this book provides the first comprehensive compilation of cutting edge research on merapi volcano on the island of java indonesia one of the most iconic volcanoes in the world it integrates results from both the natural geology petrology geochemistry geophysics physical volcanology and social sciences and provides state of the art information on volcano monitoring the assessment of volcanic hazards and risk mitigation measures as one of indonesia s most active and dangerous volcanoes merapi is perhaps best known for its pyroclastic density currents which are produced by gravitational or explosive lava dome failures commonly referred to as merapi type nuées ardentes merapi s eruptions have posed a persistent threat to life property and infrastructure within the densely populated areas on the volcano s flanks as demonstrated most recently by catastrophic eruptions which attracted worldwide media interest this book presents an interdisciplinary study of lake cuejdel one of the youngest natural dam lakes in romania even though the overall study has a strong geographical approach it also includes limnological and hydrological studies the lake was formed in two phases initially a small lake appeared in 1978 and then in 1991 a major landslide occurred that blocked the cuejdel brook and a larger lake was formed the book covers various topics including the lacustrine basin the geological setting analyses of the physical chemical parameters water dynamics flora and fauna and lake management this book is of interest for those working in freshwater science and ecology physical geography hydrology and limnology this book brings together contributions from experts in water management scientists researchers academics and lecturers sharing experiences and successes in this field it is devoted to a wide range of water resources management issues including water quality to water quantity considering all impacts of water issues in the environment the book presents international approaches to the latest developments in both the fundamental bases and the applicability of state of the art knowledge that can be effectively used for solving a variety of large problems in integrated water resources management the main focus of the book is on water pollution physical chemical biological and geographical pollution hydrology problems and limnology tasks the red lake is a natural barrier lake at the foot of the hasmasu mare mountains in the eastern carpathian range in romania it was formed when the bicaz river was blocked by a natural dam resulting from two landslides during an extreme heavy storm in 1837 this book presents an interdisciplinary and comprehensive study on the physical chemical geographical and ecological aspects of red lake lacu rosu the first three chapters cover the formation and geological setting and its relationship with the bicaz gorges haghimas national park subsequent chapters present the sedimentological morphological and hydrological evolution of this unique natural laboratory and climatological setting the final chapters deal with ecological aspects of red lake waters and adjacent ecosystems such as wetlands and water resource management issues testi italiano inglese la normativa antisismica ha visto nel tempo graduali affinamenti legati sia all evoluzione degli studi scientifici in materia sia ai tragici eventi che con continuità hanno interessato recentemente il nostro paese fino a divenire parte integrante delle norme tecniche per le costruzioni ma per le peculiari esigenze del nostro straordinario patrimonio culturale queste non possono coincidere con quelle riferite all edilizia di più recente o nuova costruzione per risolvere tali criticità con le linee guida per la valutazione e riduzione del rischio sismico del patrimonio culturale predisposte dal mibact è stata definita una metodologia che partendo da un approfondita conoscenza del manufatto permetta di correlare le valutazioni qualitative proprie di un intervento su un bene storico di interesse culturale ai parametri quantitativi tecnici dell ingegneria strutturale definendo un giudizio di vulnerabilità che tenga conto sia delle esigenze di conservazione della struttura sia della sicurezza degli occupanti la valutazione del rischio sismico effettuata sulla galleria dell accademia di firenze ne è un qualificato esempio applicativo ponendo una particolare attenzione oltre al contenitore anche all esigenza di conservare in sicurezza il suo mirabile contenuto storico artistico

who the rapid development of new methods for immunological data collection from multicolor flow cytometry through single cell imaging to deep sequencing presents us now for the first time with the ability to analyze and compare large amounts of immunological data in health aging and disease the exponential growth of these datasets however challenges the theoretical immunology community to develop methods for data organization and analysis furthermore the need to test hypotheses regarding

immune function and generate predictions regarding the outcomes of medical interventions necessitates the development of mathematical and computational models covering processes on multiple scales from the genetic and molecular to the cellular and system scales the last few decades have seen the development of methods for presentation and analysis of clonal repertoires those of t and b lymphocytes and phenotypic surface marker based repertoires of all lymphocyte types and for modeling the intricate network of molecular and cellular interactions within the immune systems this e book which has first appeared as a frontiers in immunology research topic provides a comprehensive online open access snapshot of the current state of the art on immune system modeling and analysis

