

# Free reading Genetic metabolic diseases perspectives in pediatric pathology vol 17 Copy

twenty to thirty years ago the prognosis for children with cancer was dismal since then remarkable advances in the treatment of childhood cancers have resulted in overall cure rates of 60 percent in response to these improved prognoses psychological frontiers of patient care and clinical research have evolved psychologists as well as mental health professionals from other disciplines are now routinely included in medical treatment planning and patient care psychosocial interventions with pediatric cancer patients and their families are guided by an increasingly sophisticated body of research findings that enhance their quality of life with contributions from nationally recognized clinicians and researchers this volume addresses the wide range of psychological issues inherent in pediatric oncology including coping with pediatric cancer pain and symptom management medication compliance neuropsychological effects of disease and therapy sibling and family relations bereavement and care of the dying child each author carefully defines his or her research area discusses theoretical and methodological concerns critically reviews and integrates research findings and discusses unresolved issues as well as future directions for research this balanced and comprehensive overview of pediatric psychooncology is essential reading for all those interested in the treatment of children diagnosed with cancer teaching shakespeare is a major contribution to the knowledge and expertise of all teachers of shakespeare in schools colleges and institutions of higher education it makes explicit the principles of active learning that underpin cambridge school shakespeare and helps teachers develop their existing good practice practical examples are given from the plays most frequently used in schools but rex gibson shows that the principles apply equally to the less frequently studied plays thereby extending the canon of school shakespeare child care law and policy issues generate very strong emotions and some crucial questions concerning the role of the state for instance under what circumstances should the state be able to intervene and use the force of the law to protect children do children have similar rights to adults such questions are matters of controversial debate and in the light of well publicised child abuse cases official inquiries and a government review led to the passing of the children act in 1989 perspectives in child care policy presents four different value perspectives on child care policy laissez faire state paternalism defence of the birth family and children s rights these perspectives differ in their underlying values concepts and assumptions concerning children families the rights and powers of parents and the role of the state this book presents an up to date review of behavioral factors in diabetes management across the lifespan an update on medical management epidemiology and prognosis and utilize an ecological framework to address various aspects of diabetes management for children and adults on the individual social community and medical system and policy levels the individual level examines biobehavioral and

neuroendocrine factors for their role in the etiology of diabetes as well as various demographic factors involved in health disparities and specific psychological issues including distress and quality of life depression and anxiety eating disorders and intervention approaches zooming out the social level addresses the role of social support and family influences as well as group and family interventions to promote more effective diabetes management the community level addresses medical system factors including the patient physician relationship and transition programs as well as community and school based prevention programs finally chapters also address how the policy level impacts diabetes management considering the role of health care insurance and school and workplace policy topics featured in this book include neuroendocrine and biobehavioral influences on diabetes eating disorders in individuals with diabetes family influences and family therapies for children and adults with diabetes depression and anxiety in children and adults with diabetes behavioral diabetes is a must have resource for researchers graduate students and fellows as well as clinicians therapists and other practitioners involved in diabetes management across the lifespan a secondary audience comprises individuals working in the community and policy levels including but not limited to health care and medical systems administrators as well as school and workplace policymakers this book is a comprehensive overview of the extremely important topic of behavioral diabetes the issues encompassed in this book have evolved greatly over the last few decades and the editors have done a spectacular job in having the key experts on each of the many topics review the literature while at the same time keeping it practical for both clinicians and researchers irl b hirsch md university of washington seattle this study on cross cultural perspectives in child advocacy deals with various topics including support for children s issues the factors that influence reporting of suspected child abuse and child advocacy s application to education professionals the study looks at issues from around the world chronic inflammatory bowel disease ibd encompasses crohn s disease ulcerative colitis and indeterminate colitis the distinct phenotype in pediatric and adolescent patients and the difference from adult ibd make early onset ibd a unique subgroup requiring specific therapeutic considerations in this book leading experts from the usa europe and israel present new data on the genetics epidemiology pathology and pathogenesis of pediatric ibd imaging and endoscopy in the diagnosis of ibd are also discussed extensive coverage is given to disease management i e pharmacological nutritional and surgical approaches with special emphasis on growth failure and delayed puberty the important topic of transition from pediatric to adult medical care is highlighted and a clinical and developmental timeline is proposed offering practical information on ibd in infants toddlers children adolescents and young adults this book is essential reading for gastroenterologists in particular pediatric gastroenterologists and trainees as well as general pediatricians and nutritionists while teachers value children s play they often do not know how to guide that play to make it more educational this volume reflects current research in the child development and early childhood education fields this volume contains the papers presented at the eighteenth minnesota symposia on child psychology held october 27 29 1983 at the university of minnesota minneapolis as has been the tradition for this annual series the faculty of the institute of child development invited

