The Wills Eye Manual 2012-05-01

ophthalmology is a specialty that some health care providers may not be very comfortable with most medical schools don't require a rotation in ophthalmology and busy doctors today may not have the experience or

confidence to diagnose and treat eye conditions this book provides basic information on common eye conditions and treatments and tips on when to refer in addition it also provides some basic tools and guidelines for helping patients with their eye care

Manual of Retinal Surgery 1989

this manual is introduced globally to the ophthalmic community with the primary focus on the practicing eye care provider and all those involved in or interested in the management of ocular diseases ocular management issues are complex and inter related to basic science and to clinical presentations of a large spectrum of ocular diseases of equal importance is the recognition and diagnosis of the individual patient s ocular disease state proper diagnosis will then channel the clinician in the correct direction to engage in the optimal management of the ocular condition and thus relieve the patient s signs and symptoms and possibly improve the way the patient sees the world all these clinical activities are often performed within a very narrow time slot with limited chair time for the individual patient it is of paramount importance to maximally utilize this limited time segment to deliver the best possible care to our patients at the same time it is important not to compromise eye care at the expense of speed hence a clinician often needs the diagnostic and therapeutic reference materials that can be used in a short time to answer his clinical question s with this in mind the text is written in an easy to read quick reference format while at the same time providing an extensive and most comprehensive material that the clinician will find extremely useful also practical images are inserted throughout the text to complement the process of clinical patient care this book helpful for practising ophthalmologists and students

Moorfields Manual of Ophthalmology 2014-09-22

product description the ophthalmic scribe manual is the ultimate how to manual for learning to scribe in ophthalmology if you re interested in learning more about scribing in retina cornea comprehensive glaucoma or oculoplastics this manual has you covered inside you will find over 100 full color figures and tables illustrating the most important concepts anatomy physiology organized high yield abbreviations must know medications must know imaging modalities and high yield specialty specific pathology about the author after graduating with a bachelor of science in biology from the university of north carolina at chapel hill and prior to enrolling in medical school my job search brought me back home to atlanta where i accepted a position as an ophthalmic medical scribe i had no prior experience as a

scribe or in the healthcare field but i knew that quickly improving my understanding of ophthalmology would be essential for my success i searched the web to obtain every piece of relevant ophthalmology information that i could find and i spent hours experimenting with the functionalities of the eye clinic s electronic medical record to better prepare myself for my new role however i found that it took a significant amount of time and effort to sift through the excessive online information before i was able to hone in on the relevant material due to the lack of designated ophthalmic medical scribe training resources and the vast amount of irrelevant information online i decided that the creation of the ophthalmic scribe manual was warranted with over 3 years of scribing experience and over 20 000 patient encounters as well as having published a variety of first author case reports and review articles in prominent ophthalmic medical journals i am confident that my experiences will offer an immediate benefit to those seeking to excel in this rewarding profession review very well written this looks terrific and will be great for widespread use particularly in training programs especially with the growing need for trained ophthalmic personnel
