what makes this book unique no crystal ball is required to safely predict that in the future even more than in the past innovativeness will be a primary criterion distinguishing successful from unsuccessful companies at the latest since michael porter's study on the competitiveness of nations the same criterion holds even for the evaluation of entire countries and national economies despite the innumerable number of publications and recommendations on innovation competitive innovativeness is still a rare competency the latest publication of unice the european industry organization representing 20 million large midsize and small companies speaks a clear language europe qualifies to roughly 60-70% of the innovation strength of the us japan the record unemployment in many eu countries does not contradict this message a main reason may be given by the fact that becoming an innovative organization means increased openness towards the new and

more tolerance towards risks and failures both challenging the inherently difficult management art of cultural change further lacking innovativeness is often related to legal and fiscal barriers which rather hinder than foster innovative activities yet another reason to explain europe s notorious innovation gap refers to insufficient financial r d resources on the company as well as on the national level as a result for example hi ranking decisions on the level of the european commission are taken to increase r d expenditures in the european union from roughly 2 to 3 of gnp

riding more with less is the bike repair manual for everyone else pulling away from the obsolescence and disposability so often implied within consumer economies the book surveys experienced community bike shop mechanics worldwide to identify the best and safest repair solutions when new parts are not an option for those already familiar with the finer arts of bicycle preservation riding more with less

aligns the most useful technical references within a well organized compilation of the most effective low cost and for free repair techniques and for the uninitiated the book includes an overview of the community bike shops many readers may find in their own neighborhoods where many begin to discover real alternatives presented in a compact and info rich writing style the technical discussion within riding more with less goes beyond identifying innovative techniques for fixing bikes with little or no money to demonstrate just how common these approaches really are most cyclists globally do not ride expensive or even modern ones after all and from this perspective the option of new repair parts might even be exceptional rather than normative moreover the covid pandemic underlines how supply chain disruptions beyond our control can lead larger numbers of people towards reusing salvageable bike parts and other creative solutions