internationally eminent researchers to present their research and to consider problems of mutual concern to scientists studying development the theme of the eighteenth symposium and the present volume was cognitive perspectives on social and behavior development this is a book which i will return to over time it carries a powerful and empowering message about the task of researching children s views it deserves to find an automatic place in staffroom libraries i happily recommed it support for learning the 1990s have been marked by a growing emphasis in various professional contexts on obtaining the views of clients including children this position is an international one shared across the developed world and encapsulated in the un convention on the rights of the child this book addresses the issues and practicalities surrounding the obtaining of children s views particularly in the research context the book takes a deliberately and explicitly pluralist stance its distinctiveness rests on the scrutiny of methodological issues pertaining to the collection of children s views and practical applications the book is structured around two main sections section 1 examines five aspects of theoretical and conceptual issues ethical issues and codes of conduct children s rights the legal perspective developmental dimensions and sociological issues section 2 illustrates these aspects by focusing on methods and applications in obtaining children s views in specific projects the book is aimed at researchers and graduate students in psychology social sciences education health and law it will also be of value to a range of professionals involved in eliciting children s views e g psychologists teachers social workers medical workers and the police talk think feel is an exploration of emotions in children with cancer their families and the doctors who take care of them in this thought provoking work nathaniel bayer offers insight into the emotional side of medicine and the range of feelings that pervade pediatric oncology and life in general this book is a collection of reflections stories observations of clinical encounters and extensive direct quotes from interviews bayer conducted with twenty pediatric oncologists across the united states the narrative voices are illuminating in their candor and provide a window into the thoughts of doctors and the close relationships they share with patients the poignant vignettes about the lives and even the deaths of children with cancer serve as a way for readers to further understand the illness experience and to reflect on their own emotional responses this book is part of an increasingly important conversation about the role of emotions in medicine join the discussion pediatric neuropsychology perspectives in an ambulatory care setting provides an overview of the most commonly seen disorders in outpatient settings including adhd autism congenital heart disease blood cancer and hematologic conditions brain tumors and epilepsy each chapter provides up to date information on these pediatric neurodevelopmental and medical disorders including a review of the neuroanatomic contributions as well as an overview of the neuropsychological findings alongside the neuroanatomic and neuropsychological underpinnings case examples and intervention recommendations are provided for parents educators and others who work with these populations to enhance the ecological validity of neuropsychological assessments with reference to the latest diagnostic criteria this book is an invaluable resource for neuropsychologists or neuropsychology students whose work includes pediatric patients with neurodevelopmental and neuro medical disorders it is designed to provide

