Small Arms Survey 2012 2012-08-30

the small arms survey 2012 seeks to increase our scrutiny of what is changing and not changing in relation to armed violence and small arms proliferation chapters on firearm homicide in latin america and the caribbean drug violence in selected latin american countries and non lethal violence worldwide illustrate that security is a moving target armed violence both lethal and non lethal continues to undermine the security and wellbeing of people and societies around the world the goal of curbing small arms proliferation embodied in the un programme of action appears similarly elusive chapters on illicit small arms in war zones trade transparency somali piracy and the 2011 un meeting of governmental experts highlight some of the successes but also the continuing challenges in this area country studies on kazakhstan and somaliland along with the final instalment of the authorized transfers project round out the 2012 edition

Victorian Year-book 1889

get the focused foundation you need to successfully work with older adults occupational therapy with elders strategies for the cota 4th edition is the only comprehensive book on geriatric occupational therapy designed specifically for the certified occupational therapy assistant it provides in depth coverage of each aspect of geriatric practice from wellness and prevention to death and dying expert authors helene lohman sue byers connon and rené padilla offer an unmatched discussion of diverse populations and the latest on geriatric policies and procedures in this fast growing area of practice you will come away with a strong foundation in aging trends and strategies for elder care in addition to having a deep understanding of emerging areas such as low vision rehabilitation driving and mobility issues alzheimer s disease and other forms of dementia new technological advancements health literacy public policy

dignity therapy and more plus you will benefit from 20 additional evidence briefs and numerous case studies to help apply all the information you learn to real life practice it s the focused evidence based and client centered approach that every occupational therapy assistant needs to effectively care for today s elder patients unique focus on the occupational therapy assistant highlights the importance of cotas to the care of elder clients unique attention to diverse populations and cultures demonstrates how to respect and care for clients of different backgrounds unique discussion of elder abuse battered women and literacy includes information on how the ota can address these issues that are often overlooked user resources on evolve feature learning activities to help you review what you have learned and assess your comprehension case studies at the end of certain chapters illustrate principles and help you understand content as it relates to real life situations multidisciplinary approach demonstrates the importance of collaboration between the ot and ota by highlighting the ota s role in caring for the elderly and how they work in conjunction with occupational therapists key terms chapter objectives and review questions are found in each chapter to help identify what information is most important new 20 additional evidence briefs have been added to reinforce this book s evidence based client centered approach new incorporation of emr prevalence and telehealth as a diagnostic and monitoring tool have been added throughout this new edition new expanded content on mild cognitive impairment health

literacy and chronic conditions have been incorporated throughout the book to reflect topical issues commonly faced by ots and otas today new coverage of technological advancements has been incorporated in the chapter on sensory impairments new other updated content spans public policy hipaa power of attorney advanced directives alternative treatment settings dignity therapy and validation of the end of life new merged chapters on vision and hearing impairments create one sensory chapter that offers a thorough background in both areas

Untersuchungen über die syrische Epitome der eusebischen Canones 1886

this book presents selected papers from the 10th international conference on information science and applications icisa 2019 held on december 16 18 2019 in seoul korea and provides a snapshot of the latest issues regarding technical convergence and convergences of security technologies it explores how information science is at the core of most current research as well as industrial and commercial activities the respective chapters cover a broad range of topics including ubiquitous computing networks and information systems multimedia and visualization middleware and operating systems security and privacy data mining and artificial intelligence software engineering and web technology as well as applications and problems

related to technology convergence which are reviewed and illustrated with the aid of case studies researchers in academia industry and at institutes focusing on information science and technology will gain a deeper understanding of the current state of the art in information strategies and technologies for convergence security

Kleine schriften von Alfred von Gutschmid: bd. Schriften zur aegyptologie und zur geschichte der griechischen chronographie. 1889 1889

the chief commissioner of icai has a crucial role in scrutinising aid spending by the uk government and reporting to parliament through the international development committee the committee are pleased to endorse the appointment of dr alison evans to this post but recommend that at least one of the existing commissioners be reappointed for a further term to ensure continuity and that one of the commissioners be an audit professional the selection process used resulted in an unranked list of four candidates deemed appointable being presented to the secretary of state for consideration this puts too much power in the hands of the secretary of state for an independent scrutiny post and threatens to undermine the candidate in the eyes of the public who may assume that the candidate most sympathetic to dfid was chosen the

committee recommend that panels for icai commissioner appointments should be invited to rank candidates or otherwise advise the secretary of state as they see fit in the longer term it is recommended that the committee be able to choose the chief commissioner from the list of candidates

