government how croats and slovenes were roused in their first nationalistic struggle how mazzini set up his ideal republic rome our nation began with the simple phrase we the people but who were and are we who were we in 1776 in 1865 or 1968 and is there any continuity in character between the we of those years and the nearly 300 million people living in the radically different america of today with made in america claude s fischer draws on decades of historical psychological and social research to answer that question by tracking the evolution of american character and culture over three centuries he explodes myths such as that contemporary americans are more mobile and less religious than their ancestors or that they are more focused on money and consumption and reveals instead how greater security and wealth have only reinforced the independence egalitarianism and commitment to community that characterized our people from the earliest years skillfully drawing on personal stories of representative americans fischer shows that affluence and social progress have allowed more people to participate fully in cultural and political life thus broadening the category of american yet at the same time what it means to be an american has retained surprising continuity with much earlier notions of american

character firmly in the vein of such classics as the lonely crowd and habits of the heart yet challenging many of their conclusions made in america takes readers beyond the simplicity of headlines and leading questions raised for social history by the women s movement this essay has grown out of an attempt to find the answers to problems basically inherent in the making of historical re search widespread among humanists is a vagueness of con cepts which many times makes it difficult or impossible to translate

our way of thinking into the terms of natural science or vice versa it sounds sometimes as if humanistic studies were a world of its own rather than a part of the natural world we all live in how long can we go on believing that there are different kinds of knowledge to this conflict of theory another is added a feeling of urgency about cultural problems that are too often left to the future to solve history is not as some natural scientists tend to believe a matter of no practical consequence it is a virulent factor in political and social conflicts and a basic substance in the structure of our personalities the present dynamic epoch raises with particular stress the problem of understanding the conditioning influence which the past exercises upon the present in each particular community such a substance is neither a toy for pastime hobbies nor an innocent weapon in the hands of dictators which is then the responsibility of the historian both for what he does and for what he abstains from doing the necessity to stay independent in order to approach objectivity makes for no easy answer sociaal filosofische studie this thoroughly readable and stimulating social history of western academic historians many of them women developed a new breed of social history after the first world war identified as the history of everyday life the history of everyday life was a pedagogical construct based on the perceived educational needs of the new mass democracy that emerged after 1918 it was popularized to ordinary people in educational settings through books in classrooms and museums and on bbc radio after tracing its development and dissemination between the 1920s and the 1960s this book argues that history of everyday life declined in the 1970s not because academics invented an alternative new social history but because bottom up social change rendered this form of popular social history untenable in the changing context of mass education histories of everyday life ultimately uses the subject of history to demonstrate how profoundly the advent of mass education shaped popular culture in britain after 1918 arguing that we should see the twentieth century as britain s educational century cultural and social history is a new journal committed to furthering the dialogue between social and cultural historians its aim is to contribute to the reinvigoration of the discipline in the wake of the epistemological challenges that have brought into question many of the foundational assumptions of historians the editors assume that the cultural and the social are mutually constitutive and inextricably linked they believe that an appreciation of the constellation of cultural forces that confer meaning on the lives of historical actors is necessary if we are more fully to understand the social experience of individuals and groups in the past thus culture is understood not as an entity distinct from society but as a product of social practice and therefore at the heart of society itself articles are welcome that bridge what hitherto have been considered distinct subfields of the discipline or that draw effectively on the work of other disciplines in
