this book sheds new light on the dynamics of the colonial encounter between britain and india it highlights how various analytical approaches to this encounter can be creatively mobilised to rethink entanglements of memory and identity emerging from british rule in the subcontinent this volume reevaluates central long standing debates about the historical impact of the british raj by deviating from hegemonic and top down civilizational perspectives it focuses on interactions relations and underlying meanings of the colonial experience the narratives of memory identity and the legacy of the colonial encounter are woven together in a diverse range of essays on subjects such as colonial and nationalist memorials british eurasian dalit and adivasi identities regional political configurations and state initiatives and patterns of control by drawing on empirically rich regional and chronological historical studies this book will be essential reading for students and researchers of history political science colonial studies cultural studies and south asian studies

Untouchable Pasts

1998-03-19

untouchable pasts constructs a history of an untouchable and heretical community over the last two hundred years the satnamis of central india have combined the features of a caste and a sect to question and challenge the tenor of ritual power that variously defines hinduism at the same time within the community schemes of meaning and power particularly those centering on gender have been imbued with ambiguity and a reproduction of forms of inequality the book presents an interpretive account of satnami endeavors encounters and experiences by combining history and anthropology archival and field work it addresses a clutch of theoretical questions and a range of key and inextricably bound analytical relationships in an accessible manner issues of caste and untouchability sect and kinship myths and pasts are rendered here as part of a wider dynamic between religion and power gender and community writing and the constitution of traditions ritual and the making of modernities and orality and the construction of histories indeed untouchable pasts brings together the perspectives and possibilities defined by three overlapping but distinct theoretical developments that have been elaborated in recent years first novel renderings of anthropologies and ethnographies of the historical imagination second critically engaged constructions of histories from below particularly by the collective subaltern studies endeavor and finally a conceptual emphasis on the everyday as an arena for the production negotiation transaction and contestations of meanings within wider networks and relationships of power by casting these analytical tendencies in a critical dialogue with one another untouchable pasts works toward questioning some of those overarching oppositions for example between ritual and rationality myth and history tradition and modernity and community and state that have formed the conceptual core of several inherited traditions of social and political theory within the academy in both western and non western contexts

Hagiography and Religious Truth

the hagiographic materials from the world s religions can tell us much about the beliefs and practices of the people yet the limited degree to which hagiography has been used as an instrument for understanding diverse religious traditions is surprising hagiography and religious truth provides a clearer understanding of the ways hagiography functions to disclose truth for practitioners and suggests various ways that these underexploited sources enrich our comprehension of broader issues in religious studies this volume provides a much needed cross cultural and interreligious comparison of saints lives iconography and devotional practices the contributors show that hagiographic sources can in fact be truths of manifestation which function as vehicles for prefiguring configuring and refiguring religious social and cultural life the editors argue that some meanings simply cannot be communicated effectively through historical critical methodologies by exploring how hagiography functions throughout several of the world s religious traditions this volume illustrates how various modes of hagiography articulate religious ideas and uniquely represent conceptions of sanctity

possessing the city is a social history of the property market in late colonial delhi a period of much turbulence and transformation it argues that historians of south asian cities must connect transformations in urban space with the economy of the city using new archival material anishvanaik outlines the place of private property development in delhi s economy from 1911 to 1947 rather than large scale state initiatives like the delhi improvement trust it was profit oriented decentralised and market based initiatives of urban construction that created the delhi cityscape this volume also serves to chart the emerging relationship between the state and urban space in this period rather than a narrow focus on urban planning ideas it argues that the relationship be thought of in a triangular fashion the intermediation of the property market was crucial to emerging statecraft and urban form in this period possessing the city examines struggles and conflicts over the commodification of land particularly disputes over rents and prices of urban property the question of commodification can also however be discerned in struggles that were not ostensibly about economic issues clashes over religious sites in the city through careful attention to the historical interrelationships between state space and the economy in delhi this volume offers a novel intervention in the history of late colonial delhi

an engrossing and definitive narrative account of history and myth that offers a new way of understanding one of the world s oldest major religions the hindus elucidates the relationship between recorded history and imaginary worlds hinduism does not lend itself easily to a strictly chronological account many of its central texts cannot be reliably dated even within a century its central tenets karma dharma to name just two arise at particular moments in indian history and differ in each era between genders and caste to caste and what is shared among hindus is overwhelmingly outnumbered by the things that are unique to one group or another yet the greatness of hinduism its vitality its earthiness its vividness lies precisely in many of those idiosyncratic qualities that continue to inspire debate today wendy doniger is one of the foremost scholars of hinduism in the world with her inimitable insight and expertise doniger illuminates those moments within the tradition that resist forces that would standardize or establish a canon without reversing or misrepresenting the historical hierarchies she reveals how sanskrit and vernacular sources are rich in knowledge of and compassion toward women and lower castes how they debate tensions surrounding religion violence and tolerance and how animals are the key to important shifts in attitudes toward different social classes the hindus brings a fascinating multiplicity of actors and stories to the stage to show how brilliant and creative thinkers many of them far removed from brahmin authors of sanskrit texts have kept hinduism alive in ways that other scholars have not fully explored in this unique and authoritative account debates about hindu traditions become platforms from which to consider the ironies and overlooked epiphanies of history

historically religious scriptures are defined as holy texts that are considered to be beyond the abilities of the layperson to interpret their content is most frequently analyzed by clerics who do not question the underlying political or social implications of the text but use the writing to convey messages to their congregations about how to live a holy existence in western society moreover what counts as scripture is generally confined to the judeo christian bible leaving the voices of minorities as well as the holy texts of faiths from africa and asia for example unheard in this innovative collection of essays that aims to turn the traditional bible study definition of scriptures on its head vincent l wimbush leads an in depth look at the social cultural and racial meanings invested in these texts contributors hail from a wide array of academic fields and geographic locations and include such noted academics as susan harding elisabeth shüssler fiorenza and william l andrews purposefully transgressing disciplinary boundaries this ambitious

book opens the door to different interpretations and critical orientations and in doing so allows an ultimately humanist definition of scriptures to emerge