practical information but also the most up to date research in neurobiological and neuroanatomical contributions of these disorders to inform the practitioner and enhance the care provided to their pediatric patients this volume adopts a context informed framework exploring risk maltreatment well being and protection of children in diverse groups in israel it incorporates the findings of seven case studies conducted at the hebrew university of jerusalem s nevet greenhouse of context informed research and training for children in need each case study applies a context informed approach to the study of perspectives of risk and protection among parents children and professionals from different communities in israel utilizing varied qualitative methodologies the volume analyses the importance of studying children and parents s perspectives in diverse societies and stresses the need for a context informed perspective in designing prevention and intervention programs for children at risk and their families living in diverse societies it further explores potential contribution to theory research practice policy and training in the area of child maltreatment from both an international perspective and through combining theory practice and reflection this book examines critically how listening to young children in early childhood services is understood and practiced table of contents 1 basic perspectives biases and format s d dixon and m t stein 2 setting the stage theories and concepts of child development s d dixon 3 interviewing in a pediatric setting m t stein 4 designing an office with a developmental perspective m t stein 5 the prenatal visit making an alliance with the family s d dixon 6 the newborn examination innate readiness for interaction with the environment s d dixon 7 the hospital discharge examination getting to know the individual child m t stein 8 the special care nursery unlocking the behavior of the vulnerable neonate s d dixon and p gorski 9 five days to four weeks making a place in the family p kaiser and s d dixon 10 five weeks to two months getting on track m t stein 11 three to four months having fun with the picture book baby s d dixon 12 five to six months reaching out to play s d dixon m j hennessy and p kaiser 13 seven to eight months separation and strangers p kaiser and s d dixon 14 nine to ten months active exploration in a safe environment p kaiser and s d dixon 15 one year one giant step forward s d dixon and m j hennessy 16 eighteen months asserting oneself a push pull process m t stein 17 two years learning the rules language and cognition s d dixon h feldman and e bates 18 two and one half to three years emergence of magic s d dixon 19 four years clearer sense of self n putnam and s d dixon 20 five years entering school p nader 21 six years learning to use symbols n putnam and m t stein 22 seven to ten years growth and competency n putnam 23 seven to ten years the world of the elementary school child r d wells and m t stein 24 overview of adolescence m e felice 25 eleven to thirteen years early adolescence age of rapid changes m e felice 26 fourteen to sixteen years mid adolescence the dating game m e felice 27 seventeen to twenty one years late adolescence l i rice and m e felice 28 special families r d wells n putnam and m t stein 29 childrens encounters with illness hospitalization and procedures m t stein 30 child advocacy a pediatric perspective m t stein s d dixon and j e schanberger 31 the use of drawings by children in the pediatric office j b welsh 32 books for parents videos for kids an annotated bibliography p kaiser m caffery h j brehm s d dixon m t stein and m e felice this book presents evidence that children are

the real experts of their lives 2600 boys and girls in germany between the ages of 6 of 11 years with and without a migration background were interviewed next to established topics of family friends leisure time and school the focus of this study was on the topic of justice children were asked what justice in their opinion was and whether they felt treated justly or not the 3rd world vision study puts the subjective well being of children into the focus and shows that children are able to report competently and authentically about their lives this volume is of great important to researchers policy makers and professionals interested in children s well being from children s own perspectives the first of its kind this book describes pediatric palliative care in more than 23 countries each region in the world is covered and countries included are both resource poor and rich authors are multidisciplinary and regarded nationally and internationally in their field clinicians advocates policymakers funders and researchers will learn how programs were developed and implemented in each country authors describe children for whom pediatric palliative care is needed and provided for in their country when applicable a brief history of pediatric palliative care is included noting especially policy changes and legislative acts for example the chapter on poland describes how pediatric palliative care grew from the catholic church into a national movement spearheaded by several health care workers the pole national spirit that brought them through a change in political regime has also been a driving force in the pediatric palliative care movement the chapter on south africa for example illustrates how a resource poor country has been able to leverage philanthropic and government funding to make its dream of having an infrastructure of pediatric palliative care a reality these are just a few examples of the inspiring stories that are included in this book readers from countries who wish to start a pediatric palliative care program or advance an existing program will learn valuable lessons from others who have faced similar barriers introduction and concluding chapters highlight the strengths and weaknesses of the modern pediatric palliative care movement like many other medical and health related professions the speech language pathology and audiology professions have been responding to the changes in the ways in which healthcare is delivered these changes are occurring at the federal and state levels due to changes in legislative and regulatory policies to this end and as a result of reports from the world health organization 2010 2011 2013 and the institute of medicine 2000 2001 2015 healthcare professionals are now addressing healthcare service delivery within an interprofessional collaborative practice and patient outcomes context this volume of pediatric clinics will present articles that address clinical care to a variety of pediatric speech and language clinical populations while it will be the intent of each piece to address interprofessional perspectives of care the opening and closing pieces respectively will introduce and then synthesize all of the articles into a cogent volume articles are devoted to the following topics the journey to interprofessional practice are we there yet late talkers why the wait and see approach is outdated a pediatrician s guide to cleft palate speech and non cleft causes of velopharyngeal insufficiency vpi supporting children with autism and their families a model for interprofessional practice feeding problems in infants and children assessment and etiology a multidisciplinary team approach to the differential diagnosis of children with communication disorders open up and let us in an