bd. Schriften zur aegyptologie und zur geschichte der griechischen chronographie. 1889 1889

the effectiveness of sanctions cannot purely be measured by the way they change the behaviour of their intended target the degree to which sanctions constrain a rogue state s behaviour and the signals they send to future targets should also be prime considerations in this thought provoking book francesco giuelli measures the true effectiveness of eu sanctions against a range of states including belarus zimbabwe moldova uzbekistan the usa and china he demonstrates that focussing purely on behavioural change is limiting especially when considering the actions and motivations of an international organisation and develops a process to evaluate the direct and indirect impact of eu sanctions giuelli demonstrates the many different ways sanctions have been used by the eu to produce positive

direct and indirect results and provides a multi level framework to assess the success of sanctions in the future

dress and personal appearance in late antiquity the clothing of the middle and lower classes examines written art historical and archaeological evidence to understand the way that cloth and clothing was made embellished cared for and recycled during this period

Occupational Therapy with Elders - eBook **2017-12-26**

armor and weaponry were central to islamic culture not only as a means of conquest and the spread of the faith but also as symbols of status wealth and power the finest arms were made by master craftsmen working with the leading designers goldsmiths and jewelers whose work transformed utilitarian military equipment into courtly works of art this book reveals the diversity and artistic quality of one of the most important and encyclopedic collections of its kind in the west the metropolitan museum s holdings span ten centuries and include representative pieces from almost every islamic culture from spain to

the caucasus the collection includes rare early works among them the oldest documented islamic sword and is rich in helmets and body armor decorated with calligraphy and arabesques that were worn in iran and anatolia in the late fifteenth century other masterpieces include a jeweled short sword yatagan with a blade of watered steel that comes from the court of süleyman the magnificent a seventeenth century gold inlaid armor associated with shah jahan and two gold inlaid flintlock firearms belonging to the guard of tipu sultan of mysore presenting 126 objects each handsomely photographed and richly documented with a detailed description and discussion of its technical historical and artistic importance this overview of the met s holdings is supplemented by an introductory essay on the formation of the collection and appendixes on iconography and on turkman style armor

Information Science and Applications 2019-12-18

the urbanization of warfare has necessitated the kind of precision targeting that only small arms can deliver weapons not often seen on the battlefield can prove useful even indispensable in an urban setting this expert reference guide examines in detail the most successful small arms in use and how changes in warfare have affected how those weapons are used and have transformed the small arms industry professional soldiers law enforcement officers and students

and researchers of small arms will gain a working knowledge of the most common and successful urban combat weapons including some currently in development

HC 741 - Appointment of the Chief Commissioner of the Independent Commission for Aid Impact 2014-12-11

this book makes an original contribution to our knowledge of the world's major defence industries experts from a wide range of different countries from the major economies of north america and western europe to developing economies and some unique cases such as china india singapore south africa and north korea describe and analyse the structure conduct and performance of the defence industry in that country each chapter opens with statistics on a key nation's defence spending its spending on defence r d and on procurement over the period 1980 to 2017 allowing for an analysis of industry changes following the end of the cold war after the facts of each industry the authors describe and analyse the structure conduct and performance of the industry the analysis of structure includes discussions of entry conditions domestic monopoly oligopoly structures and opportunities for competition the section on conduct analyses price non price

competition including private and state funded r d and performance incorporates profitability imports and exports together with spin offs and technical progress the conclusion explores the future prospects for each nation s defence industry do defence industries have a future what might the future defence firm and industry look like in 50 years time this volume is a vital resource and reference for anyone interested in defence economics industrial economics international relations strategic studies and public procurement

Official Gazette of the United States Patent Office 1872

australian waters contain the highest diversity of cephalopods squid cuttlefish and octopus found anywhere in the world they are highly significant ecologically both as top level predators and as prey for numerous vertebrates including fishes seals cetaceans and seabirds cephalopods of australia and sub antarctic territories is a comprehensive guide covering 226 species which represent over a quarter of the world s cephalopod fauna with an emphasis on identification this book includes keys species descriptions full colour illustrations and distribution maps as well as a summary of the biology and behaviour of cephalopods and fisheries information this is an invaluable tool for researchers and fisheries experts as well as

amateur naturalists fishers and divers

The Success of Sanctions 2016-03-03

this book focuses on a critical issue in the study of physical agents whether natural or artificial the quantitative modelling of sensory motor coordination adopting a novel approach it defines a common scientific framework for both the intelligent systems designed by engineers and those that have evolved naturally as such it contributes to the widespread adoption of a rigorous quantitative and refutable approach in the scientific study of embodied intelligence and cognition more than 70 years after norbert wiener s famous book cybernetics or control and communication in the animal and the machine 1948 robotics ai and life sciences seem to be converging towards a common model of what we can call the science of embodied intelligent cognitive agents this book is interesting for an interdisciplinary community of researchers technologists and entrepreneurs working at the frontiers of robotics and ai neuroscience and general life and brain sciences