Merapi Volcano

2023-02-02

this book provides the first comprehensive compilation of cutting edge research on merapi volcano on the island of java indonesia one of the most iconic volcanoes in the world it integrates results from both the natural geology petrology geochemistry geophysics physical volcanology and social sciences and provides state of the art information on volcano monitoring the assessment of volcanic hazards and risk mitigation measures as one of indonesia s most active and dangerous volcanoes merapi is perhaps best known for its pyroclastic density currents which are produced by gravitational or explosive lava dome failures commonly referred to as merapi type nuées ardentes merapi s eruptions have posed a persistent threat to life property and infrastructure within the densely populated areas on the volcano s flanks as demonstrated most recently by catastrophic eruptions which attracted worldwide media interest

Natural Dam Lake Cuejdel in the Stânişoarei Mountains, Eastern Carpathians

2018-03-27

this book presents an interdisciplinary study of lake cuejdel one of the youngest natural dam lakes in romania even though the overall study has a strong geographical approach it also includes limnological and hydrological studies the lake was formed in two phases initially a small lake appeared in 1978 and then in 1991 a major landslide occurred that blocked the cuejdel brook and a larger lake was formed the book covers various topics including the lacustrine basin the geological setting analyses of the physical chemical parameters water dynamics flora and fauna and lake management this book is of interest for those working in freshwater science and ecology physical geography hydrology and limnology

Water Management and the Environment: Case Studies

2018-04-24

this book brings together contributions from experts in water management scientists researchers academics and lecturers sharing experiences and successes in this field it is devoted to a wide range of water resources management issues including water quality to water quantity considering all impacts of water issues in the environment the book presents international approaches to the latest developments in both the fundamental bases and the applicability of state of the art knowledge that can be effectively used for solving a variety of large problems in integrated water resources management the main focus of the book is on water pollution physical chemical biological and geographical pollution hydrology problems and limnology tasks

Limnology of the Red Lake, Romania

2013-05-23

the red lake is a natural barrier lake at the foot of the hasmasu mare mountains in the eastern carpathian range in romania it was formed when the bicaz river was blocked by a natural dam resulting from two landslides during an extreme heavy storm in 1837 this book presents an interdisciplinary and comprehensive study on the physical chemical geographical and ecological aspects of red lake lacu rosu the first

three chapters cover the formation and geological setting and its relationship with the bicaz gorges haghimas national park subsequent chapters present the sedimentological morphological and hydrological evolution of this unique natural laboratory and climatological setting the final chapters deal with ecological aspects of red lake waters and adjacent ecosystems such as wetlands and water resource management issues

La valutazione del rischio sismico nel complesso della Galleria dell'Accademia di Firenze

2018-02-12

testi italiano inglese la normativa antisismica ha visto nel tempo gradualmente affinamenti legati sia all'evoluzione degli studi scientifici in materia sia ai tragici eventi che con continuità hanno interessato recentemente il nostro paese fino a divenire parte integrante delle norme tecniche per le costruzioni ma per le peculiari esigenze del nostro straordinario patrimonio culturale queste non possono coincidere con quelle riferite all'edilizia di più recente o nuova costruzione per risolvere tali criticità con le linee guida per la valutazione e riduzione del rischio sismico del patrimonio culturale predisposte dal MIBACT è stata definita una metodologia che partendo da un'approfondita conoscenza del manufatto permetta di correlare le valutazioni qualitative proprie di un intervento su un bene storico di interesse culturale ai parametri quantitativi tecnici dell'ingegneria strutturale definendo un giudizio di vulnerabilità che tenga conto sia delle esigenze di conservazione della struttura sia della sicurezza degli occupanti la valutazione del rischio sismico effettuata sulla Galleria dell'Accademia di Firenze ne è un qualificato esempio applicativo ponendo una particolare attenzione oltre al contenitore anche all'esigenza di conservare in sicurezza il suo mirabile contenuto storico artistico
