1409 3215 sequence to sequence learning with neural May 02 2024 web 2014年9月10日 computer science computation and language submitted on 10 sep 2014 v1 last revised 14 dec 2014 this version v3 sequence to sequence learning with neural networks ilya sutskever oriol vinyals quoc v le deep neural networks dnns are powerful models that have achieved excellent performance on difficult

1406 2661 generative adversarial networks arxiv org Apr 01 2024 web 2014年6月10日 we propose a new framework for estimating generative models via an adversarial process in which we simultaneously train two models a generative model g that captures the data distribution and a discriminative model d that estimates the probability that a sample came from the training data rather than g

1409 1556 very deep convolutional networks for large Feb 29 2024 web 2014年9月4日 very deep convolutional networks for large scale image recognition karen simonyan andrew zisserman in this work we investigate the effect of the convolutional network depth on its accuracy in the large scale image recognition setting

generative adversarial nets neurips Jan 30 2024 web we propose a new generative model 1 estimation procedure that sidesteps these difficulties in the proposed adversarial nets framework the generative model is pitted against an adversary a discriminative model that learns to determine whether a sample is from the model distribution or the data distribution

<u>1312 6114 auto encoding variational bayes arxiv org</u> Aug 01 2021 2013 12 20 we introduce a stochastic variational inference and learning algorithm that scales to large datasets and under some mild differentiability conditions even works in the intractable case our contributions are two fold first we show that a reparameterization of the variational lower bound yields a lower bound estimator that