Mergent Bond Record 2004

the introduction and rapid spread of two eurasian mussel species dreissena polymorpha zebra mussel and dreissena rostriformis bugensis quagga mussel in waters of north america has caused great concern among industrial and recreational water users these invasive species can create substantial problems for raw water users such as water treatment facilities and power plants and they can have other negative impacts by altering aquatic environments in the 20 years since the first edition of this book was published zebra mussels have continued to spread and quagga mussels have become the greater threat in the great lakes in deep regions of large lakes and in the southwestern unites states quagga mussels have also expanded greatly in eastern and western europe since the first book edition was published quagga and zebra mussels biology impacts and control second edition provides a broad view of the zebra quagga mussel issue offering a historic perspective and up to date information on mussel research comprising 48 chapters this second edition includes reviews of mussel morphology physiology and behavior it details mussel distribution and spread in europe and across north america and examines policy and regulatory responses management strategies and mitigation efforts in addition this book provides extensive coverage of the impact of invasive mussel species on freshwater ecosystems including effects on water clarity

phytoplankton water quality food web changes and consequences to other aquatic fauna it also reviews and offers new insights on how zebra and quagga mussels respond and adapt to varying environmental conditions this new edition includes seven video clips that complement chapter text and through visual documentation provide a greater understanding of mussel behavior and distribution

Patents for Inventions. Abridgments of Specifications 1898

when alesha robinson ended her torrid affair with derrick chandler she gave up the love of her life now fate s giving them a second chance but when alesha asks derrick to save her brother she never dreams what the scorned multimillionaire will demand in exchange becoming his wife in name only

Patents for Inventions 1898

this book introduces novel thinking and techniques to the control of robotic manipulation in particular the concept of teleimpedance control as an alternative method to bilateral force reflecting teleoperation control for robotic manipulation is introduced in

teleimpedance control a compound reference command is sent to the slave robot including both the desired motion trajectory and impedance profile which are then realized by the remote controller this concept forms a basis for the development of the controllers for a robotic arm a dual arm setup a synergy driven robotic hand and a compliant exoskeleton for improved interaction performance

ARM I/O 2013-04-15

addresses innovations in technology relating to the energy efficiency of a wide variety of contemporary computer systems and networks with concerns about global energy consumption at an all time high improving computer networks energy efficiency is becoming an increasingly important topic large scale distributed systems and energy efficiency a holistic view addresses innovations in technology relating to the energy efficiency of a wide variety of contemporary computer systems and networks after an introductory overview of the energy demands of

current information and communications technology ict individual chapters offer in depth analyses of such topics as cloud computing green networking both wired and wireless mobile computing power modeling the rise of green data centers and high performance computing resource allocation and energy efficiency in peer to peer p2p computing networks discusses measurement and modeling of the energy consumption method includes methods for energy consumption reduction in diverse computing environments features a variety of case studies and examples of energy reduction and assessment timely and important large scale distributed systems and energy efficiency is an invaluable resource for ways of increasing the energy efficiency of computing systems and networks while simultaneously reducing the carbon footprint

Islamic Arms and Armor in The Metropolitan Museum of Art 2015-12-31

biobetters protein engineering to approach the curative discusses the optimization of protein therapeutic products for treatment of human diseases it is based on the fact that though numerous important therapeutic protein products have been developed for life threatening and chronic diseases that possess acceptable safety and efficacy profiles these products have generally not been reexamined and

modified for an improved clinical performance with enhancements both to safety and efficacy profiles advances in protein engineering coupled with greatly enhanced understanding of critical product quality attributes for efficacy and safety make it possible to optimize predecessor products for clinical performance thereby enhancing patient quality of life and with the potential for great savings in health care costs yet despite such knowledge there is little movement towards such modifications this book examines engineering protein therapeutic products such that they exhibit an optimal not just an adequate clinical performance profile two product classes therapeutic enzymes for lysosomal storage diseases enzyme replacement therapies ert and monoclonal antibodies mabs are used as examples of what modifications to such proteins could be made to enhance clinical performance closer to a cure as it were for ert the key to optimizing clinical performance is to ensure the ert is endowed with moieties that target the protein to the relevant target tissue thus for gaucher disease our best example of how to optimize an ert to address a disease that manifests in specific target tissues macrophages and monocytes the enzyme has been extensively modified to target macrophages for diseases such as pompe disease largely a disorder of muscle optimal performance of ert will depend on endowing the enzyme with the ability to be taken up via the mannose 6 phosphate receptor and so one of the chapters in the book will discuss such approaches moreover a major failure of biotechnology based products is

