Nicotine Psychopharmacology 1990 this book consists of invited reviews from a variety of experts in this area they integrate the present state of knowledge and explore molecular biochemical neurophysiological and behavioural approaches to studying nicotine and central nicotinic receptors

The Oxford Handbook of Evolutionary Psychology and Behavioral Endocrinology 2019 although most will be at least somewhat familiar with the biological role hormones play during puberty and pregnancy many are likely unaware that hormones chemical messengers that are secreted by cells and that travel through the body to reach specialized receptors impact multiple aspects of our lives from conception onward behavioral endocrinology and evolutionary psychology are complementary disciplines wherein scholars seek to understand human behavior evolutionary psychologists contend that human psychology and behavior are functional outcomes of natural and sexual selection pressures encountered in the ancestral environment in this view selection pressures designed adaptations of the mind and body which produce behavior through a variety of psychological neurological and physiological mechanisms

A dictionary of animal behaviour 2014 covering every aspect of animal behaviour from adaptation to warning this accessible a z also includes terms from the related fields of ecology physiology and psychology clear and informative entries on topics such as communication learning and navigation are backed up by examples and illustrations where appropriate the new edition adds 80 new entries expands coverage of behavioural ecology cognitive ethology and evolutionary theory and brings the text up to date with new theories and research

Nicotine Psychopharmacology 2023 nicotine in the form of tobacco has been more widely used by man than any other psychoactive drug this is a collection of reviews by experts on many aspects of the psychopharmacology of nicotine integrating the present state of knowledge gained from a variety of different approaches

The Social and Behavioural Aspects of Climate Change 2017-09-08 over the past few years and certainly since the publication of the stern report there has been increasing recognition that climate change is not only an environmental crisis but one with important social and economic dimensions there is now a growing need for multi disciplinary research and for the science of climate change to be usefully translated for policy makers until very recently scientific and policy emphasis on climate change has focused almost exclusively on mitigation efforts mechanisms and regulations to reduce greenhouse gas emissions the success of such efforts to date is debatable in fact the impact of ever more stringent emission control programmes could potentially have enormous social consequences little effort has been expended on the exploration of a systematic evaluation of climate stabilization benefits or the costs of adapting to a changed climate let alone attempting to integrate different approaches there is an increasing recognition that the key actors in the climate crisis also need to be preparing for change that is unavoidable this has resulted in a greater consideration of vulnerability and adaptation the book based on the research programme vulnerability adaptation and mitigation vam which ran from 2004 to 2010 funded by the netherlands organisation for scientific research nwo presents a cluster of case studies of industries communities and institutions which each show how vulnerability adaptation and mitigation analyses can be integrated using social behavioural sciences each chapter makes specific recommendations for the studied industry sector community or institution analyses the latest research developments of the field and identifies priorities for future research the book argues that the inherent complexity of climate change will ultimately require a much more integrated response both scientifically to better understand multiple causes and impacts as well as at the scientific policy interface where new forms of engagement between scientists policy makers and wider stakeholder groups can make a valuable contribution to more informed climate policy and practice the book is particularly timely as the scientific research

and policy debate is shifting from one of problem framing to new agendas that are much more concerned with implementation the improvement of assessment methodologies from a multi disciplinary perspective and the reframing of current scientific understanding towards mitigation adaptation and vulnerability a critical element in responding to the climate change challenge will be to ensure the translation of these new scientific insights into innovative policy and practice on the ground this book provides some fundamental elements to answer this need the social and behavioural aspects of climate change linking vulnerability adaptation and mitigation will be essential reading for social science researchers and policy managers in the area of climate change as well as for those who want to know what the social and behavioural sciences can contribute toward coping with climate hazards ngos law firms and businesses in the energy sector or other climate related fields will also find the book of great value

