focusing on gender and the family this erudite and innovative history reconsiders the origins of egyptian nationalism and the revolution of 1919 by linking social changes in class and household structure to the politics of engagement with british colonial rule lisa pollard deftly argues that the egyptian state s modernizing projects in the nineteenth century reinforced ideals of monogamy and bourgeois domesticity among egypt s elite classes and connected those ideals with political and economic success at the same time the british used domestic and personal practices such as polygamy the harem and the veiling of women to claim that the ruling classes had become corrupt and therefore to legitimize an open ended tenure for themselves in egypt to rid themselves of british rule bourgeois egyptian nationalists constructed a familial political culture that trained new generations of nationalists and used them to demonstrate to the british that it was time for the occupation to end that culture was put to use in the 1919 egyptian revolution in which the reformed bourgeois family was exhibited as the standard for modern egypt as we aspire for rising economic prosperity and a strong and confident india this book forcefully reminds us of the values that make for a truly sustainable society at the heart of which is the family for it is not economic growth or military strength alone that will make india strong sustainable success comes from values and these can sustain a society and a nation even in times of hardship the book expresses an ideal by which indian society may prosper and speaks of how spirituality can help create a noble nation and a better world it provides a valuable counterpoint to the modern day emphasis on consumerism and the philosophy of more is better increasing accusations of irrelevance to a secular age and a steep and steady decline in commitment among successive generations from the 1960s on despite this catholic schools have multiplied and grown in popularity and educational achievement the book sets out a programme for the contribution of catholic schools to the future of the church covering such topics as the religious education heuer examines the meaning of citizenship during and after the revolution and the relationship between citizenship and gender as these ideas and practices were reworked in the late 1790s and early nineteenth century heuer argues that tensions between family and nation shaped men s and women s legal and social identities from the revolution and terror through the restoration she shows the critical importance of relating nationality to political citizenship and of examining the application not just the creation of new categories of membership in the nation heuer draws on diverse historical sources from political treatises to police records immigration reports to court cases to demonstrate the extent of revolutionary concern over national citizenship this book casts into relief france s evolving attitudes toward patriotism immigration and emigration and the frequently opposing demands of family ties and citizenship how american colonists laid the foundations of american capitalism with an economy built on credit even before the united states became a country laws prioritizing access to credit set colonial america apart from the rest of the world credit nation examines how the drive to expand credit shaped property laws and legal institutions in the colonial and founding eras of the republic in this major new history of early america claire priest describes how the british parliament departed from the customary ways that english law

protected land and inheritance enacting laws for the colonies that privileged creditors by defining land and slaves as commodities available to satisfy debts colonial governments in turn created local legal institutions that enabled people to further leverage their assets to obtain credit priest shows how loans backed with slaves as property fueled slavery from the colonial era through the civil war and that increased access to credit was key to the explosive growth of capitalism in nineteenth century america credit nation presents a new vision of american economic history one where credit markets and liquidity were prioritized from the outset where property rights and slaves became commodities for creditors claims and where legal institutions played a critical role in the stamp act the world today each of them harbors an historical grievance dating back half a century or more which limits its full or effective sovereignty china seeks to recover taiwan taiwan presses for de jure recognition of its de facto autonomy neither of the two koreas is satisfied to remain separated from the other indefinitely and japan is divided over constitutional limits on the sovereign right to wage war each of these historical grievances is structured into the politics of the region and into its international relations they are also embedded in popular memories that periodically spark pride shame and resentment whether over a rocky outcrop a history textbook or an alleged us intervention on a sensitive issue of national sovereignty everyday struggles for dignity and equality the military families when soldiers are deployed overseas focusing on the support given to military personnel and families before during and after missions today s postmodern armies are expected to provide social psychological support both to their personnel in military operations abroad and to their families at home since the end of the cold war and even more so after 9 11 separations between