interdisciplinary approach to oral health otitis media beyond the examining room clinical perspectives on pre literacy development in young children using the icf framework to achieve interprofessional functional outcomes for young children a speech language pathology perspective developmental care of the pre term infant from nicu through high risk infant follow up interprofessional collaborative practice what that means for early intervention service delivery the role of the speech language pathologist in creating a model for interprofessional practice in an ambulatory care clinic and identification of speech and language delays in young children an important collaborative role for the pediatrician child care environments have received extensive research attention by those interested in understanding how participating in nonparental child care might influence the children s development and learning throughout the united states us census bureau 2011 and europe organization for economic co operation and development 2006 a large number of young children are cared for outside of the home by non parental adults young children s nonparental care is commonly referred to as child care and is provided to children whose ages range from birth to 12 years of age the provision of child care services has become an increasingly important part of early childhood education in fact the united nations children s fund 2019 states that a large majority of children worldwide spend at least some of their week in child care such arrangements include center care family child care in home child care relative child care and supplemental child care child care researchers have been conducting studies to understand how participating in nonparental child care might influence the children s development and learning outcomes there are more than enough child care studies to make numerous major inferences for example research outcomes show that child care quality seems to be more influential than either the kind of child care or age of admission in determining the children s development and learning the adults child care affects the quality in child care in the environment adults who are caring for the children have the opportunity to effectively assume both nurturing and instructional roles to help young children cultivate their social and cognitive abilities the teachers effectiveness is related to their individual characteristics such as formal education specialized training and the classroom environment however the majority of the studies show that both family and quality of child care have the most significant effects on the children s development and learning therefore the concept of child care has heavily influenced modern views researchers scholars and educators are beginning to understand the current foundations based on theoretical frameworks that contribute to the purposes of the child care in the united states and europe the contents of the child care volume reflect the major shifts in the views of these early childhood researchers scholars and educators in relation to research outcomes on child care its historical roots the role of child care in early childhood education and its relationship to theory research and practice this book critically examines contemporary educational practices with a children s rights lens through investigating the factors that contribute to or hinder the realisation of children s rights in and through education in different contexts it discusses how using a rights framework for education furthers the agenda for achieving international educational aims and goals using diverse international examples the book provides a snapshot of the complexity of children

