November 2022 - Surplus Record Machinery & Equipment Directory 2022-11-01

surplus record is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 95 000 industrial assets including metalworking and fabricating machine tools chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more over 1 100 businesses list with the surplus record november 2022 issue vol 99 no 11

Moving to Alternative Refrigerants 1993

with the widespread availability of high speed high capacity microprocessors and microcomputers with high speed communication ability and sophisticated energy analytics software the technology to support deployment of automated diagnostics is now available and the opportunity to apply automated fault detection and diagnostics to every system and piece of equipment in a facility as well as for whole buildings is imminent the purpose of this book is to share information with a broad audience on the state of automated fault detection and diagnostics for buildings applications the benefits of those applications emerging diagnostic technology examples of field deployments the relationship to codes and standards automated diagnostic tools presently available guidance on how to use automated diagnostics and related issues

"Legionnaires' Disease" 1977

surplus record is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 95 000 industrial assets including metalworking and fabricating machine tools chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more over 1 100 businesses list with the surplus record march 2022 issue vol 99 no 3

Automated Diagnostics and Analytics for Buildings 2021-01-07

active solar systems is volume 6 in a series that surveys advances in solar energy research since the oil shock of the early 1970s books in the series document in particular the period 1973 to 1985 which spawned a rich array of federally financed technological programs and developments facilitating the practical use of solar energy the twenty two contributions in active solar systems introduce design analysis and control methods for active systems and cover advances in the interconnected technologies for water heating space heating and space cooling they show that with effective marketing and with environmental costs factored into individual consumer decisions there is strong potential for solar water heating and space heating and that solar cooling has potential but needs further development to become commercially viable the details of the materials involved in these technologies are covered in volume 5 solar collectors energy storage and materials

March 2022 - Surplus Record Machinery & Equipment Directory 2022-03-01

surplus record is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 100 000 industrial assets including metalworking and fabricating machine tools chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more over 1 100 businesses list with the surplus record october 2022 issue vol 99 no 10

Active Solar Systems 1993

surplus record is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 95 000 industrial assets including metalworking and fabricating machine tools chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more over 1 100 businesses list with the surplus record may 2022 issue vol 99 no 5

October 2022 - Surplus Record Machinery & Equipment Directory 2022-10-01

hvac water chillers and cooling towers fundamentals application and operation second edition explores the major improvements in recent years to many chiller and cooling tower components that have resulted in improved performance and lower operating costs this new edition looks at how climate change and green designs have significantly impacted the selection of refrigerants and the application of chilled water systems it also discusses the expanded use of digital controls and variable frequency drives as well as the re introduction of some older technologies especially ammonia based absorption cooling the first half of the book focuses on water chillers and the second half addresses cooling towers in both sections the author includes the following material fundamentals basic information about systems and equipment including how they and their various components work design and application equipment sizing selection and application details of piping control and water treatment and special considerations such as noise control electrical service fire protection

and energy efficiency operations and maintenance commissioning and programmed maintenance of components and systems with guidelines and recommended specifications for procurement this up to date book provides hvac designers building owners operating and maintenance staff architects and mechanical contractors with definitive and practical guidance on the application design purchase operation and maintenance of water chillers and cooling towers it offers helpful information for you to use on a daily basis including checklists and troubleshooting guidelines

May 2022 - Surplus Record Machinery & Equipment Directory 2022-05-01

for more than half a century this book has been a fixture in architecture and construction firms the world over twice awarded the aia s citation for excellence in international architecture book publishing mechanical and electrical equipment for buildings is recognized for its comprehensiveness clarity of presentation and timely coverage of new design trends and technologies addressing mechanical and electrical systems for buildings of all sizes it provides design guidelines and detailed design procedures for each topic covered thoroughly updated to cover the latest technologies new and emerging design trends and relevant codes this latest edition features more than 2 200 illustrations 200 new to this edition and a companion website with additional resources

HVAC Water Chillers and Cooling Towers 2011-11-16

surplus record is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 95 000 industrial assets including metalworking and fabricating machine tools chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more over 1 100 businesses list with the surplus record september 2022 issue vol 99 no 9

Proceedings of Annual Solar Heating and Cooling Research and Development Branch Contractors' Meeting 1979

this book constitutes the refereed proceedings of the third international conference on rough sets and current trends in computing rsctc 2002 held in malvern pa usa in october 2002 the 76 revised regular papers and short communications presented together with 2 keynotes and 5 plenary papers were carefully reviewed and selected from more than 100 submissions the book offers topical sections on foundation and methods granular and neural computing probabilistic reasoning data mining machine learning and pattern recognition mining and applications

Proceedings of 3rd Annual Solar Heating and Cooling Research and Development Branch Contractors' Meeting, September 24-27, 1978, Washington, D.C.