Neuroeconomic and Behavioral Aspects of Decision Making 2017-10-06 this proceedings volume presents the latest scientific research and trends in experimental economics with particular focus on neuroeconomics derived from the 2016 computational methods in experimental economics cmee conference held in szczecin poland this book features research and analysis of novel computational methods in neuroeconomics neuroeconomics is an interdisciplinary field that combines neuroscience psychology and economics to build a comprehensive theory of decision making at its core neuroeconomics analyzes the decision making process not only in terms of external conditions or psychological aspects but also from the neuronal point of view by examining the cerebral conditions of decision making the application of it enhances the possibilities of conducting such analyses such studies are now performed by software that provides interaction among all the participants and possibilities to register their reactions more accurately this book examines some of these applications and methods featuring contributions on both theory and application this book is of interest to researchers students academics and professionals interested in experimental economics neuroeconomics and behavioral economics

Cellular, Molecular, Physiological, and Behavioral Aspects of Traumatic Brain Injury 2022-05-10 traumatic brain injury has complex etiology and may arise as a consequence of physical abuse violence war vehicle collisions working in the construction industry and sports cellular molecular physiological and behavioral aspects of traumatic brain injury will improve readers understanding of the detailed processes arising from traumatic brain injury featuring chapters on neuroinflammation metabolism and psychology this volume discusses the impact of these injuries on neurological and body systems to better understand underlying pathways this book will be relevant for neuroscientists neurologists clinicians and anyone working to better understand traumatic brain injury summarizes the neuroscience of traumatic brain injury including cellular and molecular biology contains chapter abstracts key facts dictionary and summary points to aid in understanding features chapters on signaling and hormonal events includes plasticity and gene expression examines health and stress behaviors after traumatic brain injury

Social and Behavioral Aspects of Pharmaceutical Care 2010-11-15 this thoroughly revised second edition of social and behavioral aspects of pharmaceutical care offers a comprehensive overview of the social economic aspects of pharmaceutical care this new edition provides both the pharmacy student and practitioner with established principles from the social and behavioral sciences along with current findings and examples of cases and reports of applications of these principles theoretical models and practical examples are included to elaborate the pharmacist s role in identifying patients non compliant behavior and managing drug related problems this valuable text includes clinical economic and humanistic considerations that are essential to pharmacy students and practicing pharmacists this essential text also features a special focus on public health and the involvement of caregivers in facilitating

behavioral change social and behavioral aspects of pharmaceutical care second edition will help readers consider how organizations and social systems impact patient experiences with medications contributing to an improved system of pharmaceutical practice and care

Cellular, Molecular, Physiological, and Behavioral Aspects of Spinal Cord Injury 2022-05-10 spinal injury affects about 10 million people annually worldwide impacting on the family unit and causing lifelong disabilities with varied symptoms including paresthesia spasticity loss of motor control and often severe pain cellular molecular physiological and behavioral aspects of spinal cord injury will enhance readers understanding of the biological and psychological effects of spinal cord injury featuring chapters on gene expression metabolic effects and behavior this volume discusses in detail the impact of spinal cord injury to better understand the underlying pathways and processes the book has applicability for neuroscientists neurologists clinicians and anyone working to better understand these injuries summarizes the neuroscience of spinal cord injury including cellular and molecular biology contains chapter abstracts key facts dictionary and summary points to aid in understanding features chapters on signaling and hormonal events includes plasticity and gene expression examines health and stress behaviors after spinal cord injury

Behavioral Aspects of Feeding 1994-04-05 first published in 1994 routledge is an imprint of taylor francis an informa company

Behavioral Aspects of Epilepsy 2007-10-15 the field of epilepsy and behavior has grown considerably in the past number of years reflecting advances in the laboratory and clinic behavioral aspects of epilepsy principles and practice is the definitive text on epilepsy behavioral issues from basic science to clinical applications for all neurologists psychosocial specialists and researchers in the fields of epilepsy neuroscience and psychology psychiatry behavioral aspects of epilepsy include a patient s experiences during seizures his or her reaction during and between seizures the frequency of episodes and what can be determined from the number of seizures with contributions by dozens of leading international experts this is the only book to cover all aspects of this critical emerging science adult and pediatric patients animal models and epilepsy surgery and its effects are all covered in detail behavioral aspects of epilepsy is the only source for up to date information on a topic that has significant and growing interest in the medical community this comprehensive authoritative text has a bench to bedside approach that covers the mechanisms underlying epilepsy and behavior neurophysiologic function neuropsychiatric and behavioral disorders in patients with epilepsy the effects of treatments and surgery on behavior pediatric and adolescent epilepsy disorders associated with epilepsy that impact behavior and much more

