The Living and the Dead 2016-10-18

the living and the dead examines the boundaries between the worlds of life and death the text draws upon philosophy ethnography literature and natural science to suggest that life and death are best understood not in opposition but as continuous tendencies acting upon one another austin locke argues that the failure to give nuanced consideration to the connections between the living and nonliving devalues both life and death in doing so he suggests that our ability to respond to the challenges of environmental degradation technological advancement and the dominance of economic logic depend in part on more fluid understandings of the relationship between life and death

though many of us do not like to think about it death is a fact of life with which all of us at one time or another will have to come to terms in the middle ages and into the seventeenth century death was such a prominent event in everyone s lives that people took to practicing what they called the art of dying well as a way of life but for the people of today with our greatly extended life expectancies it often takes a public tragedy like that of the widely televised explosion of the challenger and the loss of seven lives to bring home to us the reality of death and the immediacy with which it can touch our lives why they re away the purpose of death by ellert l anderson attempts to view death from another perspective than that of the purely personal to see it in effect from the perspective of the race as a whole in it he discusses his own personal loss of his mother the apparent waste of very young lives what seem to be accidental deaths violent deaths such as murder suicide and mass tragedies and lingering deaths due to disease in each case he finds these deaths have not been totally in vain but seem to have a beneficial effect that outweighs the purely personal loss for each of us who have sustained some personal loss or who have been merely spectators of other public losses why they re away the purpose of death gives us a fresh outlook on death and the meaning it has in our lives no death the author maintains occurs without some purpose being served

dying from the earliest christian times to the present day a truly landmark study the hour of our death reveals a pattern of gradually developing evolutionary stages in our perceptions of life in relation to death each stage representing a virtual redefinition of human nature starting at the very foundations of western culture the eminent historian phillipe ariès shows how from graeco roman times through the first ten centuries of the common era death was too common to be frightening each life was quietly subordinated to the community which paid its respects and then moved on ariès identifies the first major shift in attitude with the turn of the eleventh century when a sense of individuality began to rise and with it profound consequences death no longer meant merely the weakening of community but rather the destruction of self hence the growing fear of the afterlife new conceptions of the last judgment and the first attempts by masses and other rituals to guarantee a better life in the next world in the 1500s attention shifted from the demise of the self to that of the loved one as family supplants community and by the nineteenth century death comes to be viewed as simply a staging post toward reunion in the hereafter finally ariès shows why death has become such an unendurable truth in our own century how it has been nearly banished from our daily lives and points out what may be done to re tame this secret terror the richness of ariès s source material and investigative work is breathtaking while exploring everything from churches religious rituals and graveyards with their often macabre headstones and monuments to wills and testaments love letters literature paintings diaries town plans crime and sanitation reports and grave robbing complaints ariès ranges across europe to russia on the one hand and to england and america on the other as he sorts out the tangled mysteries of our accumulated terrors and beliefs we come to understand the history indeed the pathology of our intellectual and psychological tensions in the face of death