1979

this text presents the interactions from an international conference organized by the fluid machinery group of the imeche the papers provide an up to date resume of compressors refrigeration energy efficiency lubrication and sealing oils and novel machines

Solar Energy Update 1980

code compliant building materials and equipment will typically have a lower initial cost however the lifetime energy savings of the high efficiency equipment will often justify the upfront cost premium and result in a more cost effective solution energy savings calculations for commercial building energy efficiency upgrades assists energy professionals contractors building owners and managers in developing energy savings estimates that can facilitate a quick assessment of the potential energy savings that might be realized when replacing existing building components with the highest efficiency equipment it also provides algorithms to estimate greenhouse gas emission reductions that may be achieved by building energy efficiency upgrades and the impact these upgrades can have on building electrification decarbonization projects this book focuses on the development of energy savings estimates based upon a whole building s energy consumption and the energy consumption associated with building end uses such as space heating space cooling ventilation lighting and so forth includes over 70 illustrative examples using algorithms to demonstrate how energy savings and greenhouse gas emission reductions may be estimated utilizing different strategies and equipment

Hospital Care for Eligible Veterans in South Alabama 1985

over the past 20 years energy conservation imperatives the use of computer based design aids and major advances in intelligent management systems for buildings have transformed the design and operation of comfort systems for buildings the rules of thumb used by designers in the 1970s are no longer viable today building systems engineers must

Provision of Health Care to Eligible Veterans Residing in the Panhandle of Western Florida 1985

air conditioning in modern american architecture 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic in doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s joseph m siry shows how the incorporation of mechanical systems into modernism s discourse of functionality profoundly shaped the work of some of the movement s leading architects such as dankmar adler louis sullivan frank lloyd wright ludwig mies van der rohe gordon bunshaft and louis kahn for them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting bridging the history of technology and the history of architecture siry discusses air conditioning s technical and social history and provides case studies of buildings by the master architects who brought this technology into the

conceptual and formal project of modernism a monumental work by a renowned expert in american modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens it will be especially valuable to scholars and students of architecture modernism the history of technology and american history

Building Operating Management 1997-07

this 3e edited by peter m martin pnnl 2005 inventor of the year is an extensive update of the many improvements in deposition technologies mechanisms and applications this long awaited revision includes updated and new chapters on atomic layer deposition cathodic arc deposition sculpted thin films polymer thin films and emerging technologies extensive material was added throughout the book especially in the areas concerned with plasma assisted vapor deposition processes and metallurgical coating applications

The Pre-printed Papers of the Second Solar Heating and Cooling Demonstration Program Contractors' Review, Hotel Del Coronado, San Diego, California, December 13-15, 1978 1978

surplus record is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 110 000 industrial assets since 1924 including metalworking and fabricating machine tools lathes cnc equipment machine centers woodworking equipment food equipment chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more over 1 100 businesses list with the surplus record may 2023 issue vol 100 no 5

Revised proceedings of the Department of Energy's solar update 1978

many of the economic road blocks which have previously served to discourage the implementation of alternative power generation technologies can now be readily overcome through effective energy resource optimization it is now a fact that solid financial returns can be achieved from combined heating cooling and power generation projects by integrating energy and cost efficiency goals and seeking a match between power production and heating cooling requirements this book is intended to serve as a road map to those seeking to realize optimum economic returns on such projects the first section provides an introduction to basic heat and power thermodynamics with an overview of heat and power generation technologies and equipment the second section explores the infrastructure in which the project must be implemented including environmental considerations as well as utility rate structures the third section provides detailed coverage of a broad range of technology types and discusses how opportunities for their application can be identified and successfully exploited the final section takes you through each step of project development implementation and operation numerous examples are provided of actual field applications with supporting documentation of system layouts and performance the text is supplemented with more than one thousand graphics including photos cutaway drawings layout schematics performance curves and data tables