Behavioral Aspects of AIDS 2013-06-29 as we enter the last decade of the twentieth century the aids epidemic looms ever larger and threatening the specter of upwards of a million deaths in the united states and perhaps many millions worldwide from a sexually transmitted virus shakes our belief in modern medical science while challenging the foundations of democratic society almost ten years into the epidemic and with an enormous body of basic science research on the human immunodeficiency virus hiv we still do not know why aids emerged when it did or how to stop its spread a very humbling experience for scientists clinicians public health experts politicians and the general public yet there are signs that a well coordinated multidisciplinary research program can conquer the epidemic and perhaps provide the basis for preventing future epidemics the hiv family of viruses is now better understood both in terms of structure and function than any other virus genetically engineered peptides and nucleic acids are being tested as specific treatments or vaccines against hiv infection disease most promising are the strides which have been made in

understanding those aspects of human behavior which have contributed to the spread of hiv infection and which must be substantially modified if aids is to be controlled and eventually eradicated the basis of that understanding has roots in a diverse set of disciplines which have converged in the work presented in this book

Advances in the Study of Behavior 1971-05-31 advances in the study of behavior

Cocaine 2008-04-30 cocaine poses interesting problems for neurophysiologists and neuropharmacologists and there is important new data on the effects of cocaine on the brain its initial site of action at the cellular level now appearing to be the dopamine transporter includes chapters on the far reaching toxic effects of cocaine on the epidemiology and the economics of drug addiction on the past and present use of cocaine in the u s and in south america and on the moral issues raised by drug use and abuse

Dimensions of Human Behavior 2010-09-29 author elizabeth d hutchison s multidimensional framework person environment and time for human behavior theory courses helps instructors organize course material in a meaningful way for students this epas ready text provides students with a comprehensive and readable global perspective on the person and environment construct weaving powerful case studies with recent innovations in theory and research the companion text dimensions of human behavior the changing life course covers the dimension of human behavior across time together these two textbooks provide the most comprehensive coverage available for theory courses order the books together with bundle isbn 978 1 4129 8881 0 this core text is designed for advanced undergraduate and graduate human behavior and the social environment courses in departments of social work and psychology through its close knit and yet broad and comprehensive treatment of all aspects of human behavior dimensions of human behavior person and environment achieves its superiority over the one paradigm human behavior books that run into unavoidable stereotypes of human behavior and leave out necessary details about the investigated case because of the limited scope of a single paradigm it is indeed a multidimensional approach for multifaceted social work it is strengthened further by its multicultural and global case studies and state of the art developments in the social and behavioral sciences that have been added to the new edition composing another dimension in which the book casts human behavior therefore i daresay dimensions of human behavior person and environment makes the fascinating subject of human behavior even more intriguing alfred t kisubi university of wisconsin oshkosh

Behavioral Aspects of Sleep Problems in Childhood and Adolescence, An Issue of Sleep Medicine Clinics, 2014-06-28

this issue by dr judith owens focuses on sleep behavioral problems with articles covering topics such as addressing sleep problems in children with anxiety disorders behavioral treatment of insomnia in children with attention deficit hyperactivity disorder adhd application of cognitive behavioral therapy for insomnia cbt in the pediatric population treatment of delayed sleep phase disorder dspd in adolescents tricks of the trade practical techniques for managing behavioral sleep problems in young children quality of life in children with narcolepsy myofunctional therapy in the treatment of pediatric sleep disordered breathing improving positive airway pressure pap adherence in children creating the child friendly sleep lab controversies in treatment of pediatric insomnia

