestrations including the presentation of execution languages for  
process orchestrations that are equipped with a formal semantics e g workflow nets the refined process  
structure tree and cpee trees subsequently chapter 7 focuses on the growing number of distributed  
loosely coupled and often non interoperable applications through the concepts of enterprise application  
integration and explains these by an implementation in cpn tools and by two case studies eventually  
chapter 8 is lifting the orchestration and integration concepts and technologies to the choreography level  
by dealing with the interoperability between different process orchestrations chapter 9 concludes the book  
by featuring success factors for interoperability projects it also provides a range of open research

mainly intended as a textbook to be used for developing and teaching courses on interoperability and  
integration to this end it is accompanied by a site with additional teaching materials it also spans a bridge  
from researchers to graduate students and practitioners by providing a deep understanding on practical  
interoperability challenges and solutions the focus here is put on de facto standards and open source  
systems and tools to enable interoperability solutions at low cost