s rights and education it draws on the expertise of international research teams from australia england finland italy mexico poland portugal scotland spain sweden switzerland and the united states and highlights wide ranging interpretations of the same mandate across different national contexts beginning with a critical overview of the broader context of children s rights in education the book explores obligations for states and their representatives tensions and convergences in implementation and implications for teaching and learning using underutilised educational and theoretical concepts it contributes to broadening understandings of children s rights education and associated theoretical frameworks despite a human rights framework emphasising the indivisibility interrelatedness and interconnectedness of all rights the right to education article 28 dominates discussions about children s rights and education as such equally important rights including the aims of education article 29 are often less considered or absent from the conversation recognising that children s education rights involve more than just access and provision this book advocates for a much broader understanding of the nuances underpinning children s education related rights chapter 10 is available open access under a creative commons attribution 4 0 international license via link [springer.com](http://springer.com) asthma is a condition which affects many infants and older children and which can be debilitating in its severity the editors of this text assembled a team of experts from around the world to discuss the various aspects of the disease a section on normal lung development precedes chapters concentrating on asthma in different age groups various causes of asthma such as exercise indoor and outdoor allergens and food hypersensitivity are discussed in the following chapters the psychological and socioeconomic impact of the disease on this vulnerable age group is covered and various methods this collection of essays by a variety of scholars compiled to celebrate the silver anniversary of the international journal of children s rights builds on work already in the literature to reveal where we are now at and how the law concerned with children is reacting to new developments new or relatively new subject matter is explored such as film classification intersex genital mutilation the right to development rights within the context of sport are given an airing we are offered new perspectives on discipline on the significance of rights flowing downhill on the so called six general principles the uses to which the crc is put in legal reasoning in some legal systems is critically examined though not intended as an audit the collection offers a fascinating image of where the field of children s right is at now the progress that has been made and what issues will require work in the future globalization has carried vast consequences for the lives of children it has spurred unprecedented waves of immigration contributed to far reaching transformations in the organization structure and dynamics of family life and profoundly altered trajectories of growing up equally important globalization has contributed to the world wide dissemination of a set of international norms about children s welfare and heightened public awareness of disparities in the lives of children around the world this book s contributors leading historians literary scholars psychologists social geographers and others provide fresh perspectives on the transformations that globalization has produced in children s lives of older children adults and the family unit as a whole these moral evaluations are in turn influenced by such external contingencies as popula tion demography

social and economic factors subsistence strategies house hold composition and by cultural ideas concerning the nature of infancy and childhood definitions of personhood and beliefs about the soul and its immortality mother love and child death of all the many factors that endanger the lives of young children by far the most difficult to examine with any degree of dispassionate objectivity is the quality of parenting historians and social scientists no less than the public at large are influenced by old cultural myths about childhood innocence and mother love as well as their opposites the terrible power and significance attributed to maternal behavior in particular is a commonsense perception based on the observation that the human infant specialized as it is for prematurity and prolonged dependency simply cannot survive for very long without considerable maternal love and care the infant s life depends to a very great extent on the good will of others but most especially of course that of the mother consequently it has been the fate of mothers throughout history to appear in strange and distorted forms they may appear as larger than life or as invisible as all powerful and destructive or as helpless and angelic myths of the maternal instinct compete historically with myths of a universal infanticidal impulse updated to correspond to the bestselling textbook the study guide for wong s essentials of pediatric nursing 10th edition features key terms multiple choice questions case studies and critical thinking exercises to help you learn difficult concepts with practical activities and answers for review questions at the back of the guide it enhances your comprehension and encourages you to apply your knowledge to real world scenarios answers for review questions and learning activities at the back of the guide allow you to assess your mastery of the material perforated pages offer flexibility and ease of use learning exercises include key terms multiple choice questions case studies and critical thinking activities new completely updated content matches the textbook and provides a comprehensive review of essential pediatric nursing concepts and skills first published in 2004 this volume is a collection of papers from the participants and delegates at the pupil perspectives and the curriculum symposium at the european conference on educational research held at the university of bath uk in september 1995 one of the aims of the symposium was to raise the profile of this under researched area and for dissemination and exchange at an international level this volume in honor of the career of barbara k keogh offers a summary of what is known of developmental constructs in the study of high incidence disabilities written for an audience of scholars policy makers and grad students in special education this volume contains contributions that are interdisciplinary and international the editors believe this is an especially timely and promising enterprise for both sources of diversity are needed for improving our abilities to identify the young child at risk and to prevent disability in terms of disciplines the volume brings together papers by health care providers such as pediatricians and public health nurses as well as educators and psychologists each of these groups works in dissimilar settings and faces dissimilar problems health care providers seek simple identification procedures for use in busy primary care settings psychologists emphasize well constructed research designs and educators reflect the need for early identification and education each of these specialist groups has something to offer the other but too often each tends to limit its publications and readings to its own discipline thus failing to