Dimensions of Human Behavior 2008 what is it about the multiple dimensions of person environment and time that social workers need to understand how do diversity and inequality play a role in human behavior how does our biology spirituality and psychology impact behavior and finally what can we learn about how social institutions families groups organizations and communities impact the vast range of human behaviors the third edition of this powerful text aims to examine these dimensions by expanding on these important questions in this text you will meet social workers and clients from a variety of work settings and situations who bring the passion and power of social work to life

through engaging case studies found throughout the text these case studies help apply the latest theory and research to real life practice situations the third edition offers new case studies and is thoroughly updated and revised to reflect recent census data developing trends and cutting edge research on human behavior new to the third edition added coverage of international issues human behavior is put in global context throughout the book increased focus on social justice and diversity more content has been added on human diversity related to gender race and ethnicity culture sexual orientation and disability engages the reader through a variety of illustrative features new case studies exhibits photos throughout and resources have been added to provide the most up to date information high quality ancillaries student study website help your students succeed with this new companion student study site at sagepub com pandestudy students can review chapter highlights and summaries take practice quizzes and study via student flash cards on the in addition students can download podcasts which contain important highlights presented by the author expanded instructor s resource cd new to this edition instructors can create tests using a new electronic test bank in addition this resource cd contains powerpoint slides teaching tips suggested classroom activities and more and is available to qualified adopters ircds are available for qualified instructors only to request an ircd for this book please contact customer care at 1 800 818 7243 6 am 5 pm pacific time or by emailing info sagepub com with course name and enrollment and your university mailing address to expedite the process intended audience this text was developed for advanced undergraduate and graduate courses on human behavior in the social environment in departments of social work and psychology together with its companion volume dimensions of human behavior the changing life course isbn 978 1 4129 4126 6 students will receive the most comprehensive coverage available on human behavior the two volumes are also available at a discounted price as a bundle isbn 978 1 4129 4128 0

Behavioral Aspects of Neuroendocrinology 2012-12-06 latest issue in the current topics in neuroendocrinology series which has been gaining a great deal of reputation as a primary source for reviews in neuroendocrinology and related areas in the past few years

Neurological Aspects of Substance Abuse 1993 neurological aspects of substance abuse addresses aspects of substance abuse relevant to neurologists and other clinicians including basic pharmacology historical background epidemiology overdose and withdrawal medical and neurological complications fetal effects and pharmacotherapy illicit drugs include heroin methadone and other opioids amphetamines cocaine and other psychostimulants barbiturates benzodiazepines and other sedatives marijuana lsd mescaline and other hallucinogens inhalants phencyclidine and anticholinergics licit drugs include ethanol tobacco and caffeine no existing book addresses substance abuse from a primarily neurological vantage or includes the topics listed above in one volume comprehensive coverage of neurological aspects of drug abuse and addiction no other book addresses substance abuse from a primarily neurological viewpoint

Economics and Consumer Behavior 1980-05-30 for advanced courses in economic analysis this book presents the economic theory of consumer behavior focusing on the applications of the theory to welfare economics and econometric analysis Biological and Behavioral Aspects of Salt Intake 2012-12-02 biological and behavioral aspects of salt intake presents the developmental social and anthropological aspects of salt intake this book explores the existing knowledge of those factors that influence man s appetite for salt organized into five parts encompassing 28 chapters this book starts with an overview of the pathological and physiological importance attached to levels of salt intake in health and in disease this text then examines the scientific information concerning the nature of man s appetite for salt and the variations of that appetite as an expression of biological needs behavioral patterns differing environmental

conditions and normal or disturbed physiology other chapters examine the plasma renin activity urinary sodium excretion and taste responses of hypertensive and normotensive individuals the final chapter explores the relations between taste intake preference and hypertension this book is a valuable resource for nutritionists food scientists and researchers interested in the planning of nutritional programs in public health or therapeutic regimens

