differences and similarities involved when groups feature in political philosophy it is usually in one of three contexts the redressing of past or current injustices suffered by ethnic or cultural minorities the nature and scope of group rights and questions around how institutions are supposed to treat a certain specific identity cultural ethnic group what is missing from these debates is a comprehensive analysis of groups as both agents and objects of social policies while this has been subject to much scrutiny by sociologists and social psychologists it has received less attention from a normative and philosophical point of view this volume asks what problems are posed to political philosophy by a collection of individuals who act or are treated in a collective way focusing not only on ways in which institutions should treat groups but also on the normative implications of considering groups as possible social agents when acting either in vertical relations with the state or in horizontal relations with other groups or individuals this book explores these issues from both theoretical and practical perspectives contributors address both the nature of political and social philosophy itself and the ways in which specific issues affirmative action race religion and places of worship the rights of states have become political and social priorities political rock features luminary figures in rock music that have stood out not only for their performances but also for their politics the book opens with a comparative cultural history of artists who have played important roles in social movements individual chapters are devoted to the clash and fugazi billy bragg bob dylan rage against the machine pearl jam sinead o connor peter gabriel ani difranco bruce cockburn steve earle and kim gordon these artists have been chosen for their status as rock musicians and connections to political moments movements and art the artists and authors show that rock retains a critical strain continuing a tradition of rock politics that matters to fans activists and movements alike in today s world people speak more than 6000 languages and identify with thousands of cultural groups and a large variety of different religions despite such a number of differences these and other features of human diversity are housed politically inside roughly 200 nation states globally speaking a diverse citizenry is an unavoidable fact for most countries across the planet additionally developments such as transnational migrations rising socio economic inequalities the war s on terror and political movements based on absolutist ideologies continue to raise broader questions of justice governance equality quality of life and social cohesion as such recent decades have witnessed a revival of debates concerning what it means to be a citizen in response to such trends nations such as australia canada and britain have committed themselves to teaching citizenship through their national curriculums moreover all european union member states have integrated some form of citizenship education into their primary and secondary curriculums acknowledging such developments this book uses discussions with citizenship educators as a backdrop for a critical analysis of various conceptions of citizenship such as liberal social democratic civic republican cosmopolitan and multicultural citizenship it also analyses how these educators approach the contemporary reality of nation states which are richly composed of a diverse citizenry given britain s transformation into a multi ethnic and multi faith society this book develops as a case study an understanding of how religious and cultural difference can be approached what makes this work unique is that it gleans ideas and research from a wide field of international scholarship such as political science philosophy education and cultural studies a further unique aspect of the book is that it uses the q methodology a research method used to study people s viewpoints to reveal some shared perspectives on citizenship in

doing so the path traced here leads to the discovery of spaces where citizenship educators despite their ethnic religious diversity display common ground on values beliefs and aims related to citizenship this book will prove to be a useful resource for academics educators and political leaders as well as interfaith and civil society professionals at large it is worth mentioning that even though this book has benefited from the generously contributed ideas of citizenship educators in england its scholarly research lessons arguments analysis and suggestions which focus on multi faith and multi ethnic societies will also be useful elsewhere

when groups feature in political philosophy it is usually in one of three contexts the redressing of past or current injustices suffered by ethnic or cultural minorities the nature and scope of group rights and questions around how institutions are supposed to treat a certain specific identity cultural ethnic group what is missing from these debates is a comprehensive analysis of groups as both agents and objects of social policies while this has been subject to much scrutiny by sociologists and social psychologists it has received less attention from a normative and philosophical point of view this volume asks what problems are posed to political philosophy by a collection of individuals who act or are treated in a collective way

focusing not only on ways in which institutions should treat groups but also on the normative implications of considering groups as possible social agents when acting either in vertical relations with the state or in horizontal relations with other groups or individuals this book explores these issues from both theoretical and practical perspectives contributors address both the nature of political and social philosophy itself and the ways in which specific issues affirmative action race religion and places of worship the rights of states have become political and social priorities

in everyday life advertising and the popular media to lend authority to a discourse and imply that one's claims are beyond dispute that politicians should have occasionally been tempted to do the same and make up for the deficit of legitimacy of their discourse through the instrumentalisation of scientific arguments or participation in contemporaneous debates on scientific issues is therefore not surprising the issue at stake in this volume is to examine how and to what extent this process may have been taking place in the past three centuries in order to accomplish this the contributions cover various fields of expertise ranging from the hard sciences to more controversial types of science investigating the intricate relations of science and political discourse