capitalize on a wider scope of knowledge and practice we hope that this selection of papers will allow all readers addressing the early identification of children at risk to generate a more integrated interdisciplinary perspective we also hope this volume reflects the sense of excitement that we feel from a sharing of international perspectives there is no single approach to the early identification of children at risk that is universally applicable to all countries in addition approaches within each country vary because of availability of financial and human resources and differing expectations of local communities child care law and policy issues generate very strong emotions and some crucial questions concerning the role of the state for instance under what circumstances should the state be able to intervene and use the force of the law to protect children do children have similar rights to adults such questions are matters of controversial debate and in the light of well publicised child abuse cases official inquiries and a government review led to the passing of the children act in 1989 perspectives in child care policy presents four different value perspectives on child care policy laissez faire state paternalism defence of the birth family and children's rights these perspectives differ in their underlying values concepts and assumptions concerning children families the rights and powers of parents and the role of the state this timely book demonstrates the value and relevance of family oriented programs in dealing with problems experienced by children and adolescents experts provide salient guidelines and recommendations for involving the family in the diagnosis and treatment of problems in addition to providing current reviews of research this practical volume describes various skill building programs and therapeutic interventions that can be used in a variety of program and treatment settings designed for helping professionals who work with children and youth family perspectives in child and youth services will be most valuable for practitioners in social work psychology psychiatry and child development

## **Perspectives in Professional Child and Youth Care**

1990

this book presents evidence that children are the real experts of their lives 2600 boys and girls in germany between the ages of 6 of 11 years with and without a migration background were interviewed next to established topics of family friends leisure time and school the focus of this study was on the topic of justice children were asked what justice in their opinion was and whether they felt treated justly or not the 3rd world vision study puts the subjective well being of children into the focus and shows that children are able to report competently and authentically about their lives this volume is of great important to researchers policy makers and professionals interested in children s well being from children s own perspectives

## Researching Children'S Perspectives

1999-12-01

the first of its kind this book describes pediatric palliative care in more than 23 countries each region in the world is covered and countries included are both resource poor and rich authors are multidisciplinary and regarded nationally and internationally in their field clinicians advocates policymakers funders and researchers will learn how programs were developed and implemented in each country authors describe children for whom pediatric palliative care is needed and provided for in their country when applicable a brief history of pediatric palliative care is included noting especially policy changes and legislative acts for example the chapter on poland describes how pediatric palliative care grew from the catholic church into a national movement spearheaded by several health care workers the pole national spirit that brought them through a change in political regime has also been a driving force in the pediatric palliative care movement the chapter on south africa for example illustrates how a resource poor country has been able to leverage philanthropic and government funding to make its dream of having an infrastructure of pediatric palliative care a reality these are just a few examples of the inspiring stories that are included in this book readers from countries who wish to start a pediatric palliative care program or advance an existing program will learn valuable lessons from others who have faced similar barriers introduction and concluding chapters highlight the strengths and weaknesses of the modern pediatric palliative care movement

## **Talk, Think, Feel**

2015-06-11

like many other medical and health related professions the speech language pathology and audiology professions have been responding to the changes in the ways in which healthcare is delivered these changes are occurring at the federal and state levels due to changes in legislative and regulatory policies to this end and as a result of reports from the world health organization 2010 2011 2013 and the institute of medicine 2000 2001 2015 healthcare professionals are now addressing healthcare service delivery within an interprofessional collaborative practice and patient outcomes context this volume of pediatric clinics will present articles that address clinical care to a variety of pediatric speech and language clinical populations while it will be the intent of each piece to address interprofessional perspectives of care the opening and closing pieces respectively

will introduce and then synthesize all of the articles into a cogent volume articles are devoted to the following topics the journey to interprofessional practice are we there yet late talkers why the wait and see approach is outdated a pediatrician's guide to cleft palate speech and non cleft causes of velopharyngeal insufficiency vpi supporting children with autism and their families a model for interprofessional practice feeding problems in infants and children assessment and etiology a multidisciplinary team approach to the differential diagnosis of children with communication disorders open up and let us in an interdisciplinary approach to oral health otitis media beyond the examining room clinical perspectives on pre literacy development in young children using the icf framework to achieve interprofessional functional outcomes for young children a speech language pathology perspective developmental care of the pre term infant from nicu through high risk infant follow up interprofessional collaborative practice what that means for early intervention service delivery the role of the speech language pathologist in creating a model for interprofessional practice in an ambulatory care clinic and identification of speech and language delays in young children an important collaborative role for the pediatrician