Dimensions of Behavior 2013-10-22 dimensions of behavior the psychiatric foundations of medicine provides the general background of the field and lays the foundations of the origins of behavior it is a modern textbook of psychiatry written specifically for medical students and physicians in its comprehensive scope it contains the contributions of all the disciplines that are relevant to the behavioral psychological social and humanistic aspects of medicine as well as the contributions of clinical psychiatry that constitute an integral part of the healing art and science of medicine the book is organized into six parts parts i and ii are introductory and present the historical development of psychological thinking in medicine and the evolving status of psychiatry in the contemporary scene with an emphasis on the need for a new medical model they further attempt to sketch a general conceptualization of human behavior that transcends the disciplinary boundaries of biological and psychosocial sciences through an introduction into the philosophical and epistemological approaches to studying man and his behavior part iii introduces basic concepts related to an evolutionary understanding of human behavior together with contributing extrapolations from ethological and laboratory animal studies parts iv through vi present the developmental dimension of behavior human development is discussed from the point of view of its biological foundations and genetic determinants from the point of view of the various psychological theories of personality development and in terms of the developmental stages of man this longitudinal perspective of behavior provides the fundamental considerations for understanding the uniqueness of the individual

Journal of Behavioral Medicine 1993 companies can no longer expect to engage in dubious or unethical corporate behaviour without risking their reputation and damaging perhaps irrevocably their market position irresponsible corporate behavior not only deprives shareholders of long term returns but also ultimately imposes a cost on society as a whole sustainable business is about ensuring that entities contribute toward positive social environmental and economic outcomes bad business behaviour is costly for stakeholders for markets for society and the economy alike to ensure that a company behaves well the buy in of the leadership team is crucial the full commitment of the board of directors in conjunction with the senior managers of the organization is required if an organization is to be socially responsible in this sense leadership does not reside with an individual the ceo within the organization but with all of those at the apex of corporate power and control effective change management requires enlightened and capable leadership to instigate and drive the process of embedding a sustainable and socially responsible corporate philosophy and culture that supports good business decision making a profound understanding of the requirements of such a leadership process will help corporate managers become highly effective change agents governance will be the main driver of this change for the economy and financial markets to become sustainable and resilient radical changes in corporate leadership need to take place integrated reporting government regulation and international standards will all be important factors in bringing about this change as well as understanding the effects of corporate behavior on financial markets such an understanding is also now imperative in relation to the social and environmental contexts

Corporate Behavior and Sustainability 2016-10-04 this handbook shows the wide perspective cognitive behavioural treatment can offer to health professionals the vast majority of whom now recognize that cognitive behavioural

procedures are very useful in treating many mental disorders even if certain disciplines continue to favour other kinds of treatment this book offers a wide range of structured programmes for the treatment of various psychological psychiatric disorders as classified by the dsm iv the layout will be familiar to the majority of health professionals in the description of mental disorders and their later treatment it is divided into seven sections covering anxiety disorders sexual disorders dissociative somatoform impulse control disorders emotional disorders and psychotic and organic disorders throughout the twenty three chapters this book offers the health professional a structured guide with which to start tackling a whole series of mental disorders and offers pointers as to where to find more detailed information the programmes outlined should it is hoped prove more effective than previous approaches with lower economic costs and time investment for the patient and therapist

International Handbook of Cognitive and Behavioural Treatments for Psychological Disorders 1998-11-27 drawing from the disciplines of cognitive science paleolithic anthropology art history and semiotics karen a haworth and terry j prewitt offer a novel discussion of the origins of language based primarily in the distinction of holistic versus analytical cognitive processing also by employing a refined view of human symboling capacities grounded in the writings of c s peirce they provide a short but comprehensive explanation of what the artifacts and art of the paleolithic and mesolithic periods suggest about language origins their interpretation supports a semiotic argument that iconic and indexical logical modeling precedes human elaboration of experience by symbolic reference in words or propositions and ultimately in what peirce called the argument further they suggest that the use of symbols to model the world developed rapidly between about 20 000 and 10 000 years ago and has the effect of giving emphasis to analytic thought as the dominant mode of human consciousness rather than seeing symbols as the impetus for human logic they argue for presymbolic elements of logic in peirce s sign categories shared widely by humans and other animals intended readers are scholars in philosophy anthropology psychology linguistics and semiotics as well as interested nonspecialists the presentation is also complemented with brief personal narratives intended to offer background that helps make a dense academic argument more accessible to the widest audience possible the authors insights into the basis for language have ramifications for any number of other fields education psychology philosophy prehistory and art to name a few

