winner of the bancroft prize through a gripping narrative based on massive new research a leading historian reshapes our understanding of the civil war our standard civil war histories tell a reassuring story of the triumph in an inevitable conflict of the dynamic free labor north over the traditional slave based south vindicating the freedom principles built into the nation s foundations but at the time on the borderlands of pennsylvania and virginia no one expected war and no one knew how it would turn out the one certainty was that any war between the states would be fought in their fields and streets edward l ayers gives us a different civil war built on an intimate scale he charts the descent into war in the great valley spanning pennsylvania and virginia connected by strong ties of every kind including the tendrils of slavery the people of this borderland sought alternatives to secession and war when none remained they took up war with startling intensity as this book relays with a vivid immediacy it came to their doorsteps in hunger disease and measureless death ayers s civil war emerges from the lives of everyday people as well as those who helped shape history john brown and frederick douglass lincoln jackson and lee his story ends with the valley ravaged lincoln s support fragmenting and confederate forces massing for a battle at gettysburg