## Pediatric Neuropsychology

2022-12-05

child care environments have received extensive research attention by those interested in understanding how participating in nonparental child care might influence the children's development and learning throughout the united states us census bureau 2011 and europe organization for economic co operation and development 2006 a large number of young children are cared for outside of the home by non parental adults young children's nonparental care is commonly referred to as child care and is provided to children whose ages range from birth to 12 years of age the provision of child care services has become an increasingly important part of early childhood education in fact the united nations children's fund 2019 states that a large majority of children worldwide spend at least some of their week in child care such arrangements include center care family child care in home child care relative child care and supplemental child care child care researchers have been conducting studies to understand how participating in nonparental child care might influence the children's development and learning outcomes there are more than enough child care studies to make numerous major inferences for example research outcomes show that child care quality seems to be more influential than either the kind of child care or age of admission in determining the children's development and learning the adults child care affects the quality in child care in the environment adults who are caring for the children have the opportunity to effectively assume both nurturing and instructional roles to help young children cultivate their social and cognitive abilities the teachers effectiveness is related to their

individual characteristics such as formal education specialized training and the classroom environment however the majority of the studies show that both family and quality of child care have the most significant effects on the children s development and learning therefore the concept of child care has heavily influenced modern views researchers scholars and educators are beginning to understand the current foundations based on theoretical frameworks that contribute to the purposes of the child care in the united states and europe the contents of the child care volume reflect the major shifts in the views of these early childhood researchers scholars and educators in relation to research outcomes on child care its historical roots the role of child care in early childhood education and its relationship to theory research and practice

## **Context-Informed Perspectives of Child Risk and Protection in Israel**

2020-08-13

this book critically examines contemporary educational practices with a children s rights lens through investigating the factors that contribute to or hinder the realisation of children s rights in and through education in different contexts it discusses how using a rights framework for education furthers the agenda for achieving international educational aims and goals using diverse international examples the book provides a snapshot of the complexity of children s rights and education it draws on the expertise of international research teams from australia england finland italy mexico poland portugal scotland spain sweden switzerland and the united states and highlights wide ranging interpretations of the same mandate across different national contexts beginning with a critical overview of the broader context of children s rights in education the book explores obligations for states and their representatives tensions and convergences in implementation and implications for teaching and learning using underutilised educational and theoretical concepts it contributes to broadening understandings of children s rights education and associated theoretical frameworks despite a human rights framework emphasising the indivisibility interrelatedness and interconnectedness of all rights the right to education article 28 dominates discussions about children s rights and education as such equally important rights including the aims of education article 29 are often less considered or absent from the conversation recognising that children s education rights involve more than just access and provision this book advocates for a much broader understanding of the nuances underpinning children s education related rights chapter 10 is available open access under a creative commons attribution 4 0 international license via [link.springer.com](https://link.springer.com)

# International Perspectives on Children and Mental Health

2011

asthma is a condition which affects many infants and older children and which can be debilitating in its severity the editors of this text assembled a team of experts from around the world to discuss the various aspects of the disease a section on normal lung development precedes chapters concentrating on asthma in different age groups various causes of asthma such as exercise indoor and outdoor allergens and food hypersensitivity are discussed in the following chapters the psychological and socioeconomic impact of the disease on this vulnerable age group is covered and various methods