to gain access to the CNS a key target tissue in numerous diseases thus a chapter has been devoted to strategies to access the CNS additionally immune responses to therapeutic proteins can be highly problematic eliminating the efficacy of life saving or highly effective protein therapeutics this is especially poignant in the case of Pompe disease wherein great improvement in muscle strength and functionality is lost following development of an immune response to the enzyme with consequent patient deterioration and death thus a chapter regarding protein engineering as well as other non clinical approaches to diminishing immunogenicity is a valuable part of the book monoclonal antibodies mAbs can be engineered to bind targets relevant to a wide variety of diseases binding affinity however is only part of the equation and one of the chapters will present a molecular assessment approach that balances affinity with pharmacokinetics and manufacturability as with other proteins immunogenicity can be problematic being responsible for loss of efficacy of anti TNF mAbs often after prolonged successful treatment the authors will also share their perspective on the consequences of physico chemical modifications occurring to mAbs once they reach the circulation or their target a research area open to further development from a protein engineering as well as analytical perspective this book will also discuss novel platforms for protein therapeutics technologies that exceed mAbs with respect to potency and hence potentially efficacy these platforms consist largely of repeat domain proteins

with very high affinity for their target ligands but while potentially more efficacious immunogenicity may be a major problem limiting use the economics surrounding the issue of biobetters is another high profile issue this final chapter will explore the incentives and disincentives for developing biobetters and consider incentives that might make their pursuit more rewarding

ARMOS??? 2011-12

this volume provides a comprehensive overview of hematologic issues that clinicians regularly encounter in the critical care environment the text features hematologic scenarios that affect the adult icu patient outlines pathogenesis and challenges associated with the hematologic disorder and offers treatment modalities hematologic issues covered include anemia hemostatic abnormalities and risks of transfusion the book also details challenges in specific icu populations such as patients afflicted with liver disease brain injury sepsis cardiovascular disease malignancy and trauma written by experts in the field hematologic challenges in the critically ill is a valuable resource for clinicians in the critical care environment who treat critically ill patients afflicted with hematologic complications

Small Arms for Urban Combat 2014-01-10

this superbly illustrated book covers all aspects of liposuction anatomy pathology biochemistry preoperative care equipment the full range of procedures complications postoperative care outcomes lipedema and medical legal aspects compared with the successful first edition the text has been extensively updated and many additional chapters included with particular attention to recently introduced techniques while new technology helps to improve results experience care and skill on the part of the cosmetic surgeon are essential if optimal results satisfactory to the patient are to be achieved the contributors to this book have expended much time and effort to present the cosmetic and plastic surgeon with as much information as possible on the techniques and uses of liposuction for the purposes of cosmetic and non cosmetic surgery liposuction principles and practice will be of value for residents and fellows and for practicing and highly experienced surgeons in plastic surgery cosmetic surgery general surgery and other subspecialties

Tropical Deep-sea Benthos 2001

punk rock has long been equated with the ever shifting concepts of dissent disruption and counter cultural activities as a result since

its 1970s and 1980s incarnations when bands in Britain from the Clash and Sex Pistols to Angelic Upstarts, UK Subs and Crass offered alternative political convictions and subversive lifestyle choices the media has often deemed punk a threat bands like Circle Jerks, Dead Kennedys, Bad Religion and Millions of Dead Cops followed suit in America pushing similar boundaries as the music mutated into a harsher hardcore style that branched deep into suburban enclaves those antagonisms and ideals were in turn translated by another wave of bands from Fugazi to Anti-Flag whose commitment to community building was as pronounced as their taut explosive tunes in the politics of punk David Ensminger probes the conscience of punk by going beyond the lyrics and slogans of the pithy culture war he paints a broad nuanced and well documented picture of the ongoing activism and outreach inherent in punk creating a people's history of punk's social cultural aesthetic and political features the book features original interviews with members of Dead Kennedys, Dead Boys, MDC, Channel 3, Snap, Her, Screem, Minutemen, Tsol, The Avengers, Blowdryers and many more Ensminger highlights punk's influence on philanthropy and community involvement and paints a contextualized picture of how punk critiqued dominant culture by channeling support and media coverage for a wide array of humanitarian programs for gays and lesbians the homeless the disabled environmental and health research and other causes
