essays on subjects ranging from archaeological ethnicity to native perspectives on archaeology and features several texts on the st lawrence iroquoians a subject dear to pendergast s heart the past in the present deals with the complexities in the operation and management of living heritage sites it presents a new interpretation of such sites based on the concept of continuity and its evolution to the present it is demonstrated that the current theoretical framework and practice of conservation as best epitomised in a values based approach and the world heritage concept is based on discontinuity created between the monuments considered to belong to the past and the people of the present thus seemingly unable to embrace living heritage sites from this position the study suggests an innovative approach that views communities and sites as an inseparable entity a living heritage approach this approach brings a new insight into key concepts such as authenticity and sustainable development through the use of the monastic site of meteora greece as a case study the discussion generated aims to shift the focus of conservation from preservation towards a continual process of creation in an ongoing present attempting to change the way heritage is perceived protected and more importantly further created the past in the present is an important and much needed contribution to the debate about living heritage and it is particularly significant in the context of the heritage of the past in the modern world anyone concerned with how the past is or should
