Encyclopedia of Library and Information Science

1968

the international encyclopedia of information and library science was published to widespread acclaim in 1996 and has become the major reference work in the field this eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the encyclopedia was originally conceived with nearly 600 entries written by a global team of over 150 contributors the subject matter ranges from mobile library services

provided by camel and donkey transport to search engines portals and the world wide the new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries conceptual entries explore and explicate all the major issues theories and activities in information and library science such as the economics of information and information management a wholly new entry on information systems and enhanced entries on the information professions and the information society are key features of this new edition topical entries deal with more specific subjects such as collections management and information services for ethnic minorities new or completely revised entries include a group of entries on information law and a collection of entries on the internet and the world wide
