on march 28 1966 peace corps personnel in tanzania received word that volunteer peppy kinsey had fallen to her death while rock climbing during a picnic local authorities arrested kinsey s husband bill and charged him with murder as witnesses came forward claiming to have seen the pair engaged in a struggle the incident had the potential to be disastrous for both the peace corps and the newly independent nation of tanzania because of the high stakes surrounding the trial questions remain as to whether there was more behind the final not guilty verdict than was apparent on the surface peter h reid who served as a peace corps volunteer in tanzania at the time of the kinsey murder trial draws on his considerable legal experience to expose inconsistencies and biases in the case he carefully scrutinizes the evidence and the investigation records providing insight into the motives and actions of both the peace corps representatives and the tanzanian government officials involved reid does not attempt to prove the verdict wrong but examines the events of kinsey s death her husband s trial and the aftermath through a variety of cultural and political perspectives meticulously researched and replete with intricate detail this compelling account sheds new light on a notable yet overlooked international incident involving non state actors in the cold war era
