Merchant Vessels of the United States...

2004

in considering the long trajectory of human societies researchers have too often favored models of despotic control by the few or structural models that fail to grant agency to those with less power in shaping history recent scholarship demonstrates such models to be not only limiting but also empirically inaccurate this element reviews archaeological approaches to collective action drawing on theoretical perspectives from across the globe and case studies from prehispanic mesoamerica it highlights how institutions and systems of governance matter vary over space and time and can oscillate between more pluralistic and more autocratic forms within the same society culture or polity the historical coverage examines resource dilemmas and ways of mediating them how ritual and religion can foster both social solidarity and hierarchy the political financing of institutions and variability in forms of governance and lessons drawn to inform the building of more resilient communities in the present

Changemaker Handbook

2005-02

open access edition doi 10 6069 9780295748733 dominica a place once described as nature s island was rich in biodiversity and seemingly abundant water but in the eighteenth century a brief failed attempt by colonial administrators to replace cultivation of varied plant species with sugarcane caused widespread ecological and social disruption illustrating how deeply intertwined plantation slavery was with the environmental devastation it caused mapping water in dominica situates the social lives of eighteenth century enslaved laborers in the natural history of two dominican enclaves mark hauser draws on archaeological and archival history from dominica to reconstruct the changing ways that enslaved people interacted with water and exposes crucial pieces of

dominica s colonial history that have been omitted from official documents the archaeological record which preserves traces of slave households waterways boiling houses mills and vessels for storing water reveals changes in political authority and in how social relations were mediated through the environment plantation monoculture which depended on both slavery and an abundant supply of water worked through the environment to create predicaments around scarcity mobility and belonging whose resolution was a matter of life and death in following the vestiges of these struggles this investigation documents a valuable example of an environmental challenge centered around insufficient water mapping water in dominica is available in an open access edition through the sustainable history monograph pilot thanks to the generous support of the andrew w mellon foundation and northwestern university libraries