The Evolution of Human Consciousness and Linguistic Behavior 2020-09-22 functional cerebral specialization is a phenomenon of considerable relevance not only to those investigating normal brain function but also to scientists who study and treat clinical populations this special issue of laterality brings together contributions from researchers studying human populations and those using animal models and includes a discussion of the important issues in the field of lateralization of function the papers address the origins of laterality and the nature of lateralized functions in various species as well as relations among the different forms of lateralization included are such topics as lateralized memory processes early experiential effects on laterality the genetic basis of handedness perceptual processing in the haptic or visual domain and learning comparisons between human and non human primate findings and the implications of these findings for our understanding of the phylogenetic basis of hemispheric specialization are also emphasized the papers are based on presentations at two symposia that took place in august 1996 issues in laterality held at the international congress of psychology in montreal and laterality and hemispheric specialization in primates brain behavior and evolution held at the university of wisconsin madison at the joint meetings of the xvi congress of the international primatological society and the xix conference of the american society of primatologists

Hemispheric Specialisation in Animals and Humans 1997 proven to be highly effective for the treatment of a wide range of problems cognitive behavior therapy is the most widely used psychotherapeutic technique building on the success of the previous edition cognitive behavior therapy second edition presents specific direction for cognitive behavior therapy techniques fully updated and expanded this edition contains contributions from world renowned experts on problems including smoking cessation stress management and classroom management its step by step illustrations create a hands on reference of vital cognitive behavioral therapy skills this reference is essential for psychologists counselors and social workers

Cognitive Behavior Therapy 2008-12-31 this book presents essential insights on environmental policy derived from behavioral economics the authors demonstrate the potential of behavioral economics to drive environmental protection and to generate concrete proposals for the efficient design of policy instruments moreover detailed recommendations on how to use nudges and related instruments to move industry and society toward a sustainable course are presented this book addresses the needs of environmental economists behavioral economists and environmental policymakers as well as all readers interested in the intersection between behavioral economics and environmental policy

Behavioral Models and the Analysis of Drug Action 1982 papers from the second suncoast workshop on the neurobiology of aging held march 1991 at amelia island plantation florida discuss various issues related to alzheimer s treatment cholinergic drugs growth factors phospholipids ion channel modulators in alzheimer s disease cns targeted drug del

New Perspectives for Environmental Policies Through Behavioral Economics 2015-09-25 this edited volume presents selected papers capturing herbert kelman s unique and seminal contributions to the social psychology of conflict analysis and resolution with a special emphasis on the utility of concepts for understanding and constructively addressing violent and intractable conflicts central concepts covered include perceptual processes basic human needs group and normative processes social identity and intergroup trust which form the basis for developing interactive methods of conflict resolution

Selected References on the Behavioral Aspects of Venereal Disease Control 1972 first published in 1995 behavioral development is volume 1 in the research and developmental and comparative psychology series dedicated to honour the contributions of t c schneirla this volume represents the substantive content of the fifth t c schneirla conference held in november of 1989 the volume is divided into three parts the significance of the intensity of the adequate stimulus the process of development and the concept of integrative levels schneirla is still recognized as one of the foremost theoreticians in comparative psychology and the rebirth of interest in comparative psychology is evident

Treatment of Dementias 1992 for the first time this book tells the wytham story in a way that is accessible to both scientist and general reader alike it provides a fascinating overview of what the woods are like their history composition both plant and animal and how their wildlife has changed over time this iconic location has been the subject of a series of continuous ecological research programmes dating back to the 1920s a level of continuity of research effort that is extremely rare hence there is a strong emphasis on the significance of the scientific research that has been done there and how this has contributed to ecological thinking elsewhere

International Encyclopedia of Business and Management: Accounting - Deconstruction analysis and management 1996 the numbers of hiv infected women are growing rapidly and this book provides an account of the diagnosis and the management of hiv infection in women it also deals with the special problems that this disease gives rise to in women and emphasizes infection in pregnancy and other problems
