most elected officials didn't care what people like them thought graham and hand intend to change that conventional wisdom by showing citizens how to flex their citizenship muscles they describe effective citizenship skills and provide tips from civic experts even more importantly they offer numerous examples of everyday americans who have used their skills to make democracy respond the reader will see themselves in these examples of citizens who chose to be victorious participants rather than tranquil spectators in the arena of democracy by the end of the book you will have new confidence that citizen participation is the lifeblood of america and will be ready to make governments work for you not the other way around
