Problem Solving Strategies 2020-11 solving complex problems and selling their solutions is critical for personal and organizational success for most of us however it doesn t come naturally and we haven t been taught how to do it well research shows a host of pitfalls trips us up when we try we re quick to believe we understand a situation and jump to a flawed solution we seek to confirm our hypotheses and ignore conflicting evidence we view challenges incompletely through the frameworks we know instead of with a fresh pair of eyes and when we communicate our recommendations we forget our reasoning isn t obvious to our audience how can we do it better in cracked it seasoned

strategy professors and consultants bernard garrette corey phelps and olivier sibony present a rigorous and practical four step approach to overcome these pitfalls building on tried and tested but rarely revealed methods of top strategy consultants research in cognitive psychology and the latest advances in design thinking they provide a step by step process and toolkit that will help readers tackle any challenging business problem using compelling stories and detailed case examples the authors guide readers through each step in the process from how to state structure and then solve problems to how to sell the solutions written in an engaging style by a trio of experts with decades of experience researching teaching and consulting on complex business problems this book will be an indispensable manual for anyone interested in creating value by helping their organizations crack the problems that matter most

The Essential Problem Solver 1999-07-01 whatever their discipline engineers are routinely called upon to develop solutions to all kinds of problems to do so effectively they need a systematic and disciplined approach that considers a range of alternatives taking into account all relevant factors before selecting the best solution in problem solving for engineers david carmichael demonstrates just such an approach involving problem definition generation of alternative solutions and ultimately the analysis and selection of a preferred solution david carmichael introduces the fundamental concepts needed to think systematically and undertake methodical problem solving he argues that the most rational way to develop a framework for problem solving is by using a systems studies viewpoint he then outlines systems methodology modeling and the various configurations for analysis synthesis and investigation building on this the book details a systematic process for problem solving and demonstrates how problem solving and decision making lie within a systems synthesis configuration carefully designed as a self learning resource the book contains exercises throughout

that reinforce the material and encourage readers to think and apply the concepts it covers decision making in the presence of uncertainty and multiple criteria including that involving sustainability with its blend of economic social and environmental considerations it also characterizes and tackles the specific problem solving of management planning and design the book provides for the first time a rational framework for problem solving with an engineering orientation

The Art and Craft of Problem Solving 1999 in recognizing the limitations of traditional problem solving methods solution focus has aided many individuals in changing their perception of problems and transforming them into solutions regardless of what difficulties one may be tackling this book offers practical skills for overcoming filled with examples and illustrations it addresses and explains the role of the all important "miracle" questions as well as "exceptions" "escalating" and "coping" questions to help identify leverage points for change active listening a key solution focus skill is reviewed extensively in addition readers will learn how to establish well formed goals and understand the truth of the philosophical statement "if it isn't broke don't fix it" solution focus "radical simplicity" diverts your attention away from the often frustrating search for the causes of problems and directs it to solutions away from your weaknesses to your strengths away from what is going wrong to what is going right in your life though it may not be a fix all it will certainly give you a viable alternative to outdated problem solving strategies and teaches how to put solution focused knowledge into everyday practical use if you want to learn a new way of assisting yourself or others to deal more creatively and effectively with problems then you are encouraged to explore solution focus "simple principles and tools for positive change"

Problem Solving in Chemical Engineering with Numerical Methods 2006 cb insights study suggests that 42 of startups fail because they do not identify the right need in other words there is no need for

the startup or product in the first place the issue here is the lack of tools used to generate the ideas and validate those bottom line this issue is about a structured approach to idea generation and problem solving do you know that most people engaged in collective problem solving spend a lot of their valuable time in meetings discussing ideas which they think eventually do not add value to product or startup harvard business review survey suggests that 71 of managers feel that meetings do not help accomplish much as they do not have specific templates and exercises to guide specific outcomes with engagement from participants the solution book is going to help you in experimenting with ideas effectively by providing you steps on how to create a framework for coming up with new ideas and products considering a variety of views develop teamwork and collaboration keeping you better focused on your results and outcomes the solution book consists of 101 easy to follow techniques on problem solving and ideation startup innovation and venture failures are expensive and justified only by lack of tools and data for analysis the book caters to all stages in your lifecycle as a creative thinker and problem solver with tools to optimize your resources go beyond conventional solutions and experiment with divergent out of the box thinking thanks to elina kallas a researcher on entrepreneurship education with european commission and in entrepreneurship at harvard university and vidyangi patil an interdisciplinary professional of biomedical engineering with an extensive startup and research experience
