why do men tend to keep love letters in files along with their other correspondence whereas women keep them with their clothes and if a letter is written but not posted at whom is it really directed as psychoanalyst darian leader shows such questions go to the heart of sexual desire which is never addressed to our flesh and blood companion but always to something beyond him or her in an engaging at times startling enquiry into the fundamental loneliness of each sex leader asks why relationships frequently run aground on the trivial question what are you thinking if a man chooses as his partner a woman unlike his mother why does he try to make her behave towards him exactly as his mother did when he was a boy and why might a woman decide not to spend the night with a man after one glimpse of his apartment

Why do women write more letters than they post?