## **Children, Childhood, and Everyday Life**

2018-05

this collection of essays by a variety of scholars compiled to celebrate the silver anniversary of the international journal of children s rights builds on work already in the literature to reveal where we are now at and how the law concerned with children is reacting to new developments new or relatively new subject matter is explored such as film classification intersex genital mutilation the right to development rights within the context of sport are given an airing we are offered new perspectives on discipline on the significance of rights flowing downhill on the so called six general principles the uses to which the crc is put in legal reasoning in some legal systems is critically examined though not intended as an audit the collection offers a fascinating image of where the field of children s right is at now the progress that has been made and what issues will require work in the future

## **Beyond Listening**

2005-10-19

globalization has carried vast consequences for the lives of children it has spurred unprecedented waves of immigration contributed to far

reaching transformations in the organization structure and dynamics of family life and profoundly altered trajectories of growing up equally important globalization has contributed to the world wide dissemination of a set of international norms about children s welfare and heightened public awareness of disparities in the lives of children around the world this book s contributors leading historians literary scholars psychologists social geographers and others provide fresh perspectives on the transformations that globalization has produced in children s lives

## **Encounters with Children**

1992

of older children adults and the family unit as a whole these moral evaluations are in turn influenced by such external contingencies as population demography social and economic factors subsistence strategies house hold composition and by cultural ideas concerning the nature of infancy and childhood definitions of personhood and beliefs about the soul and its immortality mother love and child death of all the many factors that endanger the lives of young children by far the most difficult to examine with any degree of dispassionate objectivity is the quality of parenting historians and social scientists no less than the public at large are influenced by old cultural myths about childhood innocence and mother love as well as their opposites the terrible power and significance attributed to maternal behavior in particular is a commonsense perception based on the observation that the human infant specialized as it is for prematurity and prolonged dependency simply cannot survive for very long without considerable maternal love and care the infant s life depends to a very great extent on the good will of others but most especially of course that of the mother consequently it has been the fate of mothers throughout history to appear in strange and distorted forms they may appear as larger than life or as invisible as all powerful and destructive or as helpless and angelic myths of the maternal instinct compete historically with myths of a universal infanticidal impulse

## **Contemporary Perspectives on Research on Child Care in Early Childhood Education**

2021-04-01

this volume contains contributions that are interdisciplinary and inter national the editors believe this is an especially timely and promising enterprise for both sources of diversity are needed for improving our abilities to identify the young child at risk and to prevent disability in terms

of disciplines the volume brings together papers by health care providers such as pediatricians and public health nurses as well as educators and psychologists each of these groups works in dissimilar settings and faces dissimilar problems health care providers seek simple identification procedures for use in busy primary care settings psychologists emphasize well constructed research designs and educators reflect the need for early identification and education each of these specialist groups has something to offer the other but too often each tends to limit its publications and readings to its own discipline thus failing to capitalize on a wider scope of knowledge and practice we hope that this selection of papers will allow all readers addressing the early identification of children at risk to generate a more integrated interdisciplinary perspective we also hope this volume reflects the sense of excitement that we feel from a sharing of international perspectives there is no single approach to the early identification of children at risk that is universally applicable to all countries in addition approaches within each country vary because of availability of financial and human resources and differing expectations of local communities

## **Research with Children**

2008

child care law and policy issues generate very strong emotions and some crucial questions concerning the role of the state for instance under what circumstances should the state be able to intervene and use the force of the law to protect children do children have similar rights to adults such questions are matters of controversial debate and in the light of well publicised child abuse cases official inquiries and a government review led to the passing of the children act in 1989 perspectives in child care policy presents four different value perspectives on child care policy laissez faire state paternalism defence of the birth family and children's rights these perspectives differ in their underlying values concepts and assumptions concerning children families the rights and powers of parents and the role of the state

## ***Children's Rights from International Educational Perspectives***

2021-12-01

this timely book demonstrates the value and relevance of family oriented programs in dealing with problems experienced by children and adolescents experts provide salient guidelines and recommendations for involving the family in the diagnosis and treatment of problems in
