2014-04-28 in recent years scholars have understood the increasing use of the st george's cross by football fans to be

evidence of a rise in a specifically english identity this has emerged as part of a wider national response to broader political processes such as devolution and european integration which have fragmented identities within the uk using the controversial figurational sociological approach advocated by the twentieth century theorist norbert elias this book challenges such a view drawing on ethnographic research amongst fans to explore the precise nature of the relationship between contemporary english national identity and football fan culture examining football fans expressions of englishness in public houses and online spaces the author discusses the effects of globalization european integration and uk devolution on english society revealing that the use of the st george s cross does not signal the emergence of a specifically english national consciousness but in fact masks a more complex multi layered process of national identity construction a detailed and grounded study of identity nationalism and globalization amongst football fans english national identity and football fan culture will appeal to scholars and students of politics sociology and anthropology with interests in ethnography the sociology of sport fan cultures globalization and contemporary national identities

Contemporary Developments in Entrepreneurial Finance 2010-07-15 editors foreword the fundamental changes currently taking place in the national and international science landscapes can no longer be overlooked within those changes reforms do not go as

planned but as is always the case with processes of rationalisation have a series of unintended effects at the same time it becomes increasingly clear who in this process are the winners and who are the losers although this is still subject to fluctuation and change this can be illustrated by two examples from current events where the range of taught courses is concerned as part of the Bologna process the new structuring of student study paths and their organisation is aimed at unifying the European area of science to ensure a study that is equally permissive and efficient however it is to be deplored that the mobility of students has become more restricted because of an increasing specialisation in the available study paths also bachelor degrees do not meet with the anticipated high response from the labour market in all countries so that the master's degree is becoming more or less a must while at the same time the number of study places on master's courses is limited instead of the intended reduction in the duration of study time in comparison to the previous German Magister and Diplom rather a prolongation in the duration of studies has been recorded
